Objectives and investment policy

The investment objectives of the Sub-Fund are to achieve long-term capital appreciation and to outperform the Tokyo Stock Exchange First Section TR - JPY (the "Benchmark"). The Sub-Fund does not intend to track the Benchmark. The Sub-Fund is actively managed but uses its Benchmark as a performance measure.

The Sub-Fund will take long positions in securities the investment manager believes to be priced below fair value. The approach considers criteria such as earnings yield; asset value; and estimates of future profitability.

The Sub-Fund is intended only for professional clients, eligible counterparties and/or retail clients subscribing through eligible counterparties. The Sub-Fund may be suitable for investors seeking capital appreciation and income through the Sub-Fund's investment in Japanese equities and related instruments and with a long-term investment horizon.

Investments will mainly be shares in large and medium sized Japanese companies. Up to 15% of the Sub-Fund's net assets may be held in corporate bonds and up to 15% of the Sub-Fund's net assets may be invested in securities (bonds and equities and related instruments) from issuers worldwide. However; no more than 15% of the Sub-Fund's net assets will be invested in bonds or other fixed income instruments at any one time.

About 95% of the Sub-Fund's net assets will be held in long positions in shares and other equity-linked securities such as J-REITS (Japanese Real Estate Investment Trust); Exchange Traded Funds; Japanese closed-end investment trusts; convertible bonds; options and equity warrants. The remainder of the Sub-Fund's net assets will be held in the form of cash and short-term money market instruments.

The reference currency of the Sub-Fund is JPY The currency of the share class is GBP.

Investors can sell their holding in the Sub-Fund on any day that is a business day in Luxembourg; London and Tokyo.

Income and capital gains are reinvested in the case of the accumulation shares and distributed in the case of the distributing shares.

The shares of the E ACC and DIS Classes are exclusively offered to "Non Institutional Investors" within the meaning of Article 174 of the 2010 Law.

The shares of the E ACC and DIS classes are offered to Non Institutional Investors who have been previously approved by the Board of Directors subscribing in aggregate USD 100 million or its equivalent in another currency across D, E, F share classes. Please refer to the prospectus for further information. This minimum subscription amount may be waived at the discretion of the Board of Directors.

The Benchmark: Tokyo Stock Exchange First Section Total Return Index (TOPIX TR).

Risk and reward profile

This risk indicator is based on historical data and may not be a reliable indication of future performance. The share class risk category may shift over time and does not constitute a guarantee. The lowest category (1) does not mean that investments are entirely risk-free.

Arcus Fund SICAV - Arcus Japan Fund E DIS GBP unhedged is in category 6 because its value is subject to high variations. This means that opportunities for profits and losses may be high.

The synthetic risk and reward indicator of 6 reflects the volatility of the Japanese market over the last 5 years.

The Sub-Fund pursues return in an aggressive manner that may involve investing in unpopular or distressed stocks; and these risks may not be adequately captured by the synthetic indicator. The Sub-Fund is also exposed to falls in the Japanese stock market.

Particular risks not adequately captured by the risk indicator include: The Sub-Fund invests primarily in shares that should be easy to sell; but redemption may be delayed in extraordinary circumstances. The Yen, US Dollar, Euro and Pound Sterling share classes are exposed to different foreign exchange risks.

The following risks have no direct influence on this classification; but may be significant for the Fund:

- Exchange risk** : Foreign exchange rate variations may cause the value of investments to decrease. For JPY share classes this risk will be fairly limited as a result of the Sub-Fund's net asset value being calculated in JPY and the Sub-Fund investing principally in JPY-denominated Securities. For other currency classes this risk may be greater than the usual exchange risk associated to investment because the net asset value of these classes may be affected favourably or unfavourably by fluctuations in currency rates.
- Liquidity risk** : In difficult market conditions; the Sub-Fund may not be able to sell a security for full value or at all. This could affect performance and could cause the Sub-Fund to defer or suspend redemptions of its shares.
- Counterparty risk** : The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments; may expose the Sub-Fund to financial loss.

The return is not guaranteed and your investment is at risk. You may lose some or all of your investment. More information in relation to risks in general may be found in the 'Risk considerations' section of the Prospectus
