Report from the Investment Manager

CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund (feeder fund)

Fund performance

Although asset prices at the beginning of the year were generally considered high, corporate profit outlooks and the low level of inflation suggested that securities markets would be relatively stable in 2020. Any concerns were mainly associated with the US-China trade war.

Both the equity markets and the corporate bond markets started the year strongly, but once the Covid-19 virus gained a foothold around the world they fell quickly and sharply in March. However, both central banks and governments responded with comprehensive measures to minimise the economic damage. This, combined with a gradual stabilisation of the spread of infection, meant that investors chose to look ahead and focus on the power of the economic recovery once the effects of the pandemic subside.

During the second half of the year, many company reports offered positive surprises, and this combined with positive news about vaccine development to further improve the levels of optimism, mainly in the more cyclical sectors.

The US presidential election was, of course, the focus in late autumn. Although the election, which did not receive an early formal decision, was in line with most expectations, the capital markets still reacted positively overall. A second virus wave in the winter certainly dampened the stock market mood in December, but the rise for the Stockholm stock exchange (SIX RX) for the full year was still 14.80 percent.

The corporate bond markets, which should normally perform better than the stock markets in times of crisis, were hit by an acute lack of liquidity in connection with the market turbulence at the beginning of the year, and also fell. However, the liquidity situation prompted central banks to take remedial action, and bond prices generally recovered during the second half.

As the Sub-Fund mainly focuses on investments in securities that provide stable and high direct returns, it has been negatively affected by the general cancellation of company dividends, intended to avoid being excluded from government support measures.

Despite the different and, in many respects, negative conditions, the Sub-Fund rose by 6.4 percent during the year. Holmen, Epiroc, Investor, Kinnevik, Lifco, Dometic and SCA are among the holdings that particularly contributed with a positive return. Forest companies are probably perceived as relatively defensive investments, with large forest assets whose value is not affected by short-term fluctuations in the economy. Lifco and Dometic fell more than the market initially, but at the end of the year clawed back their entire losses and more.

Shares that contributed negatively included Atrium Ljungberg, Bonava, Duni and Securitas. In the cases of Atrium Ljungberg and Duni, it was concerns about retail and the hotel and restaurant industry that had a negative effect. There was some recovery in these shares during the latter part of the year. The Sub-Fund's holdings of corporate bonds contributed a marginally positive return after the initial decline caused by the previously mentioned difficult liquidity situation.

Net flows during the period amounted to SEK -69.9 million. Assets under management amounted to SEK 410 million as of December 31, 2020.

Fund management

CARNEGIE Strategy Fund is a feeder fund of Carnegie Strategifond and thus invests its assets only in Carnegie Strategifond. In short, the investment focus for Carnegie Strategifond is to invest its assets in securities issued by Nordic companies that provide high direct returns. The direct return can consist of either a dividend or interest coupons on bonds. The starting point for the Sub-Fund management is that the equities component should over time amount to approximately 50 percent. During 2020, the equities component varied between just over 50 percent and just over 60 percent due to both changes in value and active decisions.

The Sub-Fund has invested in some new shareholdings, including Telia and SSAB. Telia has been included in the portfolio before but was divested as the previous management did not take sufficient measures to focus and structure the business. A lower valuation and a new management and board means that the share again appears to

Report from the Investment Manager (continued)

be interesting. The core business in Sweden/the Nordics has over time shown stable earnings, although a lower cost base could further boost profitability. But the most important thing is that the sprawling geographical structure, which lacks clear synergies, is now being remedied, and with the divestment of the stake in Turkcell the company will be more clearly exposed to the Nordic markets.

To a large extent, Telia's problems have not been about earnings but rather the constant pursuit of expansion and dubious new investments. With the new management, there is reason for optimism about a strategy change with a clear focus on profitability and the core business rather than expansion. The incoming CEO, Allison Kirkby, and the Chairman, Lars-Johan Jarnheimer, both have a background from Tele2 with good reputations. In the prevailing environment, there should be a strong demand for companies with stable cash flows and dividends.

SSAB has a very far-reaching goal for sustainable production, and if successful this should be able to give the company significant competitive advantages. Previously, the financial risk in the company was relatively high given its debt levels, but after a completed recapitalisation the proportion of debt in relation to equity is down to just under 20 percent. The virus outbreak and closed borders have led to delivery troubles for many companies, and difficulty in maintaining production. One consequence could be that companies review their production structure in the future and choose to increase their investments. Such a scenario would increase demand for SSAB's products.

Bank shares Swedbank and Handelsbanken were sold during the spring to finance increased liquidity and small investments in bank bonds. During the latter part of the year, however, the Sub-Fund invested in Nordea and SEB. In Nordea's case, the investment was made in connection with Sampo choosing to reduce its ownership in the company and placing shares at a discount in relation to the prevailing market price. Banks generally performed weakly relative to other sectors during the year. A return to more normal circumstances suggests a revaluation. With a dividend yield of 5-6 percent, the valuation appears attractive to buyers.

The Sub-Fund invested in bank bonds, known as AT1s, in connection with large price falls during the spring. For example, a Handelsbanken bond was purchased at a yield of around 15 percent. The Sub-Fund now owns bonds in Handelsbanken, SEB and DNB, but given the strong price recovery bank shares now appear to be more attractive, so the bonds will probably be either redeemed or gradually reduced. Bond investments were also made in Verisure, Industrivärden, FastPartner and Link Mobility. These investments were financed through a redemption of the holding in Bergvik Skog and divestment of the holdings in B2 Holding and Garfunkel.

Derivatives trading etc

Carnegie Strategifond traded in derivatives during the year. The Sub-Fund may purchase securities in foreign currency. To protect Swedish fund unitholders against currency movements in bond holdings, the Sub-Fund hedges its bonds with currency futures. The commitment approach is used as the risk assessment method to calculate the total exposures in the Sub-Fund. The Swedish Krona's movements against other currencies have not had any major impact on the Sub-Fund's unit value. There was no collateral pledged as of December 31 and collateral received amounted to SEK 83 million. The Sub-Fund CARNEGIE Strategy Fund invested also in forward foreign exchange contracts during the year.

Securities holdings

CARNEGIE Strategy Fund is a Sub-Fund that invests in Carnegie Strategifond. As of December 31, CARNEGIE Strategy Fund was 99.22 percent invested in Carnegie Strategifond. The remaining 0.78 percent consisted of cash, other assets and liabilities.

Outlook

As previously, our view is that a portfolio of corporate bonds and stable shares that pay good dividends creates good conditions for solid long-term value growth at relatively low risk. The historically high valuation of relatively safe fixed-income securities means that the more than half of the Sub-Fund will probably for the time being consist of shares, supplemented primarily with high-yield bonds.

Report from the Investment Manager (continued)

The pandemic of course means increased uncertainty about economic development, even though the markets now seem to assume that the negative economic consequences will be limited in the longer term. However, this presupposes successful vaccination programmes. Any significant setbacks in that process are likely to have short-term negative repercussions for the markets and the Sub-Fund. The valuation of risk assets such as equities and high-yield bonds is historically high, although the Nordic markets appear attractive in an international perspective. Expectations for the Sub-Fund should therefore be set lower than the 9 percent annual return it has generated over the past decade.

Sustainability

The Sub-Fund regards sustainability as a critical part of its management and, as in previous years, held multiple company meetings and discussions where sustainability issues were raised. We held meetings and had dialogues with companies including Volvo, Heimstaden, SSAB, Lifco, Bulk Infrastructure and FastPartner to discuss, follow up and investigate their work with sustainability.

Questions concerning Volvo's way of reporting its environmental impact led to a dialogue with the company that resulted in satisfactory responses. Representatives of the Sub-Fund also participated in meetings with Volvo with a focus on corporate governance issues. Heimstaden got its first independent board member through the appointment of Casper Von Koskull as Chairman last spring, something we have been requesting for a long time.

SSAB is a new holding, and its focus on developing sustainable products and production was a strong factor in the investment decision. SSAB has a strategic plan to revolutionise iron and steel production and become the first steel company in the world to market iron ore-based fossil-free steel in 2026. During the autumn, SSAB announced an interest in acquiring Dutch steel manufacturer IJmuiden. The Sub-Fund contacted SSAB with specific questions regarding how a possible acquisition of Ijmuiden would affect the company's sustainability and, in particular, what would be the environmental consequences. If the acquisition is completed, there will be reason to review the conditions for the Sub-Fund's continued investment in SSAB, partly for sustainability reasons and partly for fundamental financial reasons.

The Sub-Fund has not excluded any holdings due to sustainability analysis. Our analysis suggests that the companies we invest in, such as Holmen, Volvo, ABB, Epiroc and FastPartner, take sustainability issues very seriously and that this work creates opportunities to gain market share by offering more environmentally friendly products.

As an example, Holmen is investigating the possibility of investing just over SEK 1 billion in wind power in the coming years. The forestry company already absorbs more carbon dioxide than it emits, and any investment would mean a further reduction in its dependence on fossil fuels. Since 2005, Holmen has reduced its use of fossil fuels by 87 percent (2019), and its goal is to reach 90 percent by 2020.

ABB has far-reaching goals for sustainability, with a special focus on three areas: responsible relationships, responsible operations and leading technology. The goal for leading technology is that by 2020, 60 percent of sales will come from the company's eco-efficiency portfolio (58 percent in 2019). An example of products in the portfolio is one of ABB's own manufacturing units in Germany, where an intelligent software technology called OPTIMAX controls energy management. Solar cells have been installed that cover the entire plant's energy needs on sunny days, and the plant saves 630 tonnes of carbon dioxide annually.

Another example is mining and infrastructure equipment company Epiroc, which has decided on new sustainability goals for 2030. Its aim is the halve carbon dioxide emissions from its operations, transport and relevant suppliers, as well as from customers' use of Epiroc equipment. It also aims to double the number of women in operational roles. FastPartner's sustainability goal is to become climate neutral by 2030.

On the bond side, the Sub-Fund has teamed with another fund management company to develop a specification for the sustainability ambitions and reporting of issuing companies. This has been well received by the companies and has led to improved transparency and a better ability to evaluate the companies when public information may otherwise be scarce for Nordic companies in the high-yield segment.

Report from the Investment Manager (continued)

The Sub-Fund was represented on the nomination committees for the holdings in Holmen, NCC, Duni, Lifco, Atrium Ljungberg and Elanders. Our general attitude in our nomination committee work is that we strive for diversified boards consisting of directors with strong integrity.

CARNEGIE Fonder Portfolio - CARNEGIE Corporate Bond

Market Development

COVID – 2020 was a year we won't forget soon. At the beginning of the year, global financial markets reached record levels following an upward trend for many years, and although there were moments of concern, such as Brexit and the trade war between the USA and China, the risk appetite was strong. Following news that the spread of the virus would extend beyond China and risk develope into a pandemic, it dominated all media. Global stock markets as well as credit markets saw the sharpest falls since the Great Depression when investors sold risk assets widely. Towards the end of March/early April, sentiment reached rock bottom before central banks and governments declared ready once again to do "whatever it takes".

What we have experienced since then is an unprecedented recovery, driven by enormous stimulus packages, monetary and fiscal policy measures, and a strong belief that the effects of the virus are finite. The impact on companies' results has been mixed, and some industries have been hit hard, particularly hotels, travel and retail. On the other hand, there are industries that have been Covid-19 winners, such as gambling/gaming companies and digital trading, while the vast majority of companies have experienced a limited impact so far.

The credit quality in the Nordic market differs between companies and industries, but in general we believe companies are showing resilience through a stable development in spite of the year's volatility. Moreover, the credit margins are still attractive compared to the rest of Europe, where the central bank's purchasing is significantly more aggressive, which has brought the credit margins to artificially low levels.

Fund Management

The beginning of the year was strong, and although there were some geopolitical concerns, many companies enjoyed a positive profitability trend. Then came March, and more or less all parts of the portfolio were severely affected by a liquidity-driven market development where investors opted for the security of cash rather than carry. Initially, we adjusted the portfolio to focus on liquidity and the actual effects of the virus on individual holdings, and we divested companies that had been badly impacted by the virus and its effects. Pandemic losers such as Hurtigruten, Selecta and Cabonline were sold off in favour of high-quality IG credits like Atlas Copco, Volvo and Autoliv, where the price had dropped by almost 10 per cent in spite of the net cash or low level of indebtedness/low operational risk. A similar trend was observed in real estate credits, regardless of whether companies owned retail or residential properties, and we chose to purchase longer senior credits in names such as Balder, Akelius and Castellum. These names were also the first to be greeted by the recovery as in many cases investors realised that the reaction was exaggerated. The compression in the credit margin for the sector has been significant since then, and fuelled further by the central banks' ongoing pandemic purchase programme, which will continue to characterise the development going forward.

The recovery for Nordic high yield has been slower than its global ditto, which continues to make the sector attractive looking ahead. Initially, it was flow-driven, which means the appetite for high yield was greater in Europe than in the Nordic region, but in the final months of the year the driving factor was the Nordic wave of new issues without any "new" money entering the market, which meant that credit spreads remained attractive. It was not until after companies released figures for the second and third quarters that the risk appetite increased for high-yield names as well, when it was clear that they had coped with the pandemic well. Strong risk sentiment and positive corporate news from Garfunkel and Axactor, both of whom implemented refinancing at the same time as the owners made large equity injections to support the growth, contributed to the upswing during late autumn.

Despite a strong recovery from the bottom levels in March, the Sub-Fund's performance amounted to -1.36 for the year. The net flow during the year increased to -2.1 billion and the Sub-Fund assets as at the end of the year were 17.5 billion.

Report from the Investment Manager (continued)

Sustainability

The Sub-Fund integrates sustainability into the management process and ongoing dialogue with companies. Although some companies are excluded on the basis of negative screening, the basic approach is to encourage companies to actively engage in dialogue on the impact of sustainability. This is to give the companies the chance and opportunity to develop and, in the long term, enable them to become the best in class.

The result of two lengthy dialogues has borne fruit during the year. Through the addition of Casper Von Koskull (chairman) last spring, Heimstaden got its first independent board member, something we have been requesting for a long time and regard as important in a well-managed company. Fastpartner presented new targets on their capital markets day, in particular ambitious sustainability targets, which generally require the company to commit to reach climate neutrality by 2030.

Green bonds continue to be an attractive asset class in which we continue to invest in. The proportion of green bonds now amounts to around 13 per cent. An example of new investment in green bonds is Momox. The company has developed and operates a proprietary digital platform to buy and sell used literature and some ready-to-wear clothing. The business model is estimated to save 65,000 tonnes of carbon dioxide a year, compared with the life cycle impact of new products.

Derivatives trading

The Sub-Fund has been trading in derivatives during the period. Cash provided as at 31 December amounted to SEK 241.2 million and cash received came to SEK 251.9 million. In order to calculate the total exposures in the Sub-Fund, the commitment method has been used as the risk assessment method.

Future outlook

The pandemic continues to create a lot of uncertainty, and although we have seen a strong recovery, the credit margins in several sectors still remain at attractive levels. A balanced and diversified portfolio, with a focus on liquidity, enables us to maintain our conservative approach. We continue to focus on sustainable companies, which we are convinced will contribute to long-term profitability.

CARNEGIE Fonder Portfolio - CARNEGIE Total

Fund performance

Although 2020 was a turbulent time, many of the world's stock markets recovered and closed the year in the black despite the pandemic. Carnegie Total showed positive performance and rose 3.93 percent. Net flows to the Sub-Fund during the year amounted to SEK -131.2 million, and assets under management at year-end were SEK 1.29 billion.

The year began with rising stock prices and positive economic signals, but this optimism was replaced by growing concern about the pandemic. March was tough for the stock market, with substantial falls in markets around the world. Corporate bonds also showed strong price corrections. The market gradually recovered and this can largely be attributed to the resolute action by central banks. They did what was required – bought financial instruments, added liquidity to the banking system and implemented interest rate cuts.

The Covid-19 pandemic took hold and there was a second wave after the summer, putting exceptionally large strain on the real economy. Enormous stimulus from governments and central banks was crucial to the recovery on world stock markets.

Fund management

Carnegie Total is a balanced fund (a fund of funds) that invests in a selection of Carnegie Fonder's most successful funds. These include Carnegie Sverigefond, Carnegie Småbolagsfond and Carnegie Corporate Bond. Carnegie Fonder's range is also supplemented with some of OPM's and C WorldWide's funds. All funds in Carnegie Total are long-term and actively managed. The strategic allocation is 60 percent equities and 40 percent fixed income. An emphasis on the equities side generates good long-term potential, while the fixed income funds can act as shock absorbers in troubled times. Carnegie Total's fixed income component consists mainly of corporate bonds, which have better potential to generate returns relative to low-yield government bonds. The tactical allocation takes place on an ongoing basis, with adjustments to the equities and fixed income components. Carnegie Total's design enables a diversified investment in actively managed funds with a good track record at a competitive fee. Carnegie

Report from the Investment Manager (continued)

Total consists of proven funds, which are managed by proven managers using a proven model. Corrections in the market occur from time to time, but our focus is on achieving a good long-term risk-adjusted return.

The large movements in both the stock markets and the credit markets during the period led to a great deal of rebalancing between asset classes in order to maintain the risk profile in the Sub-Fund.

Carnegie Småbolagsfond and Carnegie Spin-Off were among the equity funds held that performed best during the year, rising 19.7 percent and 16.6 percent respectively. Carnegie Global and Carnegie Rysslandsfond developed negatively, falling 10.2 percent and 11.9 percent respectively. The best performer in the fixed income element was Carnegie High Yield Select, with a gain of 1.8 percent. Carnegie Corporate Bond was a weak performer and fell 1.4 percent.

We reduced our foreign exposure during the year and instead increased our exposure to Swedish equities, mainly small companies. We gradually increased the weight in Carnegie Småbolagsfond, and slightly increased in Carnegie Spin-Off. Small caps performed significantly better than larger companies during the year. If the market continues to feel optimism and confidence in the future, we can probably expect small companies to continue to develop well. Small caps generally experience higher volatility and tend to outperform the stock market as a whole in good times.

Nordic corporate bonds fell sharply in March. The fall in prices was driven by a lack of liquidity rather than an increase in credit risk in the companies. The stress in the credit market meant that the fixed income element did not provide the buffer we expected when the stock market fell sharply. After extensive price correction, we took the opportunity to increase the weight in Carnegie High Yield Select to obtain a higher effective interest rate.

The low interest rate environment and expectations of continued low interest rates mean that the potential for traditional fixed-income investments in, for example, government securities is very low. We prefer corporate bonds even though the risk in these is higher. We also prefer a relatively short interest rate duration to reduce sensitivity and protect the Sub-Fund against rising interest rates.

Trade in derivatives

During the period, the Sub-Fund did not trade in derivatives or lend its shares. There was no collateral pledged nor received as of December 31.

Securities holdings

As of December 31, the Sub-Fund was 99 percent invested in underlying funds. The remaining 1 percent consisted of cash and cash equivalents. Equity funds accounted for 60.9 percent.

Outlook

There is much to suggest that the world economy will stage a good recovery in 2021. The extensive fiscal stimulus will continue and low interest rates will provide ongoing support, which speaks in favour of equities as an asset class. The recovery in oil prices is likely to continue in 2021. This should benefit the Russian stock market, which has a large oil exposure. A global recovery phase combined with rising risk appetite is negative for the dollar. A weakening of the dollar should benefit emerging markets during the year. The stock market's rapid recovery has exceeded many investors' expectations in terms of both speed and magnitude, and the risk of setbacks has definitely increased in line with highly bullish corporate valuations.

Sustainability

Carnegie Total invests in a selection of Carnegie Fonder's most successful funds and these also follow a strict policy for responsible investments. We believe that over time there is a positive relationship between good risk-adjusted returns and sustainability in the companies in which our funds invest.

Carnegie Total's underlying funds are actively managed, which is essential for responsible investments. In all of our funds, we require and verify that the holdings live up to the UN Global Compact, and we exclude investments in controversial weapons, firearms and defence materiel, alcohol, tobacco and pornography.

The Sub-Fund management company has implemented a system for ESG, our CF THOR tool, intended to identify companies that are future-proof. By using the CF THOR tool, sustainability issues are integrated into the traditional financial analysis. Our fund managers document their work and the dialogue they hold with the companies on these issues.

Report from the Investment Manager (continued)

CARNEGIE Fonder Portfolio - CARNEGIE High Yield Select

Market Development

Market performance during 2020 turned out to be extremely volatile, mainly due to Covid-19. Initially, the hope was that the spread of the virus could be isolated to China, but when it became clear that it had developed into a pandemic, the capital markets reacted strongly. Concern for the actual economic consequences and a collapse of the oil price resulted in a meltdown of global credit markets, with sharp falls in prices as a consequence of the widespread sale of risk assets by investors. Although, in retrospect, the effects were milder than feared, the central banks were required to take a "whatever it takes" approach once again, combined with positive vaccination news before the capital markets fully regained their appetite for risk. The initial recovery was enjoyed predominantly by companies with higher credit ratings and credits included in the central banks' pruchase programmes, but with time investors were forced further down the risk scale. This, combined with strong reports for the second and third quarters, has also driven the recovery within Nordic high yield. Although the year's development may generally be summarised as being V-shaped, we maintain the image of the Sub-Fund's niche, Nordic high yield, is an attractive sector, both from a historical perspective and in comparison with other asset classes.

Fund Management

Large parts of the global financial markets have recovered from the decline last spring, but an attractive premium within Nordic high yield still remains. The slower recovery for Nordic high yield is due in part to limited flows but also to the fact that the new issues market returned in full swing at the end of the year, i.e. just as in March/April, the short-term price development is defined by supply and demand, but over a longer period by the underlying yield in the portfolio. The reports for the second quarter came at the end of August and only then was it possible to make an assessment of how companies had coped with the crisis, i.e. whether the returns were deferred or the credit risk was hightened. This has created interesting investment opportunities in the secondary market, not least for shorter credits, where there is a limited period until maturity and hence a palpable increasing pull-to-par effect.

The focus was initially on liquidity and the actual effects of the virus on individual holdings, whereby we divested companies with an imminent high Covid-19 risk such as Selecta and Cabonline, in favour of more virus-resistant names like Azerion and CentralNic. With heightened uncertainty and relatively asymetrical information, we preferred short credit duration and took advantage of opportunities to increase the exposure in Gefion, Catena Media and Aspire Global, among others, when we felt that the price was unjustifiably low in relation to the short time remaining to maturity. Gefion redeemed their bond in late autumn, which gave us a 6 per cent price increase in just four months. A clear trend is investor appetite for technology-related companies and the importance of digitisation in existing industries. The portfolio's emphasis on technology-related companies was increased when the primary market was allowed to open after the summer and we invested in companies like Mercell and Desenio. Mercell has developed and operates a digital portal for public procurements, and Desenio develops, produces and sells *affordable art* digitally, and both have an attractive business model which is becoming increasingly up-to-date, and investor appetite for the sector is strong.

The majority of the portfolio has recovered from the fall last spring, but we observe that there is still some underperformance embedded in the current yield. With short credit binding, it is also possible to estimate when this performance should be normalised. In isolation, the performance for 2020 is behind target, we should realise the performance over time, where the individual companies' development is most tangiable. The Sub-Fund finished the year on an upswing of 1.81 per cent with a net flow of -182.4 million, which summarises the capital managed as of the end of December at SEK 889 million.

Sustainability

There is still a large focus on ESG and more impact dialogues, an initiative for a sustainable HY market and a growing number of companies discovering the advantages of green financing. An example of new investment in green bonds is Momox. The company has developed and operates a proprietary digital platform to buy and sell used literature and some ready-to-wear clothing. The business model is estimated to save 65,000 tonnes of carbon dioxide a year, compared with the life cycle impact of new products. On the subject of attractive investments, Aker announced, as part of its investment in green energy, that they intend to acquire East Renewable, something which shows how attractive the sector is for well established as well as new actors. Regular checks are carried out in the form of both negative and positive screening, which, depending on the outcome, enables us to opt for or out of the worst or the best in class.

Report from the Investment Manager (continued)

Derivatives trading

The Sub-Fund has been trading in derivatives during the period. Cash provided as at 31 December amounted to SEK 12.9 million and cash received came to SEK 13.8 million. In order to calculate the total exposures in the Sub-Fund, the commitment method has been used as the risk assessment method.

Future outlook

We try to balance the attractive returns potential with flows in the market, the impact of central bank support, combined with the effects of the increased/reduced spread of the coronavirus. In general, we are defensive, but will be opportunistic when the occasion arises, although our focus is always on good companies. Following the advance of the coronavirus, the emphasis of the selection of companies is becoming increasingly clear, and the development for the respective companies is that which is the most important for the Sub-Fund's development in the longer term, even though the Sub-Fund is not immune to short-term price fluctuations.

CARNEGIE Fonder Portfolio - CARNEGIE Total Plus

Fund performance

Although 2020 was a turbulent time, many of the world's stock markets recovered and closed the year in the black despite the pandemic. Carnegie Total Plus showed positive performance and rose 2.06 percent. Net flows to the Sub-Fund during the year amounted to SEK 10.2 million, and assets under management at year-end were SEK 21.5 million.

The year began with rising stock prices and positive economic signals, but this optimism was replaced by growing concern about the pandemic. March was tough for the stock market, with substantial falls in markets around the world. Corporate bonds also showed strong price corrections. The market gradually recovered and this can largely be attributed to the resolute action by central banks. They did what was required – bought financial instruments, added liquidity to the banking system and implemented interest rate cuts.

The Covid-19 pandemic took hold and there was a second wave after the summer, putting exceptionally large strain on the real economy. Enormous stimulus from governments and central banks was crucial to the recovery on world stock markets.

Fund management

Carnegie Total Plus is a balanced fund (a fund of funds) that invests in a selection of Carnegie Fonder's most successful funds. These include Carnegie Sverigefond, Carnegie Småbolagsfond and Carnegie Corporate Bond. Carnegie Fonder's range is also supplemented with some of OPM's and C WorldWide's funds. All funds in Carnegie Total Plus are long-term and actively managed. The strategic allocation is 80 percent equities and 20 percent fixed income. An emphasis on the equities side generates good long-term potential, while the fixed income funds can act as shock absorbers in troubled times. Carnegie Total Plus's fixed income component consists mainly of corporate bonds, which have better potential to generate returns relative to low-yield government bonds.

The large movements in both the stock markets and the credit markets during the period led to a great deal of rebalancing between asset classes in order to maintain the risk profile in the Sub-Fund.

Carnegie Småbolagsfond and Carnegie Spin-Off were among the equity funds held that performed best during the year, rising 19.7 percent and 16.6 percent respectively. Carnegie Global and Carnegie Rysslandsfond developed negatively, falling 10.2 percent and 11.9 percent respectively. The best performer in the fixed income element was Carnegie High Yield Select, with a gain of 1.8 percent. Carnegie Corporate Bond was a weak performer and fell 1.4 percent.

We reduced our foreign exposure during the year and instead increased our exposure to Swedish equities, mainly small companies. We gradually increased the weight in Carnegie Småbolagsfond, and slightly increased in Carnegie Spin-Off. Small caps performed significantly better than larger companies during the year. If the market continues to feel optimism and confidence in the future, we can probably expect small companies to continue to develop well. Small caps generally experience higher volatility and tend to outperform the stock market as a whole in good times.

Nordic corporate bonds fell sharply in March. The fall in prices was driven by a lack of liquidity rather than an increase in credit risk in the companies. The stress in the credit market meant that the fixed income element did not provide the buffer we expected when the stock market fell sharply. After extensive price correction, we took the opportunity to increase the weight in Carnegie High Yield Select to obtain a higher effective interest rate.

Report from the Investment Manager (continued)

The low interest rate environment and expectations of continued low interest rates mean that the potential for traditional fixed-income investments in, for example, government securities is very low. We prefer corporate bonds even though the risk in these is higher. We also prefer a relatively short interest rate duration to reduce sensitivity and protect the Sub-Fund against rising interest rates.

Trade in derivatives etc

During the period, the Sub-Fund did not trade in derivatives or lend its shares. The Sub-Fund has unit classes denominated in a currency other than Swedish Krona, the price of which are hedged to the respective currency. There was no collateral pledged nor received as of December 31.

Securities holdings

As of December 31, the Sub-Fund was 98 percent invested in underlying funds. The remaining 2 percent consisted of cash and cash equivalents. Equity funds accounted for 80 percent.

Outlook

There is much to suggest that the world economy will stage a good recovery in 2021. The extensive fiscal stimulus will continue and low interest rates will provide ongoing support, which speaks in favour of equities as an asset class. The recovery in oil prices is likely to continue in 2021. This should benefit the Russian stock market, which has a large oil exposure. A global recovery phase combined with rising risk appetite is negative for the dollar. A weakening of the dollar should benefit emerging markets during the year. The stock market's rapid recovery has exceeded many investors' expectations in terms of both speed and magnitude, and the risk of setbacks has definitely increased in line with highly bullish corporate valuations.

Sustainability

Carnegie Total Plus invests in a selection of Carnegie Fonder's most successful funds and these also follow a strict policy for responsible investments. We believe that over time there is a positive relationship between good risk-adjusted returns and sustainability in the companies in which our funds invest.

Carnegie Total Plus's underlying funds are actively managed, which is essential for responsible investments. In all of our funds, we require and verify that the holdings live up to the UN Global Compact, and we exclude investments in controversial weapons, firearms and defence materiel, alcohol, tobacco and pornography.

The Sub-Fund management company has implemented a system for ESG, our CF THOR tool, intended to identify companies that are future-proof. By using the CF THOR tool, sustainability issues are integrated into the traditional financial analysis. Our fund managers document their work and the dialogue they hold with the companies on these issues.

Audit report

To the Shareholders of **CARNEGIE Fonder Portfolio**

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of CARNEGIE Fonder Portfolio (the "Fund") and of each of its sub-funds as at 31 December 2020, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 December 2020:
- the statement of investments and other net assets as at 31 December 2020;
- the combined statement of operations and other changes in net assets for the Fund and the statement of operations and other changes in net assets for each of the sub-funds for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
 a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
 control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Fund's internal control;

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the
 disclosures, and whether the financial statements represent the underlying transactions and events
 in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes to the financial statements

as at 31st December 2020

Note 1 - General Information

CARNEGIE Fonder Portfolio (hereafter the "Company") was incorporated in the Grand-Duchy of Luxembourg on 2nd March 1990 under the name of FÖRSTA FONDER. As of 3rd March 1993, the Company's name was HAGSTRÖMER & QVIBERG, since 26th July 2000 it was HQ.SE Portfolio, since 23rd April 2003 it was HQ Portfolio and since 29th June 2011 it is CARNEGIE Fonder Portfolio. It is organised as an open-ended investment company with a variable capital ("Société d'Investissement à Capital Variable" - "SICAV") under Part I of the law of 17th December 2010 (hereafter the "Law 2010") relating to Undertakings for Collective Investment as may be amended from time to time. It is established for an undetermined duration from the date of incorporation.

The Board of Directors of the Company resolved with effect on 2nd November 2017 to create a Master Feeder Structure, as follows:

Feeder (Luxembourg domiciled fund)	Master (Swedish domiciled fund)
CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund	Carmagia Stratagifond
(feeder fund)	Carnegie Strategiond

Financial reports of the Company are published annually and semi-annually. These reports, as well as the Sales Prospectus, the Key Investor Information Document ("KIID"), the Statutes and all information concerning the Company are available for the Shareholders at the registered office of the Company, the Management Company and the Depositary.

The Financial Statements of Carnegie Strategifond, the Master of CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund (feeder fund) are available at the registered office of Carnegie Fonder AB, its Management Company.

Note 2 - Significant accounting policies

a) Presentation of the financial statements

The financial statements of the Company are established in accordance with the Luxembourg legal and regulatory requirements concerning Undertakings for Collective Investment and with generally accepted accounting principles in Luxembourg. The financial statements of the Company have been prepared on a going concern basis.

In accordance with the prospectus, the last trading/official Net Asset Value is dated 30th December 2020. An unofficial Net Asset Value dated 31st December 2020 has been calculated for reporting purposes and is disclosed in these financial statements.

b) Valuation

- 1) Securities admitted to official listing on a stock exchange or which are traded on another regulated market which operates regularly and is recognised and open to the public within the EU or the OECD member states are valued on the base of the last known sales price. If the same security is quoted on different markets, the quotation of the main market for this security is used. If there is no relevant quotation or if the quotations are not representative of the fair value, the evaluation is done in good faith by the Board of Directors or its delegate with a view to establishing the probable sales prices for such securities;
- 2) non-listed securities are valued on the base of their probable sales price as determined in good faith by the Board of Directors and its delegate;
- 3) liquid assets are valued at nominal value plus any accrued interest or on an amortised cost basis. Securities valued at amortized cost are recorded at cost value in the statement of investments, amortized interests are recorded as income receivable on portfolio in the statement of net assets. All other assets, where practice allows, are valued in the same manner. Short-term investments that have a remaining maturity of one year or less are valued (i) at market value, or (ii) where market value is not available or not representative, at amortised cost;

Notes to the financial statements (continued)

as at 31st December 2020

- 4) financial instruments which are not traded on the futures exchanges but on a regulated market are valued at their settlement value, as stipulated by the Company's Board of Directors in accordance with generally accepted principles, taking into consideration the principles of proper accounting, the customary practices in line with the market, and the interests of the Shareholders, provided that the above-mentioned principles correspond with generally accepted valuation regulations which can be verified by the auditor;
- 5) swaps are valued on a mark-to-market basis. Net unrealised gain/(loss) is disclosed in the statement of net assets. Net variation of the unrealised gain/(loss) and net realised gain/(loss) are disclosed in the statement of operations and other changes in net assets;
- 6) units or shares of UCI(TS) are valued at the last available Net Asset Value;
- 7) in case of extraordinary circumstances, which make the valuation in accordance with the above-mentioned criteria impossible or improper, the Board of Directors of the Company is authorised to temporarily follow other valuation regulations in good faith and which are according to the verifiable valuation regulations laid down by the auditor in order to achieve a proper valuation of the respective Sub-Fund's assets.

c) Net realised gain/(loss) on securities portfolio

The net realised gain/(loss) on securities portfolio is determined on the basis of the average cost of securities and is disclosed in the statement of operations and other changes in net assets.

d) Cost of securities

The acquisition cost of a security denominated in a currency other than that of the Sub-Fund is converted to the Sub-Fund's currency at the exchange rate prevailing on the date of purchase.

e) Exchange translation

Bank balances, other assets and liabilities and the value of securities held that are denominated in other currencies than the Sub-Fund's reference currency are converted at the prevailing exchange rate of the closing day. Income and expenses incurred in currencies other than the Sub-Fund's reference currency are converted at the prevailing exchange rate of the day of each transaction. Exchange gains or losses are disclosed in the statement of operations and other changes in net assets.

At the date of the financial statements, the prevailing exchange rates on the closing day were as follows:

1	SEK	=	0.1075461	CHF	Swiss Franc
			0.7401811	DKK	Danish Krona
			0.0994379	EUR	Euro
			0.0890165	GBP	Pound Sterling
			1.0424150	NOK	Norwegian Krona
			0.1216723	USD	US Dollar

f) Combined financial statements

The combined financial statements of the Company are expressed in SEK and are equal to the sum of the corresponding captions in the financial statements of each Sub-Fund.

g) Formation expenses

Expenses incurred in connection with the establishment of the Fund and the creation of the Sub-Funds are amortised over a period of five years.

Amortization of formation expenses is included in the caption "Other expenses" in the statement of operations and other changes in net assets.

Notes to the financial statements (continued)

as at 31st December 2020

h) Investment income

Dividend income is recognised on an ex-dividend basis and is recorded net of withholding tax.

Interest income is accrued on a pro rata temporis basis, net of any withholding tax.

i) Transaction fees

Transaction costs disclosed under the caption "Transaction fees" in the expenses of the statement of operations and other changes in net assets are mainly composed of broker fees incurred by the Company relating to purchases or sales of securities, of fees relating to transactions paid to the Depositary and of transaction fees on financial and derivatives instruments.

Transaction costs on bonds are included in the cost of the investments.

j) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at prevailing market rates for the remaining period from valuation day to the maturity of the contracts. Net unrealised gain/(loss) is disclosed in the statement of net assets. Net variation of the unrealised gain/(loss) and net realised gain/(loss) are disclosed in the statement of operations and other changes in net assets.

Note 3 - Management fees and Investment management fee

The Management Company is entitled to a fee calculated on a daily basis on the average net assets of the respective Sub-Fund and payable monthly. At the date of the financial statements, the applicable annual fee is max 0.09% p.a. for each Sub-Fund (0.088% p.a. until 30th September 2020).

This fee is waived for the Sub-Fund CARNEGIE Fonder Portfolio - CARNEGIE Total and CARNEGIE Fonder Portfolio - CARNEGIE Total Plus until the Sub-Funds total net asset reaches SEK 3.5 billion.

In addition to the above fees the Management Company is entitled to be reimbursed out of the assets of the feeder fund for its reasonable out of pocket expenses and disbursements.

The Investment Manager, Carnegie Fonder AB, receives an investment management fee, accrued daily and payable monthly in arears, based on the net assets of the Sub-Fund attributable to each Class of shares.

At the date of the financial statements, the annual fee applicable to each Sub-Fund is as follows:

- for CARNEGIE Fonder Portfolio CARNEGIE Strategy Fund (feeder fund): 1.25% p.a.,
- for CARNEGIE Fonder Portfolio CARNEGIE Total and CARNEGIE Fonder Portfolio CARNEGIE Total Plus: 1.60% p.a.,
- for CARNEGIE Fonder Portfolio CARNEGIE High Yield Select :

Class	3(SEK)	3 (NOK)	3 (SEK)	- ()	
			Distribution	Distribution	
fee in %	0.85	0.85	0.85	0.50	0.50

- for CARNEGIE Fonder Portfolio - CARNEGIE Corporate Bond:

	Class	3 (SEK)	3 (NOK)	3 (EUR)	3 (CHF)	2 (SEK)	1 (SEK)	1 (EUR)	1 (NOK)	1 (SEK)
							Distribution			
Γ	fee in %	0.95	0.95	0.95	0.95	0.38	0.60	0.60	0.60	0.60

Notes to the financial statements (continued)

as at 31st December 2020

For all the Sub-Funds except for CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund (feeder fund) the Investment Manager is entitled to receive a research fee of max 0.04% p.a. of the Sub-Fund's net assets. This fee is payable quarterly in arrears.

The Master Fund Carnegie Strategifond does not charge any share dealing charges, subscription or redemption fees to the feeder fund CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund investing in its shares.

The Master Fund does charge investment management fees to the feeder fund but reimburses these fees fully to the feeder fund (see Note 6).

The management and the investment management fees are included in the caption "Management fees" in the statement of operations and other changes in net assets.

Note 4 - Performance fee

The Sub-Fund CARNEGIE Fonder Portfolio - CARNEGIE High Yield Select may also pay a performance fee to the Investment Manager.

Performance fee of 20% over the hurdle rate of STIBOR 90 days (STIBOR floor of 0) \pm 2%. Maximum management fee and performance fee set to 2% (not including potential other charges for example (but not limited to) tax, audit, custody fee etc.) over the current financial year with high water mark.

The performance fee is calculated daily and drawn from the Sub-Fund on a collective basis. The accrued performance fee is paid to the Investment Manager annually. Any performance fee calculated on redemption proceeds is crystallised daily and paid annually in arrears.

At the date of the financial statements, a performance fee was due for the following Sub-Fund and amounted to:

Sub-Fund	Currency	Amount
CARNEGIE Fonder Portfolio - CARNEGIE High Yield Select	SEK	965,556.49

Note 5 - Management fees of the target funds

The management fee of the target funds in which the Sub-Funds CARNEGIE Fonder Portfolio - CARNEGIE Total and CARNEGIE Fonder Portfolio - CARNEGIE Total Plus invest, that are managed by investment manager related to Carnegie Fonder AB are as following:

CARNEGIE Fonder Portfolio - CARNEGIE Total

Code Isin	Currency	Description	Management fees (in %)
SE0001172263	SEK	Carnegie Asia A Cap	1.90

As explained in the following note "management fee retrocessions" management fee retrocessions are received in relation to investments in target funds. For CARNEGIE Fonder Portfolio - CARNEGIE Total and CARNEGIE Fonder Portfolio - CARNEGIE Total Plus the retrocessions received reduce the effective management fee charged by target funds.

Note 6 - Management fees retrocessions

Management fees retrocessions received by the Company and related to its investments in UCITS or other UCIs are disclosed under the "Other commissions received" in the statement of operations and other changes in net assets.

Note 7 - Depositary fees

The remuneration for depositary services are included in the item "Depositary fees" disclosed in the statement of operations and other changes in net assets.

Note 8 - Subscription duty ("Taxe d'abonnement")

The Company is governed by Luxembourg law.

Pursuant to the legislation and regulations which are prevailing, the Company is subject to an annual subscription duty ("taxe d'abonnement") of 0.05% which is payable quarterly and calculated on the basis of the net assets of each Sub-Fund on the last day of each quarter.

According to Article 175 (a) of the amended law of 17th December 2010 the net assets invested in Undertakings for Collective Investments already subject to the "taxe d'abonnement" are exempt from this tax.

Note 9 - Feeder Fund - Master Fund Structure

The Sub-Fund CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund (feeder fund) is a feeder of the Swedish UCITS Carnegie Strategifond (master fund).

Carnegie Strategifond is a UCITS fund registered with the Swedish Act on Investment Funds (2004:46).

The Feeder will at all times invest at least 85% of its assets into the Master.

The objective of the Feeder is to invest in Carnegie Strategifond. The Feeder will exclusively invest in share class A of the Master (ISIN SE0000429813).

The Financial Statements of Carnegie Strategifond, the Master of CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund (feeder fund) are available at the registered office of Carnegie Fonder AB, its Management Company.

Notes to the financial statements (continued)

as at 31st December 2020

The information sharing agreement between the Master and the Feeder, the information and cooperation agreement between the depositary of the Master and the depositary of the Feeder and the information sharing agreement between the auditor of the Master and of the Feeder and further information such as the Prospectus, the KIID and the annual and semi-annual reports of the Master are available upon request at the registered office of the Company.

At the date of the financial statements, the management fee charged by the Master Fund for the share class A is 1.50%.

As explained in Note 3 and 6 this fee is retroceeded to the Feeder fund.

At the date of the financial statements, the Feeder Fund holds 2.36% of the shares of the share class A of the Master Fund.

Note 10 - Forward foreign exchange contracts

At the date of the financial statements, the following Sub-Funds of the Company are committed in the following forward foreign exchange contracts.

At the date of the financial statements, the following Sub-Fund has received cash collateral from NORDEA BANK AB for an amount of respectively:

Sub-Fund	Currency	Amount
CARNEGIE Fonder Portfolio - CARNEGIE Corporate Bond	SEK	186,300,000.00
CARNEGIE Fonder Portfolio - CARNEGIE High Yield Select	SEK	9,900,000.00

These amounts serve as collateral for commitment on OTC derivative instruments.

Notes to the financial statements (continued)

as at 31st December 2020

Note 13 - Tax refund

The Company has instigated proceedings to reclaim tax withheld by certain Member States of the European Union on dividend payments it has received. The decision to initiate proceedings against any particular Member State is the result of an analysis of the likely costs and potential benefits of doing so. The likelihood of successfully reclaiming such amounts together with the estimated time to complete proceedings varies across Member States.

In 2016 a tax reclaim in Finland was done for CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund (feeder fund), so far no success was granted but the Sub-Fund awaits feedback in the next coming years. As such, amounts will be recorded, where applicable, on a cash basis under the caption "Other Income".

Note 14 - Cross Sub-Fund investments

At the date of the financial statements, the following Sub-Fund invested in the Sub-Fund as described below:

Sub-fund	Description	Currency	Quantity	Market value	% of total
					net assets
CARNEGIE Fonder Portfolio -	Carnegie Fonder Portfolio	SEK	381,091.811000	162,950,132.85	12.67%
CARNEGIE Total	Corporate Bond 3 SEK Cap				
CARNEGIE Fonder Portfolio -	Carnegie Fonder Portfolio High	SEK	1,548,940.167338	176,064,156.47	13.69%
CARNEGIE Total	Yield Select 3 SEK Cap

CARNEGIE Total Plus	Corporate Bond 3 SEK Cap				
CARNEGIE Fonder Portfolio -	Carnegie Fonder Portfolio High	SEK	13,196.137028	1,499,971.91	6.97%
CARNEGIE Total Plus	Yield Select 3 SEK Cap				

For the Sub-Fund CARNEGIE Fonder Portfolio - CARNEGIE Total the amount of SEK 339,014,289.32 is not excluded of the caption "Securities portfolio at market value" in the combined statement of net assets. The amount of SEK 933,144,662.55 represents the securities holding without the cross investments.

CARNEGIE Fonder Portfolio - CARNEGIE Total Plus the amount of SEK 2,842,799.65 is not excluded of the caption "Securities portfolio at market value" in the combined statement of net assets. The amount of SEK 18,213,663.69 represents the securities holding without the cross investments.

As per art 181(8) of the amended 2010 Law relating to Undertakings for Collective Investment, the management fees detailed in note 3 are not applied to the net assets values invested in the above Sub-Funds.

Note 15 - Changes in the investment portfolio

The statement of changes in the investment portfolio for the reporting period is available free of charge upon request from the registered office of the Company and from the Swiss Representative.

Note 16 - Bonds in default of payment/failed coupon payments

Notes to the financial statements (continued)

as at 31st December 2020

Note 17 - Events

On 2nd January 2020, the Depositary and Paying Agent in Luxembourg of the Company, Skandinaviska Enskilda Banken S.A., transformed into the Luxembourg branch of its parent company, Skandinaviska Enskilda Banken AB (publ). This cross-border merger was done by way of absorption between Skandinaviska Enskilda Banken S.A. and Skandinaviska Enskilda Banken AB (publ).

Covid-19

During the reporting period there was a development of the COVID-19 outbreak across the world, at present it is not possible to assess a detailed impact of the emerging risk on the investments of the Company, but there is growing concern about the impact on the economy worldwide.

There has been a significant correction in the financial markets especially at the begin of the pandemic in March 2020.

Following the market conditions, the poor transparency of market prices for significant investments of the Fund, the Board of Directors has, on 20th March 2020, decided to suspend the subscriptions and the redemptions. This has been communicated and agreed by the relevant supervisory authority. All portfolios and all holdings were reviewed to ensure the correct valuation of the portfolios and on Monday, 23rd March 2020, the funds were opened for trading.

However, FundRock Management Company is of the opinion that these events do not impact the financial statements as of 31st December 2020, nor do they present any issues with regards to the going concerns of the Company.

The Board of Directors is in line with the Management Company.

Note 18 - Subsequent events

On 12th February 2021, following regulatory approval by the Commission de Surveillance du Secteur Financier (the "CSSF") in Luxembourg, Apex Group Ltd. became the ultimate controlling shareholder of FundRock Management Company S.A and FundRock Management Company S.A is as of this date a subsidiary of Apex Group Ltd.

FundRock Management Company S.A has not changed its name or its operations.

Additional information (unaudited)

as at 31st December 2020

1 - Risk management

As required by Circular CSSF 11/512 as amended, the Board of Directors of the Company needs to determine the global risk exposure of the Company by applying either the commitment approach or the VaR ("Value at Risk") approach.

The Board of Directors of the Company decided to adopt the commitment approach as a method of determining the global exposure.

2 - Remuneration disclosure

2.1. Remuneration of the Management Company

FundRock Management Company S.A. ("FundRock") has established and applies a remuneration policy in accordance with the ESMA Guidelines on sound remuneration policies under the UCITS V Directive (ESMA 2016/575) and AIFMD (ESMA 2016/579) and any related legal & regulatory provisions applicable in Luxembourg. The remuneration policy is aligned with the business strategy, objectives, values and interests of the Management Company and the Funds that it manages and of the investors in such Funds, and which includes, *inter alia*, measures to avoid conflicts of interest; and it is consistent with and promotes sound and effective risk management and does not encourage risk taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Funds that the Management Company manages.

As an independent management company relying on a full-delegation model (i.e. delegation of the collective portfolio management function), FundRock ensures that its remuneration policy adequately reflects the predominance of its oversight activity within its core activities. As such, it should be noted that FundRock's employees who are identified as risk-takers under UCITS V are not remunerated based on the performance of the funds under management.

A paper version of the remuneration policy is made available free of charge to investors at FundRock's registered office.

The amount of remuneration for the financial year ending 31st December 2020 paid by FundRock to its staff: EUR 12.070.862

Fixed remuneration: EUR 11,288,396 Variable remuneration: EUR 782,466

Number of beneficiaries: 133

The aggregated amount of remuneration for the financial year ending 31st December 2020 paid by FundRock to Identified staff/risk takers is EUR 1,948,900.

The total amount of remuneration is based on a combination of the assessment of the performance of the individual, the overall results of FundRock, and when assessing individual performance, financial as well as non-financial criteria are taken into account.

The Policy is subject to annual review by the Compliance Officer and the update is performed by HR department of FundRock and is presented for review to the Remuneration Committee and approval by the Board of FundRock.

Additional information (unaudited) (continued)

as at 31st December 2020
