#### Report from the Investment Manager

#### CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund (feeder fund) (hereafter the Sub-Fund)

CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund (the Sub-Fund) is a feeder fund that invests its capital in a master fund, Carnegie Strategifond. The management the funds is thus identical.

#### Performance

Performance was weak in the Nordic equity and corporate bond markets in 2022, due mainly to higher interest rates in response to steep increases in the inflation rate. Increased interest rates are expected to have adverse impact on the economy and the current market assessment is that there is relatively high risk of recession in the near future. There was a moderate recovery in the last quarter of the year, mainly in the equity markets. The Sub-Fund's equity holdings generally posted downturns during the year. With return of about 20%, Sampo was the exception. Some of the Sub-Fund's forestry and banking equities also rose, albeit marginally. Consequent upon growing credit margins, most of the Sub-Fund's corporate bond holdings also experienced minor decreases in value. Net flows during the period amounted to SEK -30 million. Assets under management at 31st December 2022 were SEK 402 million. Negative value growth in the Sub-Fund was -10.6 %

#### Fund management

According to the investment strategy for Strategifonden, the Sub-Fund invests its assets in Nordic securities that deliver high dividend yield, which can be comprised of both share dividends and bond coupons. The equity portion varied between 55% and 65% in 2022. The Sub-Fund reduced the relatively high cash component at the beginning of the year and increased the equity component in particular, but also the bond component. At the end of the year, the equity component was about 63%.

New equity holdings include Alfa Laval, Getinge and Ericsson. The buys were financed by selling stakes in Orkla, Kinnevik, Dometic and Telia, among else. The lack of confidence in Ericsson is certainly palpable, but is reflected in a very low valuation. The company is also relatively unaffected by the economy. Alfa Laval's operations include manufacturing heat exchangers and separators, products used to heat, cool and separate fluids. Getinge is a leading supplier of equipment and single-use supplies to hospitals and the healthcare sector.

As a result of interest rate upturns, fixed rate bonds from stable Investment Grade companies are now yielding 4-5% a year at low interest rate risk because the time to maturity is only 1-3 years. The Sub-Fund has therefore bought bonds from Lundbergs and Industrivärden for example, with annual yield of about 4%. The Sub-Fund has increased the share of subordinated bank bonds (AT1 bonds), primarily in Handelsbanken and DNB, which generate annual bond yield of 6-7%. The Sub-Fund reduced the share of Nordic High Yield bonds both through sales and through a number of corporate events, where Ice Group, Boreal and Mercell were bought out and subsequently early redeemed their bonds at attractive premiums.

#### Derivatives trading, etc.

The commitment approach is applied as the risk assessment method to calculate the total exposure of the Sub-Fund. Pledged collateral at 31st December amounted to SEK 3,202.90.

#### Outlook

Our opinion is that a portfolio composed of stable shares that distribute good dividends and corporate bonds creates favourable conditions for good long-term value growth at relatively low risk. From the short-term perspective, the current high rate of inflation worldwide is causing problems. Most central banks have raised interest rates to subdue demand and the rate of inflation. Lower inflation entails potential for an upward valuation of risk assets and thus the Sub-Fund. Otherwise, the markets are likely to continue demonstrating a high level of uncertainty.

#### Report from the Investment Manager (continued)

#### **CARNEGIE Fonder Portfolio - CARNEGIE Corporate Bond (hereafter the Sub-Fund)**

Are you interested in a fixed-income investment with somewhat higher risk, but greater potential for return? CARNEGIE Fonder Portfolio - CARNEGIE Corporate Bond extends long-term loans to Swedish and Nordic companies and receives recurring interest in return. CARNEGIE Fonder Portfolio - CARNEGIE Corporate Bond is focused on bonds issued by companies in the Nordic region. They might be Finnish forest companies, Norwegian shipping companies, or Swedish industrial companies. Nordic companies are often well managed, have good market positions and publish reliable information. All holdings in foreign currencies are hedged against SEK to eliminate currency risk to unitholders.

#### Performance

The past year boils down to war, inflation and volatility and we are happy to consign 2022 to the past. The year was off to a weak start in the wake of geopolitical tensions and significant interest movements following hawkish communication from central banks. In February, Russia invaded Ukraine, bringing a humanitarian disaster and impact on the financial markets. Although some form of relief came shortly thereafter in terms of risk appetite, we saw clear signals of rising inflation, which also pushed energy and commodities prices up.

A certain level of anxiety about the impact of interest rate hikes on economic growth developed in pace with rising inflation, and credit margins rose during the summer to levels we have not seen since the pandemic. The autumn was somewhat stronger and we saw credit margins fall again to end the year at levels nearly double those at the beginning of the year.

In spite of volatile markets and high inflationary pressure, corporate quarterly reports were generally stable, and they withstood the higher cost pressure relatively well. A stand-out on the down side is the real estate sector, which has seen shrinking financing opportunities and runaway financing costs. Pricing in the credit market was affected thereafter and we saw the value of individual names and credits cut in half, which we thought was somewhat premature in some cases.

Considering the sentiment, activity in the primary market was generally low during the year, particularly for High Yield and property companies. On the other hand, the stable and well-known companies in Investment Grade had access to the market, albeit at higher interest levels, which we have considered highly attractive.

2022 was a painful year for investors in risk assets and credits. As the increases in both credit margins and interest rates were so substantial, returns were affected accordingly. It is important to note that the Nordic market has been a winner in this tumble dryer of a market. Thanks to the unique element of a large proportion of floating-rate coupons combined with relatively short credit maturities that counteracted the major hits from market movements, the Nordic region nevertheless took first, second and third place for 2022.

#### Fund management

2022 was a year when a large share of portfolio holdings were traded down due to the market trend. The real estate sector was hit hard during the year and was the single largest negative contributor. It is wise to remember here that the sector suffered in terms of price mainly due to liquidity concerns and refinancing risks, rather than anxiety about the credit risk. The Sub-Fund has always focused on the large property companies with quality assets and multiple sources of financing, which has proven to be a good strategy, as these companies have recently also been able to bring in capital through share issues and property disposals aimed at repaying a portion of outstanding debt. As a result, one holding in the real estate sector, Balder, was among the largest positive contributors to the Sub-Fund for the year.

We saw several buyouts during the year of numerous companies held in the Sub-Fund's portfolio, which was a major positive contributor to return. As we saw high risk of volatility, considering how the year began, we reduced both interest duration and time to maturity. Both the short interest duration and time to maturity thus mitigated the major hits from market volatility and were thus a large positive contributor to return.

We have continued our journey towards focusing on defensive companies and sectors, which is becoming increasingly important in pace with expectations of a weaker economy. The Sub-Fund's largest exposures in the

#### Report from the Investment Manager (continued)

form of the top-ten list of holdings consist mainly of telecoms, banking, insurance and service, which contributes to long-term stability. As usual, we prefer a diversified portfolio with a wide range of holdings and bonds/maturities to keep credit risk down and liquidity high at the portfolio level.

Nordic Cross Total Return Bond was merged into the portfolio during the year, with fund assets of about SEK 300 million and holdings that matched the Sub-Fund's existing exposure relatively well.

Due to the generally weak risk appetite that prevailed in 2022, Sub-Fund performance ended at -6.2% for the year. Net flow to the Sub-Fund during the year amounted to SEK -5,692 million and as-sets under management at year-end were SEK 10,183 million.

#### Derivatives trading, etc.

The commitment approach is applied as the risk assessment method to calculate the total expo-sure of the Sub-Fund. Pledged collateral at 31st December amounted to SEK 160,524,071.23.

#### **OUTLOOK**

As the economy is expected to weaken and the central banks are indicating that interest rates will remain high for quite some time, there is going to be high risk of volatility in 2023 as well. In addition, there is risk that poorer consumer confidence will show up sooner or later in corporate financial reports. But thanks to higher interest rates and credit margins, the asset class has be-come more attractive than it has been in a long time, which also creates entirely different conditions for 2023. We remain committed to our conservative approach with a balanced and diversified portfolio with focus on liquidity.

#### <u>CARNEGIE Fonder Portfolio - CARNEGIE Total (hereafter the Sub-Fund)</u>

CARNEGIE Fonder Portfolio - CARNEGIE Total is a mixed Sub-Fund that invests in some of Carnegie Fonder's most successful funds. CARNEGIE Fonder Portfolio - CARNEGIE Total holds both equity funds and fixed income funds, providing good risk diversification. The Sub-Fund is composed of 60% equity funds and 40% fixed income funds. This is an internationally proven model. CARNEGIE Fonder Portfolio - CARNEGIE Total\_is actively managed by an experienced investment team and the goal is to be the most attractive solution for long-term investments, such as in retirement savings, in all conditions.

#### Performance

It has been a turbulent year. Reflecting intense geopolitical anxiety and rising inflation, volatility has been high in world stock exchanges. The Russian invasion of Ukraine has caused major fluctuations in the commodities market. The war has caused grave difficulties for the European countries that have made themselves dependent upon Russian oil and gas. Component shortage and supply chain disruptions contributed to higher prices and lower production. Central banks all over the world instituted major interest rate hikes in the attempt to fight inflation. The global index (MSCI World TR) declined by 18% in 2022 and the US equity market (S&P 500) demonstrated a 20% downturn in local currencies for the same period. Performance was even worse for the Swedish stock exchange, which fell back by 23% (SIXRX). The trend was also negative in the credit market during the period. Credits have been affected by inflation and recession anxiety, which brought rising credit spreads during the period.

CARNEGIE Fonder Portfolio - CARNEGIE Total fell by -12.0% in 2022. Net flows to the Sub-Fund during the year amounted to SEK -195 million and assets under management at year-end were SEK 1 billion.

#### **Fund management**

CARNEGIE Fonder Portfolio - CARNEGIE Total is a mixed fund (fund of funds) that invests in a selection of Carnegie Fonder's most successful funds. These include Carnegie Sverigefond, Carnegie Global Quality Companies and Carnegie High Yield Select.

#### Report from the Investment Manager (continued)

The Carnegie Fonder family of funds is augmented by a selection of C WorldWide funds. All funds in CARNEGIE Fonder Portfolio - CARNEGIE Total are long-term and actively managed. The strategic allocation is 60% equities and 40% fixed income. The emphasis on equities generates good long-term potential, while the fixed income funds can act as shock absorbers in uncertain times. The fixed income proportion of CARNEGIE Fonder Portfolio - CARNEGIE Total comprises mainly corporate bonds that have better potential to generate returns relative to low yield government bonds. Tactical allocation is ongoing through adjustments within the equity and fixed interest components. Adjustments in the Sub-Fund are decided by the fund manager with the support of the investment team. The structure of CARNEGIE Fonder Portfolio - CARNEGIE Total enables diversified fund savings in actively managed funds with a good history and a competitive ongoing charge. CARNEGIE Fonder Portfolio - CARNEGIE Total thus consists of tried and true funds managed by tried and true managers according to a tried and true model. Corrections in the market happen now and then, but our focus is on achieving good risk-adjusted return over the long term.

We maintain the risk level and return profile by continuously rebalancing weights among the asset classes in the Sub-Fund. Government rates have moved from zero to today's considerably more attractive levels. We prefer corporate bonds, even though the risk is higher. We also prefer a relatively short interest rate duration to mitigate sensitivity and shield the Sub-Fund against rising rates. We gradually increased the High Yield component of the fixed income portfolio during the year.

Within the equity component, we sold the stake in Rysslandsfonden during the period. On several occasions, we reduced the weight in the Sub-Fund due to the increasingly belligerent tone coming out of Russia and sold the last units in February. In its place, we have increased our stake in Carnegie Listed Infrastructure, a Carnegie Indienfond and Carnegie Global Quality Small Cap came in as new holdings during the year.

We have reduced the exposure to C Worldwide Global Equities Ethical and instead increased the holding in Carnegie Global Quality Companies. Carnegie GQC makes long-term investments in some of the best quality companies in the world, with strong market positions and established brands.

Carnegie Listed Infrastructure and Carnegie Global Quality Companies were among the held equity funds that withstood the downturn best during the period, falling by -5.0% and -6.5% respectively. In the fixed income component, Carnegie Investment Grade delivered the best performance with a downtick of -1.9%. Carnegie High Yield Select also weathered the storm relatively well and fell by -2.7%.

#### Derivatives trading, etc.

The Sub-Fund did not trade in derivatives during the period. Pledged and received collateral at 31st December amounted to SEK 0.

#### **Securities holdings**

At 31st December, the Sub-Fund was 98% invested in underlying funds. The remaining 2% was made up of cash and cash equivalents. Equity funds accounted for 61%.

#### Outlook

On the heels of a historically weak year, uncertainty remains high on world stock exchanges. The Swedish equity market was one of the big losers, dropping by nearly 23% during the year. The year was defined by war and geopolitical unrest combined with high inflation and recession anxiety, which resulted in weak trends in world financial markets. Mixed funds usually come through relatively well in adverse climates, but the trend was negative for all of the major asset classes (equities, bonds and credits) in 2022. As a result of the interest rate upturn, there are now alternatives to equities as an asset class. Profit outlooks have deteriorated and we are seeing a distinct economic slowdown.

The central banks are approaching the final phase of the rate increase cycle and inflation is coming down. Economic outlooks remain uncertain. Analysts are continuing to lower their earnings estimates and macro figures indicate a clear economic cooldown. The war in Ukraine has naturally heightened uncertainty surrounding the national security situation and what we can expect in the future.

#### Report from the Investment Manager (continued)

The economy is moving towards harder times, but this follows a long period of strong growth. The world economy will heal itself this time too, and good buy opportunities are likely to arise for long-term investors during the year.

#### CARNEGIE Fonder Portfolio - CARNEGIE High Yield Select (hereafter the Sub-Fund)

The objective of the Sub-Fund is to generate long-term capital growth by investing primarily in a diversified portfolio of fixed income instruments, mainly comprised of bonds at higher risk issued by companies that are mainly domiciled or operate in the Nordic markets.

#### Performance

Defined mainly by the aftershocks of Covid 19 and the war in Ukraine, 2022 redrew the playing field dramatically compared to what we have seen in recent years. The post-pandemic return to normal is promoting growth and consumption but the war in Ukraine and China's strict Covid policy are causing disruptions in global trade chains, squeezing the supply of finished and input goods. The consequence has been runaway inflation along with steep interest rate hikes that are battering household outlooks as consumer purchasing power erodes alongside steadily falling macroeconomic indicators. The current energy crisis in Europe is adding to the pressure now that energy imports from Russia are to be replaced and several countries are launching government aid for hard-pressed households and businesses. As a result of the end of support purchases by central banks and, by extension, slimming of balance sheets, volatility is increasing as the market's natural demand seeks new equilibrium and the index for European high yield credits has risen from 250 bps at the beginning of the year to swinging between 450 and 700 bps by the end of the year - levels we have not seen since March 2020. On the whole, the year was characterised by rising interest rates, widening spreads and general uncertainty, although certain segments look incredibly attractive, and that spelled TINA twelve months ago has been replaced by TARA-There Are Reasonable Alternatives- and considering that the rate of return has increased from ~7 % to about 12 %, we can only agree.

#### **Fund management**

The year was characterised by the war in Ukraine and companies with exposure to these markets have been hit hard. At the outset, 2022 was shaped by rising market interest rates, which primarily impacted global credits at fixed rates, which for the Sub-Fund meant weak performance for the large capital structures and European traded names. By the end of 2021, we had already initiated action to mechanically lower interest duration in the Sub-Fund to counteract the effect of rising rates, which generally provided a positive contribution. Market focus shifted thereafter to the economy and the knock-on effects of inflation and rising interest rates over the long term. This has resulted in climbing credit margins, which had adverse impact on risk appetite in general and in interest-rate sensitive sectors like real estate in particular. After the ultra-expansionary monetary policy of recent years, the financing environment has certainly become more challenging, but market reactions to interest rate anxiety, tightening monetary policy and the risk of recession have in many cases seemed overblown. The combination results in higher market volatility and we are once again seeing large differences/dislocations between markets, sectors and individual names. The volatility is justified in some cases as companies' credit risk changes de facto when the environment changes, but in several cases the market appears to be pricing sectors instead of companies. In a macroeconomic situation that is hard to predict, credit analysis becomes even more important and the contribution of company-specific events remains the most attractive factor in Sub-Fund return.

Movements in the real estate sector are an example of a situation when the market prices the sector rather than the credit risk in the underlying companies. The market is implicitly expecting property values to drop by close to half, even though several companies have proactively taken advantage of the zero-rate situation to improve their cash conversion cycles and fixed interest terms and have sold assets or issued shares to strengthen the balance sheet. It feels dogmatic to punish all companies equally. We have invested selectively during the year, in the Balder call 2023 for example, when the bond was trading at a discount of 10-20%. The investment paid off when the company announced in December a directed issue to redeem the hybrid, which persuaded the market to close the price gap.

#### Report from the Investment Manager (continued)

We have seen persistently good appetite for corporate transactions in which high-quality companies are bought out or spin off business areas to distil their businesses and bolster the balance sheet. SSG and Ice Group are two examples of companies that announced a change of ownership and consequently redeemed their bonds at a premium, which we found attractive compared to the market price. Arenakoncernen will hopefully be joining the crowd in 2023, as the company has announced a declaration of intent to sell the company in December, after which a potential redemption of its bonds is possible.

Delete announced that it had sold one of its divisions and is redeeming  $\sim 60$  % of the bond at a high premium. The market valued the bond debt at 65 % and thus assigned an implied value of 0 to the remaining part, a business that turns over about SEK 1 billion at a 7-9 % margin. These types of price discrepancies feel disproportionate and the assessment is that they should be corrected within 6-12 months, and that the return contribution should be relatively clear in relation to the risk.

Market volatility has set its stamp on the year and the homogeneous pricing has created a situation in which we once again have excess return embedded in the yield that should be realised upon market normalisation. Return ends at -2.7 % with net flow of SEK -59 million and assets under management at 31 December of SEK 1,386 million.

Effective 1st January 2022, the Sub-Fund is managed by Niklas Edman and Daniel Gustafsson.

#### Derivatives trading, etc.

The Sub-Fund traded in derivatives during the period. The commitment approach is applied as the risk assessment method to calculate the total exposure of the Sub-Fund. Pledged collateral at 31 December amounted to SEK 36,601,580.52.

#### Outlook

In a more uncertain market climate, we are favouring companies where we see a near-term credit trigger in the hope of minimising short-term volatility. We are minimising the risks of rising market interest rates with short interest duration, containing the risk of market volatility by preferring short cash conversion cycles and focusing on credit analysis where we believe you will be compensated well for the risk. We are pleased that the central banks are maintaining their strategy of raising short rates, which increases the rate of return in the portfolio to a corresponding extent now that we are finally receiving a return contribution from the base rate.

#### **CARNEGIE Fonder Portfolio - CARNEGIE Total Plus (hereafter the Sub-Fund)**

CARNEGIE Fonder Portfolio - CARNEGIE Total Plus\_is a global mixed Sub-Fund that invests 80 % in equity funds and 20 % in fixed income funds. The Sub-Fund invests in a selection of Carnegie Fonder's most successful equity and fixed income funds and is augmented with funds from the Carneo Group. All funds in CARNEGIE Fonder Portfolio - CARNEGIE Total Plus are actively managed, which is a prerequisite for responsible investment. The underlying Sub-Funds' fund companies are PRI signatories.

#### Performance

Reflecting intense geopolitical anxiety and rising inflation, volatility has been high in world stock exchanges. The Russian invasion of Ukraine has caused major fluctuations in the commodities market. The war has caused grave difficulties for the European countries that have made themselves dependent upon Russian oil and gas. Component shortage and supply chain disruptions contributed to higher prices and lower production. Central banks all over the world instituted major interest rate hikes in the attempt to fight inflation.

The global index (MSCI World TR) declined by 18% in 2022 and the US equity market (S&P 500) demonstrated a 20% downturn in local currencies for the same period. Performance was even worse for the Swedish stock exchange, which fell back by 23% (SIXRX). The trend was also negative in the credit market during the period. Credits have been affected by inflation and recession anxiety, which brought rising credit spreads during the period.

#### Report from the Investment Manager (continued)

CARNEGIE Fonder Portfolio - CARNEGIE Total Plus fell by -15.3% in 2022. Net flows to the Sub-Fund during the year amounted to SEK -16.2 million and assets under management at year-end were SEK 19.7 million.

#### **Fund management**

CARNEGIE Fonder Portfolio - CARNEGIE Total Plus\_is a mixed Sub-Fund (fund of funds) that invests in a selection of Carnegie Fonder's most successful funds. These include Carnegie Sverigefond, Carnegie Småbolagsfond and Carnegie Corporate Bond. The Carnegie Fonder family of funds is augmented by a selection of C WorldWide funds. All funds in CARNEGIE Fonder Portfolio - CARNEGIE Total Plus are long-term and actively managed. The strategic allocation is 80% equities and 20% fixed income. The emphasis on equities generates good long-term potential, while the fixed income funds can act as shock absorbers in uncertain times. The fixed income component of CARNEGIE Fonder Portfolio - CARNEGIE Total Plus comprises mainly corporate bonds that have better potential to generate returns relative to low yield government bonds.

We maintain the risk level and return profile by continuously rebalancing weights among the asset classes in the Sub-Fund. Government rates have moved from zero to today's considerably more attractive levels. We prefer corporate bonds, even though the risk is higher. We also prefer a relatively short interest rate duration to mitigate sensitivity and shield the Sub-Fund against rising rates.

Within the equity component, we sold the stake in Rysslandsfonden during the period. On several occasions, we reduced the weight in the Sub-Fund due to the increasingly belligerent tone coming out of Russia and sold the last units in late February. In its place, we have increased our stake in Carnegie Listed Infrastructure, a global equity fund that makes long-term investments in companies linked to sustainable infrastructure. Carnegie Indienfond and Carnegie Global Quality Small Cap came in as new holdings during the year.

During the period, we reduced the exposure to C Worldwide Global Equities Ethical and instead increased the holding in Carnegie Global Quality Companies. Carnegie GQC makes long-term investments in some of the best quality companies in the world, with strong market positions and established brands.

Carnegie Listed Infrastructure and Carnegie Global Quality Companies were among the held equity funds that withstood the downturn best during the period, falling by 1.3% and 3.4% respectively. In the fixed income component, Carnegie Investment Grade delivered the best performance with a downtick of 1.9%. Carnegie High Yield Select also weathered the storm relatively well and fell by 2.6%.

#### Derivatives trading, etc.

The Sub-Fund did not trade in derivatives during the period. The Sub-Fund has unit classes in currencies other than SEK, whose exchange rate is hedged to the respective currency. Pledged and received collateral at 31st December amounted to SEK 0.

#### **Securities holdings**

At 31st December, the Sub-Fund was 98% invested in underlying funds. The remaining 2% was made up of cash and cash equivalents. Equity funds accounted for 80%.

#### Outlook

On the heels of a historically weak year, uncertainty remains high on world stock exchanges. The Swedish equity market was one of the big losers, dropping by nearly 23% during the year. The year was defined by war and geopolitical unrest combined with high inflation and recession anxiety, which resulted in weak trends in world financial markets. Mixed funds usually come through relatively well in adverse climates, but the trend was negative for all of the major asset classes (equities, bonds and credits) in 2022. As a result of the interest rate upturn, there are now alternatives to equities as an asset class. Profit outlooks have deteriorated and we are seeing a distinct economic slowdown.

#### Report from the Investment Manager (continued)

The central banks are approaching the final phase of the rate increase cycle and inflation is coming down. Classic negative signals like low PMI figures, rising interest rates and an inverted yield curve have made investors reluctant to take risk. Economic outlooks remain uncertain. Analysts are continuing to lower their earnings estimates and macro figures indicate a clear economic cooldown. However, numerous quality companies are well-prepared for harder times and have strong balance sheets and resilient margins. For investors with a long-term view, good buy opportunities may arise as the market is likely to be volatile during the year. Incremental declines in inflation and interest rate anxiety may support the stock market in 2023. Actions taken by central banks will naturally have significant impact on how the year plays out.

#### **CARNEGIE Fonder Portfolio - CARNEGIE High Yield (hereafter the Sub-Fund)**

CARNEGIE Fonder Portfolio - CARNEGIE High Yield is a credit focused on high yield bonds in the Nordics and Northern Europe. The Sub-fund invests in well-managed companies with strong ESG programmes. By means of hedging currency exposures and maintaining low duration, fund return is determined by investee companies' underlying performance.

#### **Performance**

2022 must be summed up as a tough year in which inflation raised its ugly head after having languished for many years. After years of low inflation and central banks that competed to cut rates and carry out support purchases of securities, we have seen a policy u-turn, where it is getting harder to believe that it will be possible to get inflation under control without causing a serious recession. Europe is also being battered by the war in Ukraine and an energy crisis that is going to take years to resolve. The lockdowns in China are another problem, one that is impacting both the Chinese economy and the production that the entire world depends on.

Like most risk assets, corporate bonds delivered negative performance during the year due to the factors above. We started the year with credit margins of 240 bps in the European High Yield segment (Xover) and a 5 year rate of 0.7 % and ended the year at around 475 bps and 3.3 bps. This explains the heavy going in 2022, but has also altered the future playing field quite a bit, making corporate bonds an increasingly interesting asset class that has historically paid off well. That which was spelled TINA - There Is No Alternative - one year ago has been replaced by TARA – There Are Reasonable Alternatives - as shown also by the Sub-fund's rate of return, which has risen from 5.8 to 9.7 % in one year.

#### **Fund management**

The Sub-fund was classified as an Article 9 ("Dark Green") fund during the period. The change will have no effect on management because the Sub-fund has been managed from the outset according to the Carnegie Fonder framework for Article 9 funds, meaning that investments must contribute to attaining UN Sustainable Development Goals.

As Sub-fund assets increased during the year, the portfolio was expanded and now comprises 65 holdings. Energy, industry and property companies are the largest sectors. We are seeking the widest portfolio composition possible without compromising ESG standards. Renewable energy is very attractive both for our climate and because it is a sector with extremely favourable outlooks, considering the current energy crisis in Europe. There is a relatively good selection of corporate bonds in this segment in the Nordics and we are able to select the companies and verticals we think are most interesting. For example, we prefer companies that own productive energy farms, as well as project developers to a certain extent, but consider installers and service providers less attractive due to delivery problems and cost inflation.

About 80 % of the Sub-fund consists of Nordic companies, which is the primary geographical focus, augmented by the best cases from Europe, aimed at producing the most diversified and liquid portfolio possible. This share of the Sub-fund can vary somewhat depending on relative pricing between Europe and the Nordics.

We are often asked how our ESG focus contributes to fund return. One of our arguments is that sustainable companies are more likely to be attractive M&A targets, which has truly materialised this year. In a market with relatively few M&A transactions, four companies in the portfolio have received bids or sold large segments of the business.

#### Report from the Investment Manager (continued)

This makes a positive contribution to fund return either by lowering the credit risk or through early redemption of bonds at a premium. We are constantly looking for companies that have potential positive triggers as a factor in our research. This applies, for example, to the Sub-fund's largest holding, Alternus, which owns and develops renewable energy. They are in the process of a merger with an American SPAC. The investment involves part of the group with only productive solar power farms with long-term contracts and fixed prices. The bond is secured and has current yield of about 10 % with a potential upside once the merger is completed, through early redemption or improved credit quality when the company brings in new equity. Arenakoncernen, which has received and is currently evaluating a bid from an industrial company, is another example. The company provides training and matching services and has delivered good performance lately, which has lowered its debt. Despite this, it is still yielding almost 10 %. A third example is Autocirc, which disposes of scrapped cars by taking them apart to sell the parts that can be reused and recycles the rest, which is being bought out by Nordic Capital.

The Sub-fund intends to consistently maintain relatively low interest duration to limit interest rate risk. Interest duration at the end of the year was 0.5 years.

Sub-fund return ended at -6.1 % for the year, primarily due to the weak market trend. The real estate sector, which has comprised 15-20 % of the Sub-fund, was the largest negative contributor. Net flow to the Sub-fund during the year amounted to SEK 89 million and Sub-fund assets year-end were SEK 136 million.

#### Derivatives trading, etc.

The commitment approach is applied as the risk assessment method to calculate the total exposure of the Subfund. Pledged collateral at 31st December amounted to SEK 1,409,494.74.

#### Outlook

Expectations that we are heading for recession have pushed up credit margins alongside increases in benchmark rates, which makes underlying return in the Sub-fund look attractive. There is much to indicate that the instability will persist in 2023, but our view is that a time of weaker economic conditions is already priced into credit margins. Over the long term, returns are determined by the performance of the Sub-fund's holdings. As the anxiety relates to the future, at this point it is difficult to determine how all companies will be affected, but we are doing our utmost to select the companies that have the best potential to overcome the challenges ahead, and we believe sustainable business models are an important element of research.

Luxembourg, 2nd March 2023

The Investment Manager

Note: The information in this report represents historical data and is not an indication of future results.

#### **Audit report**

To the Shareholders of CARNEGIE FONDER PORTFOLIO

#### Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of CARNEGIE FONDER PORTFOLIO (the "Fund") and of each of its sub-funds as at 31 December 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 December 2022:
- the statement of investments and other net assets as at 31 December 2022;
- the combined statement of operations and other changes in net assets for the Fund and the statement of operations and other changes in net assets for each of the sub-funds for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

#### **Basis for opinion**

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

#### Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

#### Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
  fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
  evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
  a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
  involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
  control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures
  that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
  effectiveness of the Fund's internal control;

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the
  disclosures, and whether the financial statements represent the underlying transactions and events
  in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

PricewaterhouseCoopers, Société coopérative Represented by

| Finland         | 1.01 %  |
| Total           | 94.87 % |

#### Notes to the financial statements

as at 31st December 2022

#### **Note 1 - General Information**

CARNEGIE Fonder Portfolio (hereafter the "Company") was incorporated in the Grand-Duchy of Luxembourg on 2nd March 1990 under the name of FÖRSTA FONDER. As of 3rd March 1993, the Company's name was HAGSTRÖMER & QVIBERG, since 26th July 2000 it was HQ.SE Portfolio, since 23rd April 2003 it was HQ Portfolio and since 29th June 2011 it is CARNEGIE Fonder Portfolio. It is organised as an open-ended investment company with a variable capital ("Société d'Investissement à Capital Variable" - "SICAV") under Part I of the law of 17th December 2010 (hereafter the "Law 2010") relating to Undertakings for Collective Investment as may be amended from time to time. It is established for an undetermined duration from the date of incorporation.

The Board of Directors of the Company resolved with effect on 2nd November 2017 to create a Master Feeder Structure, as follows:

| Feeder (Luxembourg domiciled fund)                               | Master (Swedish domiciled fund) |
|--|---------------------------------|
| CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund (feeder fund) | Carnegie Strategifond           |

Financial reports of the Company are published annually and semi-annually. These reports, as well as the Sales Prospectus, the Key Information Document ("KID"), the Statutes and all information concerning the Company are available for the Shareholders at the registered office of the Company, the Management Company and the Depositary.

The Financial Statements of Carnegie Strategifond, the Master of CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund (feeder fund) are available at the registered office of Carnegie Fonder AB, its Management Company.

#### Note 2 - Significant accounting policies

### a) Presentation of the financial statements

The financial statements of the Company are established in accordance with the Luxembourg legal and regulatory requirements concerning Undertakings for Collective Investment and with generally accepted accounting principles in Luxembourg. The financial statements of the Company have been prepared on a going concern basis.

In accordance with the prospectus, the last official trading Net Asset Values of the corresponding Sub-Funds have been calculated as at 30th December 2022. Nevertheless, an unofficial Net Asset Value has been calculated for the 31st December 2022 for reporting purpose and is disclosed in these financial statements.

#### b) Valuation

- 1) Securities admitted to official listing on a stock exchange or which are traded on another regulated market which operates regularly and is recognised and open to the public within the EU or the OECD member states are valued on the base of the last known sales price. If the same security is quoted on different markets, the quotation of the main market for this security is used. If there is no relevant quotation or if the quotations are not representative of the fair value, the evaluation is done in good faith by the Board of Directors or its delegate with a view to establishing the probable sales prices for such securities;
- 2) non-listed securities are valued on the base of their probable sales price as determined in good faith by the Board of Directors and its delegate;
- 3) liquid assets are valued at nominal value plus any accrued interest or on an amortised cost basis. Securities valued at amortized cost are recorded at cost value in the statement of investments, amortized interests are recorded as income receivable on portfolio in the statement of net assets. All other assets, where practice allows, are valued in the same manner.

#### Notes to the financial statements (continued)

as at 31st December 2022

Short-term investments that have a remaining maturity of one year or less are valued (i) at market value, or (ii) where market value is not available or not representative, at amortised cost;

- 4) financial instruments which are not traded on the futures exchanges but on a regulated market are valued at their settlement value, as stipulated by the Company's Board of Directors in accordance with generally accepted principles, taking into consideration the principles of proper accounting, the customary practices in line with the market, and the interests of the Shareholders, provided that the above-mentioned principles correspond with generally accepted valuation regulations which can be verified by the auditor;
- 5) swaps are valued on a mark-to-market basis. Net unrealised gain/(loss) is disclosed in the statement of net assets. Net variation of the unrealised gain/(loss) and net realised gain/(loss) are disclosed in the statement of operations and other changes in net assets;
- 6) units or shares of UCI(TS) are valued at the last available Net Asset Value;
- 7) in case of extraordinary circumstances, which make the valuation in accordance with the above-mentioned criteria impossible or improper, the Board of Directors of the Company is authorised to temporarily follow other valuation regulations in good faith and which are according to the verifiable valuation regulations laid down by the auditor in order to achieve a proper valuation of the respective Sub-Fund's assets.

#### c) Net realised gain/(loss) on securities portfolio

The net realised gain/(loss) on securities portfolio is determined on the basis of the average cost of securities and is disclosed in the statement of operations and other changes in net assets.

#### d) Cost of securities

The acquisition cost of a security denominated in a currency other than that of the Sub-Fund is converted to the Sub-Fund's currency at the exchange rate prevailing on the date of purchase.

#### e) Exchange translation

Bank balances, other assets and liabilities and the value of securities held that are denominated in other currencies than the Sub-Fund's reference currency are converted at the prevailing exchange rate of the closing day. Income and expenses incurred in currencies other than the Sub-Fund's reference currency are converted at the prevailing exchange rate of the day of each transaction. Exchange gains or losses are disclosed in the statement of operations and other changes in net assets.

At the date of the financial statements, the prevailing exchange rates on the closing day were as follows:

| 1 | SEK | = | 0.0887505 | CHF | Swiss Franc     |
|---|-----|---|-----------|-----|-----------------|
|   |     |   | 0.6684691 | DKK | Danish Krona    |
|   |     |   | 0.0898935 | EUR | Euro            |
|   |     |   | 0.0797812 | GBP | Pound Sterling  |
|   |     |   | 0.9451127 | NOK | Norwegian Krona |
|   |     |   | 0.0959569 | USD | US Dollar       |

#### f) Combined financial statements

The combined financial statements of the Company are expressed in SEK and are equal to the sum of the corresponding items in the financial statements of each Sub-Fund.

#### g) Formation expenses

Expenses incurred in connection with the establishment of the Company and the creation of the Sub-Funds are amortised over a period of five years.

#### Notes to the financial statements (continued)

as at 31st December 2022

Amortization of formation expenses is included in the item "Other expenses" in the statement of operations and other changes in net assets.

#### h) Investment income

Dividend income is recognised on an ex-dividend basis and is recorded net of withholding tax.

Interest income is accrued on a pro rata temporis basis, net of any withholding tax.

#### i) Other liquid assets

The item "Other liquid assets" disclosed in the statement of net assets is mainly composed of cash accounts held at brokers.

#### j) Receivable / Payable on treasury transactions

The item "Receivable on treasury transactions" comprises maturities of time deposits, new loans, foreign exchange transactions or forward foreign exchange transactions not yet disclosed under the item "Cash at banks".

The item "Payable on treasury transactions" comprises new time deposits, maturities of loans, foreign exchange transactions or forward foreign exchange transactions not yet disclosed under the item "Cash at banks".

At the level of the Sub-Fund, "Receivable and payable on treasury transactions" are disclosed net in the statement of net assets.

#### k) Other receivables / Other liabilities

The items "Other receivables" / "Other liabilities" disclosed in the statement of net assets include margin accounts on futures contracts reflecting to daily value variations.

#### 1) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at prevailing market rates for the remaining period from valuation day to the maturity of the contracts. Net unrealised gain/(loss) is disclosed in the statement of net assets. Net variation of the unrealised gain/(loss) and net realised gain/(loss) are disclosed in the statement of operations and other changes in net assets.

#### m) Futures contracts

Futures contracts are posted off-balance sheet and are valued at the last available price applicable to the asset. Net unrealised gain/(loss) is disclosed in the statement of net assets. Net variation of the unrealised gain/(loss) and net realised gain/(loss) are disclosed in the statement of operations and other changes in net assets.

#### n) Transaction fees

Transaction costs disclosed under the item "Transaction fees" in the expenses of the statement of operations and other changes in net assets are mainly composed of broker fees incurred by the Company relating to purchases or sales of securities, of fees relating to transactions paid to the Depositary and of transaction fees on financial and derivatives instruments.

Transaction costs on bonds are included in the cost of the investments.

#### Notes to the financial statements (continued)

as at 31st December 2022

#### Note 3 - Management fees and Investment management fee

The Management Company is entitled to a fee calculated on a daily basis on the average net assets of the respective Sub-Fund and payable monthly. At the date of the financial statements, the applicable annual fee is max 0.088% p.a. for each Sub-Fund.

In addition to the above fees the Management Company is entitled to be reimbursed out of the assets of the feeder fund for its reasonable out of pocket expenses and disbursements.

The Investment Manager, Carnegie Fonder AB, receives an investment management fee, accrued daily and payable monthly in arears, based on the net assets of the Sub-Fund attributable to each Class of shares.

At the date of the financial statements, the annual fee applicable to each Sub-Fund is as follows:

- for CARNEGIE Fonder Portfolio CARNEGIE Strategy Fund (feeder fund): 1.25% p.a.,
- for CARNEGIE Fonder Portfolio CARNEGIE Total and CARNEGIE Fonder Portfolio CARNEGIE Total Plus: 1.60% p.a.,
- for CARNEGIE Fonder Portfolio CARNEGIE High Yield Select:

For all the Sub-Funds except for CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund (feeder fund) the Investment Manager is entitled to receive a research fee of max 0.04% p.a. of the Sub-Fund's net assets. This fee is payable quarterly in arrears.

The Master Fund Carnegie Strategifond does not charge any share dealing charges, subscription or redemption fees to the feeder fund CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund investing in its shares.

The Master Fund does charge investment management fees to the feeder fund but reimburses these fees fully to the feeder fund (see Note 6).

The management and the investment management fees are included in the item "Management fees" in the statement of operations and other changes in net assets.

#### Note 4 - Performance fee

The Sub-Fund CARNEGIE Fonder Portfolio - CARNEGIE High Yield Select may also pay a performance fee to the Investment Manager.

Performance fee of 20% over the hurdle rate of STIBOR 90 days (STIBOR floor of 0) + 2%. The maximum investment management fee and performance fee set to 2% (not including potential other charges for example (but not limited to) tax, audit, custody fee etc.) over the current financial year with high water mark. The high water mark will not be reset.

#### Notes to the financial statements (continued)

as at 31st December 2022

The Performance Fee is calculated after all other fees have been accrued, and it is calculated daily and drawn from the Sub-Fund on a collective basis. The accrued Performance Fee is crystallised over the financial year and paid to the Investment Manager annually in arrears. Any Performance Fee calculated on redemption proceeds is crystallised daily and paid annually in arrears. The Performance Fee calculation is adjusted when there are subscriptions to avoid any artificial performance fee.

The Sub-Fund CARNEGIE Fonder Portfolio - CARNEGIE High Yield may also pay a performance fee to the Investment Manager.

Performance fee of 20% over the hurdle rate of STIBOR 90 days (STIBOR floor of 0) + 1.5%. The maximum investment management fee and performance fee set to 1.5% (not including potential other charges for example (but not limited to) tax, audit, custody fee etc.) over the current financial year with high water mark. The high water mark will not be reset.

The Performance Fee is calculated after all other fees have been accrued and it is calculated daily and drawn from the Sub-Fund on a collective basis. The accrued Performance Fee is crystallised over the financial year and paid to the Investment Manager annually in arrears at the end of the year. Any Performance Fee calculated on redemption proceeds is crystallised daily and paid annually in arrears. The performance fee calculation is adjusted when there are subscriptions, to avoid any artificial performance fee.

At the date of the financial statements, a performance fee was due for the following Sub-Funds and amounted to:

| Sub-Fund   | Share class          | Performance fee amount<br>in Sub-Fund currency | Performance<br>fee ratio in %<br>of average<br>total net assets |
|--|----------------------|--|---|

As explained in the following note "management fee retrocessions" management fee retrocessions are received in relation to investments in target funds. For CARNEGIE Fonder Portfolio - CARNEGIE Total and CARNEGIE Fonder Portfolio - CARNEGIE Total Plus the retrocessions received reduce the effective management fee charged by target funds.

#### Note 6 - Management fees retrocessions

Management fees retrocessions received by the Company and related to its investments in UCITS or other UCIs are disclosed under the "Other commissions received" in the statement of operations and other changes in net assets.

#### Note 7 - Depositary fees

The remuneration for depositary services are included in the item "Depositary fees" disclosed in the statement of operations and other changes in net assets.

### Note 8 - Subscription duty ("Taxe d'abonnement")

The Company is governed by Luxembourg law.

Pursuant to the legislation and regulations which are prevailing, the Company is subject to an annual subscription duty ("taxe d'abonnement") of 0.05% which is payable quarterly and calculated on the basis of the net assets of each Sub-Fund on the last day of each quarter.

According to Article 175 (a) of the amended law of 17th December 2010 the net assets invested in Undertakings for Collective Investments already subject to the "taxe d'abonnement" are exempt from this tax.

#### **Note 9 - Swing Pricing**

The Net Asset Value may be adjusted by a swing pricing mechanism as the Board of Directors may deem appropriate, based on the prevailing market conditions and the level of subscriptions or redemptions requested by shareholders or potential shareholders in relation to the size of the relevant portfolio, to reflect inter alia any dealing charges, including any dealing spreads, fiscal charges and potential market impact resulting from the shareholder transactions, when the total capital activity (aggregate of inflows and outflows) at a Sub-Fund level exceeds a predetermined threshold, as determined as a percentage of the net assets of that Sub-Fund for the Valuation Day (the "Swing Pricing").

#### Notes to the financial statements (continued)

as at 31st December 2022

Sub-Funds can operate a full swing pricing mechanism where the threshold is set to zero or a partial swing pricing mechanism where the threshold is greater than zero. Such adjustment can vary over time but will not exceed 2% of the applicable Net Asset Value (the "Swing Factor").

At the date of the financial statements, no Swing Pricing was applied to the Net Asset Value for the Sub-Funds.

#### Note 10 - Feeder Fund - Master Fund Structure

The Sub-Fund CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund (feeder fund) is a feeder of the Swedish UCITS Carnegie Strategifond (master fund).

Carnegie Strategifond is a UCITS fund registered with the Swedish Act on Investment Funds (2004:46). The Feeder will at all times invest at least 85% of its assets into the Master. The objective of the Feeder is to invest in Carnegie Strategifond. The Feeder will exclusively invest in share class A of the Master (ISIN SE0000429813).

The Financial Statements of Carnegie Strategifond, the Master of CARNEGIE Fonder Portfolio - CARNEGIE Strategy Fund (feeder fund) are available at the registered office of Carnegie Fonder AB, its Management Company.

The information sharing agreement between the Master and the Feeder, the information and cooperation agreement between the depositary of the Master and the depositary of the Feeder and the information sharing agreement between the auditor of the Master and of the Feeder and further information such as the Prospectus, the KID and the annual and semi-annual reports of the Master are available upon request at the registered office of the Company.

At the date of the financial statements, the management fee charged by the Master Fund for the share class A is 1.50%.

As explained in Note 3 and 6 this fee is retroceded to the Feeder fund.

At the date of the financial statements, the Feeder Fund holds 2.24% of the shares of the share class A of the Master Fund.

#### Note 11 - Forward foreign exchange contracts

At the date of the financial statements, the following Sub-Funds of the Company are committed in the following forward foreign exchange contracts.

| Currency             | Purchases                   | Currency              | Sales                  | Maturity      | Unrealised result<br>(in SEK) |

#### Notes to the financial statements (continued)

as at 31st December 2022

#### **Note 15 - Cross Sub-Fund investments**

At the date of the financial statements, the following Sub-Fund invested in the Sub-Fund as described below:

| Sub-Fund   | Description  | Currency | Quantity     | Market value   | % of total net assets |
|--|--|----------|--------------|----------------|-----------------------|
| CARNEGIE Fonder Portfolio -<br>CARNEGIE Total      | Carnegie Fonder Portfolio<br>Corporate Bond 3 SEK Cap    | SEK      | 157,049.81   | 65,245,888.54  | 6.51%                 |
| CARNEGIE Fonder Portfolio -<br>CARNEGIE Total      | Carnegie Fonder Portfolio High<br>Yield 3 Cap            | SEK      | 322,202.58   | 30,604,540.94  | 3.05%                 |
| CARNEGIE Fonder Portfolio -<br>CARNEGIE Total      | Carnegie Fonder Portfolio High<br>Yield Select 3 SEK Cap | SEK      | 1,204,262.17 | 150,629,473.17 | 15.03%                |
| CARNEGIE Fonder Portfolio -<br>CARNEGIE Total Plus | Carnegie Fonder Portfolio<br>Corporate Bond 3 SEK Cap    | SEK      | 1,555.73     | 646,325.18     | 3.29%                 |
| CARNEGIE Fonder Portfolio -<br>CARNEGIE Total Plus | Carnegie Fonder Portfolio High<br>Yield 3 Cap            | SEK      | 14,226.32    | 1,351,292.73   | 6.88%                 |
| CARNEGIE Fonder Portfolio -<br>CARNEGIE Total Plus | Carnegie Fonder Portfolio High<br>Yield Select 3 SEK Cap | SEK      | 9,395.07     | 1,175,138.42   | 5.98%                 |

For the Sub-Fund CARNEGIE Fonder Portfolio - CARNEGIE Total the amount of SEK 246,479,902.65 is not excluded of the item "Securities portfolio at market value" in the combined statement of net assets. The amount of SEK 737,887,575.21 represents the securities holding without the cross investments.

For the Sub-Fund CARNEGIE Fonder Portfolio - CARNEGIE Total Plus the amount of SEK 3,172,756.33 is not excluded of the item "Securities portfolio at market value" in the combined statement of net assets. The amount of SEK 16,086,292.85 represents the securities holding without the cross investments.

Total combined NAV at year ended without all cross investments would amount to SEK 12,878,925,311.52.

As per art 181(8) of the amended 2010 Law relating to Undertakings for Collective Investment, the management fees detailed in note 3 are not applied to the net assets values invested in the above Sub-Funds.

#### Note 16 - Changes in the investment portfolio

The statement of changes in the investment portfolio for the reporting period is available free of charge upon request from the registered office of the Company and from the Swiss Representative.

#### Note 17 - Events

The Shareholders were informed by Notice to the shareholders dated 23rd December 2021 that the Sub-Funds have the option to utilize Swing Pricing as of 1st January 2022.

Effective as of 14th June 2022, the Sub-Fund CARNEGIE Fonder Portfolio - CARNEGIE High Yield does no longer qualify as an Article 8 financial product under SFDR, but as an Article 9 financial product.

The Board of Directors informed by Notice to the shareholders dated 23th August 2022 of the merger between SEB PRIME SOLUTIONS - Nordic Cross Total Return Bond Fund and CARNEGIE Fonder Portfolio - CARNEGIE Corporate Bond as at 3rd October 2022. The last Net Asset Value before merger was calculated as at 30th September 2022.

| Merging Sub-Fund                         | Receiving Sub-Fund                             |
|--|--|
| SEB PRIME SOLUTIONS - Nordic Cross Total | Carnegie Fonder Portfolio - Carnegie Corporate |
| Return Bond Fund                         | Bond   |

All the expenses and costs incurred in the Merger will be borne by Carnegie Fonder AB who is acting as investment manager of the Receiving Sub-Fund.

#### Notes to the financial statements (continued)

as at 31st December 2022

#### **Note 18 - Subsequent events**

Xavier Parain resigned from the Board of Directors of the Management Company on 10th February 2023 and no other director was appointed.

The Board of Directors of the Company informed by Notice to the shareholders dated 15th March 2023 of the merger between CARNEGIE Fonder Portfolio - CARNEGIE Total Plus and CARNEGIE Fonder Portfolio - CARNEGIE Total as at 26th April 2023 (effective date):

Merging Sub-Fund

Receiving Sub-Fund

CARNEGIE Fonder Portfolio - CARNEGIE Total Plus

CARNEGIE Fonder Portfolio - CARNEGIE Total

#### **Expectations regarding future performance**

The Company's financial performance is largely dependent on equity market trends, particularly in Sweden. In recent years, however, fixed income securities have become a significant component of assets under management and there is thus less dependence on the equity market. The Company will have several products in alternative asset classes in 2023. In the long run, these will mitigate dependence on individual markets and further diversify the Company's income streams. Based on the size of assets under management at 1st January 2023, income can be expected to be on par with 2022.

The war, higher interest rate levels and rising inflation reduced investor risk tolerance, which led to sagging equity markets. The prerequisites for favourable trends in the equity and credit markets exist, but uncertainty has lingered since the turn of the year. The Company aims to increase assets under management and the Company's market share in the Swedish funds market by achieving positive management results and attracting new investors to the funds. Sales are carried out primarily in-house, as well as via distributors in Sweden and selected foreign markets. Economic and geopolitical outlooks remain uncertain and the challenges we are facing should not be underestimated.

#### Additional information (unaudited)

as at 31st December 2022

#### 1 - Risk management

As required by Circular CSSF 11/512 as amended, the Board of Directors of the Company needs to determine the global risk exposure of the Company by applying either the commitment approach or the VaR ("Value at Risk") approach.

The Board of Directors of the Company decided to adopt the commitment approach as a method of determining the global exposure.

#### 2 - Remuneration disclosure

#### 2.1. Remuneration of the Management Company

FundRock Management Company S.A. ("FundRock") as subject to CSSF Circular 18/698 has implemented a remuneration policy in compliance with Articles 111a and 111b of the 2010 Law and/or Article 12 of the 2013 Law respectively.

FundRock as subject to Chapter 15 of the 2010 Law and AIFM must also comply with the guidelines of the European Securities and Markets Authority ESMA/2016/5758 and ESMA/2016/5799 to have sound processes in place. Fundrock has established and applies a remuneration policy in accordance with the ESMA Guidelines on sound remuneration policies under the UCITS V Directive (ESMA 2016/575) and AIFMD (ESMA 2016/579) and any related legal & regulatory provisions applicable in Luxembourg.

Further, consideration has been given to the requirements as outlined in Regulation (EU) 2019/2088 on sustainability - related disclosures in the financial sector, the SFDR Requirements.

The remuneration policy is aligned with the business strategy, objectives, values and interests of FundRock and the Funds that it manages and of the investors in such Funds, and which includes, inter alia, measures to avoid conflicts of interest; and it is consistent with and promotes sound and effective risk management and does not encourage risk taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Funds that the Management Company manages.

FundRock ensures that its remuneration policy adequately reflects the predominance of its oversight activity within its core activities. As such, it should be noted that FundRock's employees who are identified as risk-takers are not remunerated based on the performance of the funds under management.

A paper version of the remuneration policy is made available free of charge to investors at FundRock's registered office. FundRock's remuneration policy can also be found at: https://www.fundrock.com/policies-and-compliance/remuneration-policy/

ntips://www.fundrock.com/poncies-and-compnance/remuneration-poncy/

The total amount of remuneration for the financial year ending 31 December 2022 paid by FundRock to its staff: EUR 12,587,217

Fixed remuneration: EUR 11,485,489 Variable remuneration: EUR 1,101,728

Number of beneficiaries: 147

The aggregated amount of remuneration for the financial year ending 31 December 2022 paid by FundRock to Identified staff/risk takers is EUR 2,524,731

The total amount of remuneration is based on a combination of the assessment of the performance of the individual, the overall results of FundRock, and when assessing individual performance, financial as well as non-financial criteria are taken into account.

The Policy is subject to annual review by the Compliance Officer and the update is performed by HR department of FundRock and is presented for review to the Remuneration Committee and approval by the Board of FundRock.

#### Additional information (unaudited) (continued)

as at 31st December 2022

#### 2.2. Remuneration of the Investment Manager

The remuneration to Carnegie Fonder AB, Stockholm for the period from 1st January 2022 till 31st December 2022:

Number of employees: 68

Total compensation to staff: TSEK 141,160

Of which compensation to management: TSEK 17,966

# 3 - Information concerning the transparency of securities financing transactions and of reuse of cash collateral (regulation EU 2015/2365, hereafter "SFTR")

During the reporting period, the Company did not engage in transactions which are subject to the publication requirements of SFTR. Accordingly, no information concerning the transparency of securities financing transactions and of reuse of cash collateral should be reported.

# 4 - Information related to the EU Regulations 2019/2088 and of the Council of 27th November 2019 on sustainability -related disclosures in the financial services sector (hereafter "SFDR")

In accordance with these Regulations, it is noted that:

- for the Sub-Funds:
  - CARNEGIE Fonder Portfolio CARNEGIE Strategy Fund (feeder fund),
  - CARNEGIE Fonder Portfolio CARNEGIE Corporate Bond,
  - CARNEGIE Fonder Portfolio CARNEGIE Total,
  - CARNEGIE Fonder Portfolio CARNEGIE High Yield Select,
  - CARNEGIE Fonder Portfolio CARNEGIE Total Plus,

referenced under Article 8, the (unaudited) RTS annex is presented on the pages hereafter.

- and that for the Sub-Fund CARNEGIE Fonder Portfolio - CARNEGIE High Yield, referred to under article 9, the (unaudited) RTS annex is presented on the pages hereafter.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Carnegie Strategy Fund

Legal entity identifier: 529900S1O4GRNC0QMA70

# **Environmental and/or social characteristics**

#### Did this financial product have a sustainable investment objective? Yes No It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that 59.9% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: \_\_\_%

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

Carnegie Strategy ("the fund") is a feeder fund, which means that the fund's only investment is in units in another fund - a target fund - which in this case is Carnegie Strategi (the "target fund"). The fund's promotion of environmental and social characteristics is thus equivalent to that of the target fund. The fund promoted the characteristics below, which were measured using sustainability indicators.

 The target fund's investments promoted attainment of global commitments and targets such as the Paris Agreement and the UN Agenda 2030 through the investee company's enabling activities and/or transitional activities.

1 Full year report

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- The target fund also promoted higher standards and good practices of general performance in E and S by investee companies through:
  - o Careful analysis of every holding from an ESG perspective prior to investing
  - Excluding companies that do not meet the standards
  - Influencing holdings in the right direction as regards E and S.
  - The target fund also promoted high standards of governance through Carnegie Fonder's policies and procedures related to governance.

### How did the sustainability indicators perform?

The performance of the target fund's sustainability indicators was as follows.

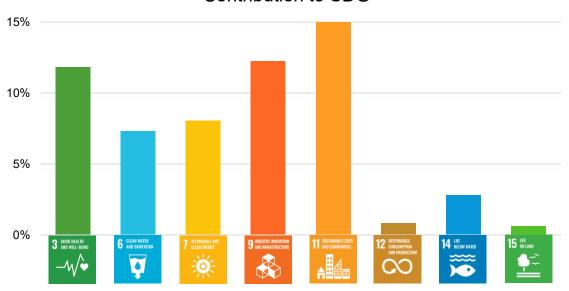

| Sustainability indicators  | Outcome 31 December 2022   |  |  |
|--|--|--|--|
| 1. Share of fund assets invested in economic activities or credits issued by economic activities for which at least 25% of turnover contributes to at least one SDG.   | The share of fund assets invested in these economic activities was 56.3%.  |  |  |
| 2. Share of fund assets invested in green, social, sustainable and sustainability-linked bonds.  | 3.3% of fund assets were invested in green bonds and 0.3% in social bonds.   |  |  |
| 3. Share of fund assets invested in companies or credits issued by companies whose turnover is aligned with the environmental objectives "climate change mitigation" and "climate change adaptation" in the EU Taxonomy. | The fund's total reported Taxonomy-alignment was 2%. At present, Carnegie Fonder has chosen only to use the figures reported by companies regarding the share of Taxonomy alignment. In many cases, the companies in which the fund invests have not yet begun to report this figure and the information is thus considered as giving a misleading assessment of the fund's total alignment with the EU Taxonomy. As reporting by investee companies increases, this figure will become less misleading. |  |  |
| 4. Share of fund assets invested in companies, or credits issued by companies, with Adequate, Strong or Very Strong ratings in the fund company's internally developed tool for ESG analysis.                            | 1.3% Very Strong, 45.5% Strong and 49.1% Adequate. The remainder consists of cash.   |  |  |
| 5. Excluded companies in accordance with the fund company's exclusion policy, calculated as a number, where this is made possible by an available index.   | The fund has complied with Carnegie Fonder's exclusion policy and thereby excluded 11 companies in relation to the SIX PRX index.  |  |  |
| 6. Number of general meetings at which votes are cast in accordance with the fund company's voting policy.   | Carnegie Fonder voted at 26 general meetings held by investee companies.   |  |  |
| 7. Number of advocacy dialogues held with investee companies.  | Carnegie Fonder held 10 advocacy dialogues with the fund's holdings.   |  |  |
| 8. Share of fund assets invested in companies, or credits issued by companies, that have committed to having or have already had their climate targets approved by Science Based Targets initiative.                     | At the end of the year, 26% of fund assets was invested in companies or credits issued by companies that had set an SBT and 19.3% will have their targets verified within 2 years.   |  |  |

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the target fund's sustainable investments is to contribute to sustainable environmental and social development. The target fund does this by raising capital and creating financing for companies whose activities offer a solution to the SDG in the UN Agenda 2030.

Sustainable investments made up 59.9% of the target fund's AUM at 31 December 2022. Of these, 25.2% contributed to environmental objectives and 34.7% to social objectives. The contribution to sustainable development distributed by SDG is shown on the table below.

#### Contribution to SDG

The UN agenda is part of a political framework, and although all the goals are relevant to the companies we invest in, not all of them are applicable in a financial analysis. We therefore divide the goals into two groups. Universal operational goals that all companies should work towards. These include Goals 5, 8, 10, 16 and 17. We consider other goals as investable in the sense that the companies' products and services have direct impact on attaining the goal and that demand for the company's products and services is affected in both the positive and negative sense depending on the company's business. These goals include Goals 1, 2, 3, 4, 6, 7, 9, 11, 12, 13, 14 and 15. Examples of this might include companies that design, build, operate and/or own renewable energy production, climate proof infrastructure, or the like. Further examples are investments in economic activities related to novel sustainable materials or materials produced in a more sustainable manner. Examples of contributions to social objectives include investments in R&D-intensive companies focused on global endemic diseases. Investments are made in economic activities whose products or services enable solutions (enabling activities) and in economic activities that are transitioning existing products to become more sustainable (transitional activities).

Through these sustainable investments, the target fund also contributes to the environmental objectives as they are worded in the EU Taxonomy. This is accomplished as follows. The turnover of all investee companies is further connected to one or more specific SDG Targets - while avoiding duplicates. At Carnegie Fonder, we currently use 27 SDG Targets against our investable goals. This list of targets may be expanded in pace with our investments. According to our categorisation, 16 of these are environmental targets and 11 are social targets. We then map the environmental targets against the goals as expressed in the EU Taxonomy according to this classification.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Investments in the target fund were managed according to Carnegie Fonder's processes. The fund company investigates and ascertains that the investments do not cause significant harm to any of the environmental or social objectives from three angles, as is done for investments in the target fund.

- 1. Positive screening All investments are analysed in the fund company's internally developed analysis tool. The tool analyses more than 100 key indicators and data points in the areas of environmental, social and corporate governance factors in order to ascertain that the investments do not cause significant harm to any environmental or social sustainable investment objective. The analysis and its indicators include consideration of 16 indicators for Principal Adverse Impacts (14 mandatory and 2 voluntary).
- 2. Negative screening The target fund ensures that the investment complies with minimum social safeguards by excluding investments in economic activities that are deemed according to the Carnegie Fonder Policy for Responsible Investment to cause significant harm to environmental and/or social factors. Third-party screenings are carried out at least twice a year to ensure compliance with the exclusion policy.
- 3. Engagement The fund company influences investee companies to continuously improve their work to promote good development within environmental and social factors and to rectify any incidents that could or have caused harm to these factors.

How were the indicators for adverse impacts on sustainability factors taken into account?

Each individual investment was assessed with consideration of that deemed to constitute the possible adverse impact of the investment from a sustainability perspective. Carnegie Fonder works with three general methods for managing and limiting ESG risks and principal adverse impacts on sustainable development. These are screening in, screening out and shareholder engagement/advocacy. If the assessment shows that a company's activities and thus the target fund's investment in the company or its credits would cause significant harm in relation to the target fund's environmental or social objectives, the investment in question is excluded.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Per 31 December 2022, the target fund had no holdings in breach of the OECD Guidelines. Holdings in all funds managed by Carnegie Fonder are assessed against the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights to ensure that an investee company's activities are not in breach of the same.

The fund's holdings are continuously reviewed, both daily in our internal compliance tool and twice yearly based on third-party data. The process is monitored and updated by the fund company's compliance department, sustainability council and the board of directors.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did this financial product consider principal adverse impacts on sustainability factors?

Carnegie Fonder works with three general methods for managing and limiting ESG risks and principal adverse impacts on sustainable development. These are screening in, screening out and shareholder engagement/advocacy. Specific objectives, tools and strategies are used in the assessment of each indicator. The analysis of the mandatory indicators is dependent upon access to data for the underlying investments. Carnegie Fonder has processes and procedures for identifying, prioritising and managing these. Depending on the outcome of the analysis, strategies are applied for company selection, advocacy dialogues, exclusion and voting at general meetings in accordance with the Carnegie Fonder Sustainability Policy. Read more about how we manage principle adverse impacts here. By 30 June 2023, Carnegie Fonder will begin reporting according to the EU template for principal adverse sustainability impacts for the reference period from 1 January 2022 to 31 December 2022 for all funds.

#### What were the top investments of this financial product?

The fund's only investments were in Carnegie Strategifond, which accounted for 99.6% of fund assets. The following 15 investments were Carnegie Strategifond's (the target fund's) largest holdings per 31 December 2022.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31-12-2022

| Largest investments              | Sector              | % Assets | Country |
|----------------------------------|---------------------|----------|---------|
| Investor AB B                    | Financial Services  | 9.1%     | SE      |
| Essity AB B Reg                  | Consumer Staple     | 5.8%     | SE      |

| Skanska AB B                     | Industrial Services | 2.2%     | SE      |
| Karnov Group AB Reg              | Industrial Services | 2.2%     | SE      |
| Sampo Plc A                      | Insurance           | 2.2%     | FI      |
| Epiroc AB B                      | Industrial Products | 2.0%     | SE      |
| Skandinavi Enskil Bank AB Stoc A | Banking             | 1.9%     | SE      |

#### What was the proportion of sustainability-related investments?

All investments excluding cash in the fund promoted environmental or social characteristics.

#### What was the asset allocation?

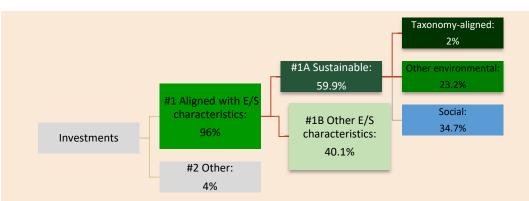

#1. All investments excluding cash in the target fund promoted environmental or social characteristics, total 96%.

#1A. 59.9% of the fund's investments were sustainable:

- 25.2% of the fund's investments were environmentally sustainable and 34.7% were socially sustainable.

Asset allocation describes the share of investments in specific assets.

- # 1B. The remaining share of 40.1% covers investments that promoted environmental or social characteristics but which did not qualify as sustainable investments.
- #2. The fund retained a certain portion of total fund assets as cash reserves in order to meet flows to and from fund unitholders on an ongoing basis. This share was not used to attain environmental or social characteristics, total 4%.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Carnegie Fonder uses the Global Industry Classification Standard (GICS) and the Bloomberg Industry Classification Standard (BICS) to categorise the funds' investments by sector. To make this report comparable to all of the fund company's funds, it has been decided to report according to BICS, which also includes credits.

The target fund invested in the following economic sectors during the year: Communications, Consumer Discretionary, Consumer Staples, Energy, Financials, Real Estate, Health Care, Industrials, Materials, Technology, Utilities.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Of the target fund's holdings, 2 companies have reported alignment with the EU Taxonomy per 31 December 2022. This means that the target fund's total reported Taxonomy-alignment was 2%.

At present, Carnegie Fonder has chosen only to use the figures reported by companies regarding the share of Taxonomy alignment. In many cases, the companies in whose shares or credits the target fund invests have not yet begun to report this figure and the information is thus considered as giving a misleading assessment of the target fund's total alignment with the EU Taxonomy. As reporting by investee companies increases, this figure will become less misleading.

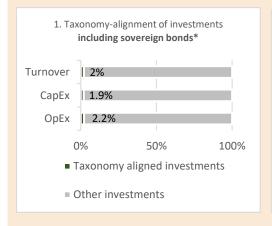

- Taxonomy-aligned activities are expressed as a share of:
- turnover reflects the "greenness" of investee companies today.
- capital
  expenditure
  (CapEx) shows the
  green investments
  made by investee
  companies,
  relevant for a
  transition to a
  green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

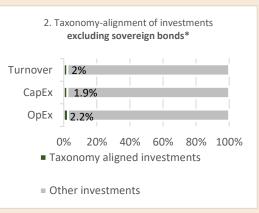

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### What was the share of investments made in transitional and enabling activities?

In many cases, the companies in whose shares or credits the target fund invests have not yet begun to report in accordance with the EU Taxonomy, including any categorisation of activities as transitional or enabling. Consequently, the fund company has determined that it is not currently possible to provide reliable information about the share of the target fund's investments that are transitional or enabling.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of "sustainable investments with an environmental objective" corresponds to the share of the target fund's sustainable investments with turnover that contributes to a social SDG Target according to the previous categorisation.

The target fund's share of sustainable investments with an environmental objective was 25.2% per 31 December 2022. Of these, 23.2% were not aligned with the EU Taxonomy.

#### What was the share of socially sustainable investments?

The share of "sustainable investments with a social objective" corresponds to the share of the target fund's sustainable investments with turnover that contributes to a social SDG Target according to the previous categorisation.

The target fund's share of sustainable investments with a social objective was 34.7% per 31 December 2022.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The target fund retained a certain portion of total fund assets as cash reserves in order to meet flows to and from fund unitholders on an ongoing basis. These assets were kept in a bank account with the fund's custodian bank, whose activities comply with the legal

requirements imposed on such institutions. The fund company has therefore determined that this is in compliance with minimum environmental and social safeguards. Any use of derivatives is intended solely for the purposes of increasing liquidity and minimising risk. The fund company determines that the counterparties is in compliance with minimum environmental and social safeguards.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The target fund has excluded companies that, for example, operate in problematic sectors or violate human rights. To ensure that the target fund invests in "good companies", all holdings were also analysed from a sustainability perspective prior to investment, according to established procedure. To further attain environmental and social characteristics, the target fund has practised shareholder engagement in the form of advocacy dialogues, for example. Shareholder engagement at Carnegie Fonder focused on the following aspects in 2022

- **Board composition**. Unequal gender distribution on the boards of several companies is a matter of concern. As we believe that the companies will benefit from improved balance in the future, we intend to encourage the nomination of a higher number of qualified women as directors.
- **Share ownership**. So that the interests of directors and the CEO align with those of shareholders, directors and the CEO should have significant share ownership.
- **Climate-related targets.** We encourage investee companies to set climate-related targets that have been scientifically verified, i.e., Science Based Targets (SBT).
- Variable remuneration should be linked to both financial key figures and to relevant, transparent and quantifiable sustainability targets. Companies are increasingly implementing sustainability criteria for variable remuneration. We intend to try and hasten this process and promote transparency with regard to both the targets themselves and target attainment.

#### ANNEX IV

**Product name:** Carnegie Corporate Bond

Legal entity identifier: 529900WSF99QC9SSLF05

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### **Environmental and/or social characteristics**

| Did this financial product have a sustainable investment objective?  |   |  |
|--|---|--|
| Yes  | ● ○ 🗶 No  |  |
| It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <ul> <li>It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 54.4% of sustainable investments</li> <li>with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li>with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li>with a social objective</li> </ul> |  |
| It made sustainable investments with a social objective:%  | It promoted E/S characteristics, but <b>did not</b> make any sustainable investments  |  |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted the characteristics below, which were measured using sustainability indicators.

- The fund's investments promoted attainment of global commitments and targets such as the Paris Agreement and the UN Agenda 2030 through the investee company's enabling activities and/or transitional activities.
- The fund also promoted higher standards and good practices of general performance in E and S by investee companies through:

- Careful analysis of every holding from an ESG perspective prior to investing
- o Excluding companies that do not meet the standards
- Influencing holdings in the right direction as regards E and S.
- The fund also promoted high standards of governance through Carnegie Fonder's policies and procedures related to governance.

#### How did the sustainability indicators perform?

| Sustainability indicators   | Outcome 31 December 2022   |
|---|--|
| 1. Share of fund assets invested in credits issued by economic activities for which at least 25% of turnover contributes to at least one SDG.   | The share of fund assets invested in credits issued by these economic activities was 30.8%.  |
| 2. Share of fund assets invested in green, social, sustainable and sustainability-linked bonds.   | 21.9% of fund assets were invested in green bonds and 1.7% in social bonds.  |
| 3. Share of fund assets invested in credits issued by companies whose turnover is aligned with the environmental objectives "climate change mitigation" and "climate change adaptation" in the EU Taxonomy. | The fund's total reported Taxonomy-alignment was 1%. At present, Carnegie Fonder has chosen only to use the figures reported by issuers regarding the share of Taxonomy alignment. In many cases, the issuers in whose credits the fund invests have not yet begun to report this figure and the information is thus considered as giving a misleading assessment of the fund's total alignment with the EU Taxonomy. As reporting by investee companies increases, this figure will become less misleading. |
| 4. Share of fund assets invested in credits issued by companies with Adequate, Strong or Very Strong ratings in the fund company's internally developed tool for ESG analysis.                              | 0% Very Strong, 29.2% Strong and 65.3% Adequate. The remainder consists of cash and cash equivalents.  |
| 5. Excluding companies in accordance with the Investment Manager's exclusion policy, calculated as the number of companies, which is possible when a benchmark index is used.                               | The fund has complied with Carnegie Fonder's exclusion policy.   |
| 6. Number of advocacy dialogues held with investee companies.   | Carnegie Fonder held 11 advocacy dialogues with the fund's holdings.   |
| 7. Share of fund assets invested in credits issued by companies that have committed to having or have already had their climate targets approved by Science Based Target initiative.                        | At the end of the year, 13.1% of fund assets was invested in credits issued by companies that had set an SBT and 13.7% will have their targets verified within 2 years.  |

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

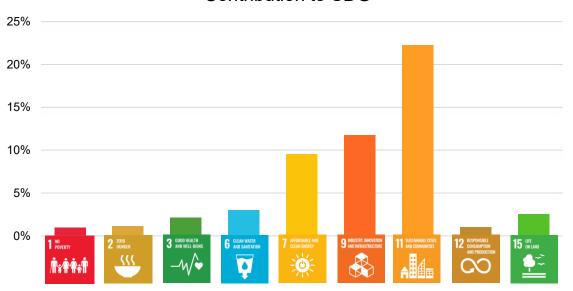

The objective of the fund's sustainable investments is to contribute to sustainable environmental and social development. The fund does this by raising capital and creating financing for companies whose activities offer a solution to the SDG in the UN Agenda 2030.

# Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable investments made up 54.4% of the fund's AUM at 31 December 2022. Of these, 31.4% contributed to environmental objectives and 23% to social objectives. The contribution to sustainable development distributed by SDG is shown on the table below.

#### Contribution to SDG

The UN agenda is part of a political framework, and although all the goals are relevant to the companies we invest in, not all of them are applicable in a financial analysis. We therefore divide the goals into two groups. Universal operational goals that all companies should work towards. These include Goals 5, 8, 10, 16 and 17. We consider other goals as investable in the sense that the companies' products and services have direct impact on attaining the goal and that demand for the company's products and services is affected in both the positive and negative sense depending on the company's business. These goals include Goals 1, 2, 3, 4, 6, 7, 9, 11, 12, 13, 14 and 15. Examples of this might include companies that design, build, operate and/or own renewable energy production, climate proof infrastructure, or the like. Further examples are investments in economic activities related to novel sustainable materials or materials produced in a more sustainable manner. Examples of contributions to social objectives include investments in R&D-intensive companies focused on global endemic diseases. Investments are made in economic activities whose products or services enable solutions (enabling activities) and in economic activities that are transitioning existing products to become more sustainable (transitional activities).

Through these sustainable investments, the fund also contributes to the environmental objectives as they are worded in the EU Taxonomy. This is accomplished as follows. The turnover of all investee companies is further connected to one or more specific SDG Targets - while avoiding duplicates. At Carnegie Fonder, we currently use 27 SDG Targets against our investable goals. This list of targets may be expanded in pace with our investments. According to our categorisation, 16 of these are environmental targets and 11 are social targets. We then map the environmental targets against the goals as expressed in the EU Taxonomy according to this classification.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Carnegie Fonder investigates and ascertains that the investments do not cause significant harm to any of the environmental or social objectives from three angles, as is done for all fund investments.

1. Positive screening – All investments are analysed in the fund company's internally

developed analysis tool. The tool analyses more than 100 key indicators and data points in the areas of environmental, social and corporate governance factors in order to ascertain that the investments do not cause significant harm to any environmental or social sustainable investment objective. The analysis and its indicators include consideration of 16 indicators for Principal Adverse Impacts (14 mandatory and 2 voluntary).

- 2. Negative screening The fund ensures that the investment complies with minimum social safeguards by excluding investments in economic activities that are deemed according to the Carnegie Fonder Policy for Responsible Investment to cause significant harm to environmental and/or social factors. Third-party screenings are carried out at least twice a year to ensure compliance with the exclusion policy.
- 3. Engagement The fund company influences investee companies to continuously improve their work to promote good development within environmental and social factors and to rectify any incidents that could or have caused harm to these factors.

How were the indicators for adverse impacts on sustainability factors taken into account?

Each individual investment was assessed with consideration of that deemed to constitute the possible adverse impact of the investment from the ESG perspective. Carnegie Fonder works with three general methods for managing and limiting ESG risks and principal adverse impacts on sustainable development. These are positive screening, negative screening and shareholder engagement/advocacy. If the assessment shows that a company's activities and thus the fund's investment in its credits would cause significant harm in relation to the fund's environmental or social objectives, the investment in question is excluded.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Per 31 December 2022, the fund had no holdings in breach of the OECD Guidelines. Holdings in all funds managed by Carnegie Fonder are assessed against the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights to ensure that an investee company's activities are not in breach of the same. The fund's holdings are continuously reviewed, both daily in our internal compliance tool and twice yearly based on third-party data. The process is monitored and updated by the fund company's compliance department, sustainability council and the board of directors.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Carnegie Fonder works with three general methods for managing and limiting ESG risks and principal adverse impacts on sustainable development. These are positive screening, negative screening and engagement/advocacy. Specific objectives, tools and strategies are used in the assessment of each indicator. The analysis of the mandatory indicators is dependent upon access to data for the underlying investments. Carnegie Fonder has processes and procedures for identifying, prioritising and managing these. Carnegie Fonder has processes and procedures for identifying, prioritising and managing these. Depending on the outcome, strategies are applied for company selection and advocacy dialogues in accordance with the Carnegie Fonder Sustainability Policy. Read more about how we manage principle adverse impacts here. By 30 June 2023, Carnegie Fonder will begin reporting according to the EU template for principal adverse sustainability impacts for the reference period from 1 January 2022 to 31 December 2022 for all funds.

#### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31-12-2022

Asset allocation describes the share of investments in specific assets.

Taxonomyaligned activities are expressed as a share of:

- reflects the "greenness" of investee companies today.
- expenditure
  (CapEx) shows
  the green
  investments
  made by
  investee
  companies,
  relevant for a
  transition to a
  green economy.
- operational expenditure (OpEx) reflects the green operational

#### What was the proportion of sustainability-related investments?

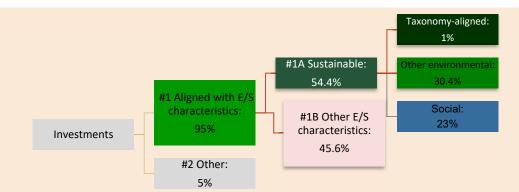

All investments excluding cash in the fund promoted environmental or social characteristics.

#### What was the asset allocation?

#1. All investments excluding cash in the fund promoted environmental or social characteristics, total 95%.

#1A. 54.4% of these investments were sustainable.

- 31.4% of the fund's investments were environmentally sustainable (including Taxonomy-aligned) and 23% were socially sustainable.
- # 1B. The remaining share of 45.6% covers investments that promoted environmental or social characteristics but which did not qualify as sustainable investments.
- #2. The fund retained a certain portion of total fund assets as cash reserves in order to meet flows to and from fund unitholders on an ongoing basis. This share was not used to attain environmental or social characteristics, total 5%.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Carnegie Fonder uses the Global Industry Classification Standard (GICS) and the Bloomberg Industry Classification Standard (BICS) to categorise the funds' investments by sector. To make this report comparable to all of the fund company's funds, it has been decided to report according to BICS, which also includes credits.

The fund invested in the following economic sectors during the year: Communications, Consumer Discretionary, Consumer Staples, Energy, Financials, Real Estate, Industrials, Materials, Technology, Utilities.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Of the fund's holdings, 2 issuers have reported alignment with the EU Taxonomy per 31 December 2022. This means that the fund's total reported Taxonomy-alignment was 1%.

At present, Carnegie Fonder has chosen only to use the figures reported by issuers

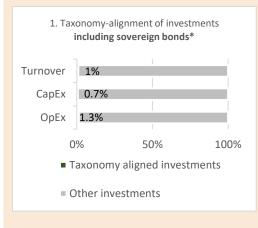

regarding the share of Taxonomy alignment. In many cases, the companies in whose credits the fund invests have not yet begun to report this figure and the information is thus considered as giving a misleading assessment of the fund's total alignment with the EU Taxonomy. As reporting by investee companies increases, this figure will become less misleading.

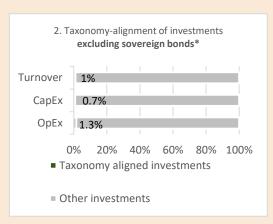

Enabling

environmental
objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### What was the share of investments made in transitional and enabling activities?

In many cases, the companies in whose credits the fund invests have not yet begun to report in accordance with the EU Taxonomy, including any categorisation of activities as transitional or enabling. Consequently, the fund company has determined that it is not currently possible to provide reliable information about the share of the fund's investments that are transitional or enabling.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of "sustainable investments with an environmental objective" corresponds to the share of sustainable investments with turnover that contributes to an environmental SDG Target according to the previous categorisation.

The share of sustainable investments with an environmental objective was 31.4% per 31 December 2022. Of these, 30.4% were not aligned with the EU Taxonomy.

#### What was the share of socially sustainable investments?

The share of "sustainable investments with a social objective" corresponds to the share of sustainable investments with turnover that contributes to a social SDG Target according to the previous categorisation. The share of sustainable investments with a social objective was 23% per 31 December 2022.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The fund retained a certain portion of total fund assets as cash reserves in order to meet flows to and from fund unitholders on an ongoing basis. These assets were kept in a bank account with the fund's custodian bank, whose activities comply with the legal requirements imposed on such institutions. The fund company has therefore determined that this is in compliance with minimum environmental and social safeguards. Any use of derivatives is intended solely for the purposes of increasing liquidity and minimising risk. The fund company determines that the counterparties is in compliance with minimum environmental and social safeguards.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund has excluded companies that, for example, operate in problematic sectors or violate human rights. To ensure that the fund invests in "good companies", all holdings were also analysed from a sustainability perspective prior to investment, according to established procedure. To further attain environmental and social characteristics, the fund has practised shareholder engagement in the form of advocacy dialogues, for example. Shareholder engagement at Carnegie Fonder focused on the following aspects in 2022:

- Board composition. Unequal gender distribution on the boards of several companies is a matter of concern. As we believe that the companies will benefit from improved balance in the future, we intend to encourage the nomination of a higher number of qualified women as directors.
- **Share ownership**. So that the interests of directors and the CEO align with those of shareholders, directors and the CEO should have significant share ownership.
- **Climate-related targets.** We encourage investee companies to set climate-related targets that have been scientifically verified, i.e., Science Based Targets (SBT).
- Variable remuneration should be linked to both financial key figures and to relevant, transparent and quantifiable sustainability targets. Companies are increasingly implementing sustainability criteria for variable remuneration. We intend to try and hasten this process and promote transparency with regard to both the targets themselves and target attainment.

environmentally
sustainable
economic activities.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted environmental and social characteristics by investing in funds that raise capital and create financing for companies that meet or exceed Carnegie Fonder's sustainability-related standards and thus contribute to an environmentally (E) and socially (S) sustainable future. The fund promoted the characteristics below, which were measured using sustainability indicators.

- The fund's investments promoted attainment of global commitments and targets such as the Paris Agreement and the UN Agenda 2030 through the investee company's enabling activities and/or transitional activities.
- The fund also promoted higher standards and good practices of general performance in E and S by investee companies through:
  - Careful analysis of every holding from an ESG perspective prior to investing

1 Full year report

- o Excluding companies that do not meet the standards
- o Influencing holdings in the right direction as regards E and S.
- The fund also promoted high standards of governance through Carnegie Fonder's policies and procedures related to governance.

#### How did the sustainability indicators perform?

The performance of the target fund's sustainability indicators was as follows. The figures include underlying investments via funds managed by Carnegie Fonder.

| Sustainability indicators  | Outcome 31 December 2022   |
|--|--|
| 1. Share of fund assets invested in funds that contribute to UN SDGs through their investments.  | 47.2% of fund assets were invested in companies that contribute to UN SDGs.  |
| #2. Share of fund assets invested in green, social, sustainable and sustainability-linked bonds (indirectly via investments in funds).   | 7.6% of fund assets were invested in green bonds and 0.6% in social bonds.   |
| 3. Share of fund assets invested in companies (indirectly via investment in a fund) whose turnover is aligned with   | The fund's total reported Taxonomy-alignment was 0.4%.   |
| the environmental objectives  "climate change mitigation" and "climate change adaptation" in the EU Taxonomy.  | At present, Carnegie Fonder has chosen only to use the figures reported by companies regarding the share of Taxonomy alignment. In many cases, the companies in which the investee funds invest have not yet begun to report this figure and the information is thus considered as giving a misleading assessment of the fund's total alignment with the EU Taxonomy. As reporting by the underlying companies increases, this figure will become less misleading. |
| 4. Share of fund assets invested in companies (indirectly via investments in funds) with Adequate, Strong or Very Strong ratings in the fund company's internally developed tool for ESG analysis.       | 0.8% Very Strong, 34.9% Strong and 53.6% Adequate. The remainder consists of cash and fund assets invested in funds that are not managed by Carnegie Fonder.   |
| 5. Excluded companies in accordance with the fund company's exclusion policy, calculated as a number, where this is made possible by an available index.   | The investee funds managed by Carnegie Fonder have complied with the fund company's exclusion policy and these have thereby excluded a total of 353 companies.   |
| 6. Number of general meetings at which votes are cast in accordance with the fund company's voting policy.   | Carnegie Fonder voted a total of 257 times for the fund's underlying holdings. As most of the investee funds are invested in the same company, most of these votes were cast at the same general meeting.  |
| 7. Number of advocacy dialogues held with investee companies.  | Carnegie Fonder held 96 advocacy dialogues with the fund's underlying holdings.  |
| 8. Share of fund assets invested in companies (indirectly via investments in funds) that have committed to having or have already had their climate targets approved by Science Based Target initiative. | At the end of the year, 27.8% of fund assets was invested, via the investee funds, in companies or credits issued by companies that had set an SBT and 13.6% will have their targets verified within 2 years.  |

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the fund's sustainable investments is to contribute to sustainable environmental and social development. The fund does this by investing in funds which raise capital and create financing for economic activities that offer a solution to the SDG in the UN Agenda 2030.

Sustainable investments via the fund's underlying investments made up 55.4% of the fund's AUM at 31 December 2022. Of these, 28.2% contributed to environmental objectives and 27.2% to social objectives.

The UN agenda is part of a political framework, and although all the goals are relevant to the companies we invest in, not all of them are applicable in a financial analysis. We therefore divide the goals into two groups. Universal operational goals that all companies should work towards. These include Goals 5, 8, 10, 16 and 17. We consider other goals as investable in the sense that the companies' products and services have direct impact on attaining the goal and that demand for the company's products and services is affected in both the positive and negative sense depending on the company's business. These goals include Goals 1, 2, 3, 4, 6, 7, 9, 11, 12, 13, 14 and 15. Examples of this might include companies that design, build, operate and/or own renewable energy production, climate proof infrastructure, or the like. Further examples are investments in economic activities related to novel sustainable materials or materials produced in a more sustainable manner. Examples of contributions to social objectives include investments in R&D-intensive companies focused on global endemic diseases. Investments are made in economic activities whose products or services enable solutions (enabling activities) and in economic activities that are transitioning existing products to become more sustainable (transitional activities).

Through these sustainable investments, the fund also contributes to the environmental objectives as they are worded in the EU Taxonomy. This is accomplished as follows. The turnover of all investee companies is further connected to one or more specific SDG Targets - while avoiding duplicates. At Carnegie Fonder, we currently use 27 SDG Targets against our investable goals. This list of targets may be expanded in pace with our investments. According to our categorisation, 16 of these are environmental targets and 11 are social targets. We then map the environmental targets against the goals as expressed in the EU Taxonomy according to this classification.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Carnegie Fonder investigates and ascertains that the investments do not cause significant harm to any of the environmental or social objectives from three angles, as is done for all fund investments.

- 1. Positive screening All investments are analysed in the fund company's internally developed analysis tool. The tool analyses more than 100 key indicators and data points in the areas of environmental, social and corporate governance factors in order to ascertain that the investments do not cause significant harm to any environmental or social sustainable investment objective. The analysis and its indicators include consideration of 16 indicators for Principal Adverse Impacts (14 mandatory and 2 voluntary).
- 2. Negative screening The fund ensures that the investment complies with minimum social safeguards by excluding investments in economic activities that are deemed according to

the Carnegie Fonder Policy for Responsible Investment to cause significant harm to environmental and/or social factors. Third-party screenings are carried out at least twice a year to ensure compliance with the exclusion policy.

3. Engagement – The fund company influences investee companies to continuously improve their work to promote good development within environmental and social factors and to rectify any incidents that could or have caused harm to these factors.

How were the indicators for adverse impacts on sustainability factors taken into account?

Each individual investment was assessed with consideration of that deemed to constitute the possible adverse impact of the investment from a sustainability perspective. Carnegie Fonder works with three general methods for managing and limiting ESG risks and principal adverse impacts on sustainable development. These are screening in, screening out and shareholder engagement/advocacy. If the assessment shows that a company's activities and thus the fund's investment in the company or its credits would cause significant harm in relation to the fund's environmental or social objectives, the investment in question is excluded.

For investments in funds, it is ascertained that the fund manager considers the individual investment's principal adverse impacts on sustainability factors and that the fund manager's exclusion policy is aligned with Carnegie Fonder's policy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Per 31 December 2022, the fund had no holdings in breach of the OECD Guidelines. Holdings in all funds managed by Carnegie Fonder are assessed against the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights to ensure that an investee company's activities are not in breach of the same.

The fund's holdings are continuously reviewed, both daily in our internal compliance tool and twice yearly based on third-party data. The process is monitored and updated by the fund company's compliance department, sustainability council and the board of directors.

For other funds that are not managed by Carnegie Fonder, it is ascertained that the fund manager's exclusion policy is aligned with Carnegie Fonder's policy regarding companies in breach of norms according to the UN Guiding Principles on Business and Human Rights.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did this financial product consider principal adverse impacts on sustainability factors?

Carnegie Fonder works with three general methods for managing and limiting ESG risks and principal adverse impacts on sustainable development. These are screening in, screening out and shareholder engagement/advocacy. Specific objectives, tools and strategies are used in the assessment of each indicator. The analysis of the mandatory indicators is dependent upon access to data for the underlying investments. Carnegie Fonder has processes and procedures for identifying, prioritising and managing these. Depending on the outcome of the analysis, strategies are applied for company selection, advocacy dialogues, exclusion and voting at general meetings in accordance with the Carnegie Fonder Sustainability Policy. Read more about how we manage principle adverse impacts here. By 30 June 2023, Carnegie Fonder will begin reporting according to the EU template for principal adverse sustainability impacts for the reference period from 1 January 2022 to 31 December 2022 for all funds.

#### What were the top investments of this financial product?

The following 14 investments were the fund's holdings per 31 December 2022.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31-12-2022

| Largest investments                                   | Sector          | % Assets | Country |
|---|-----------------|----------|---------|
| Carnegie Sverigefond A Cap                            | Investment fund | 19.0%    | SE      |

#### What was the proportion of sustainability-related investments?

All investments in funds managed by Carnegie Fonder promoted environmental or social characteristics.

#### What was the asset allocation?

#1. All investments in funds managed by Carnegie Fonder promoted environmental or social characteristics, total 93%.

#1A. 55.4% of the fund's investments were sustainable:

28.2% of the fund's investments were environmentally sustainable and 27.2% were socially sustainable.

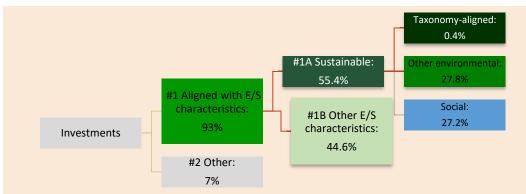

# 1B. The remaining share of 44.6% covers investments that promoted environmental or social characteristics but which did not qualify as sustainable investments.

#2. The fund retained a certain portion of total fund assets as cash reserves in order to

# **Asset allocation** describes the

describes the share of investments in specific assets.

meet flows to and from fund unitholders on an ongoing basis. This share was not used to attain environmental or social characteristics, total 1.8%. The fund also invested in funds that are not managed by Carnegie Fonder, 5.2% in total. These investments satisfy Carnegie Fonder's minimum environmental and social safeguards.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

The fund has only invested in UCITS funds.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Few of the underlying holdings have reported alignment with the EU Taxonomy per 31 December 2022. This means that the fund's total reported Taxonomy-alignment was 0.4%.

At present, Carnegie Fonder has chosen only to use the figures reported by companies regarding the share of Taxonomy alignment. In many cases, the companies in which the investee funds invest have not yet begun to report this figure and the information is thus considered as giving a misleading assessment of the fund's total alignment with the EU Taxonomy. As reporting by investee companies increases, this figure will become less misleading.

Taxonomy-aligned activities are expressed as a share of:

 turnover reflects the "greenness" of investee companies today.

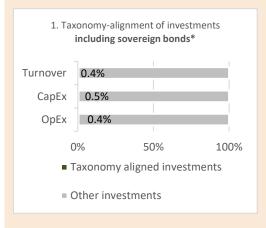

capital
expenditure
(CapEx) shows the
green investments
made by investee
companies,
relevant for a
transition to a
green economy.

 operational expenditure (OpEx) reflects the green operational activities of investee companies. Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### What was the share of investments made in transitional and enabling activities?

In many cases, the companies in whose shares or credits the fund invests have not yet begun to report in accordance with the EU Taxonomy, including any categorisation of activities as transitional or enabling. Consequently, the fund company has determined that it is not currently possible to provide reliable information about the share of the fund's investments that are transitional or enabling.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of "sustainable investments with an environmental objective" corresponds to the share of sustainable investments with turnover that contributes to an environmental SDG Target according to the previous categorisation.

The share of sustainable investments with an environmental objective was 28.2% per 31 December 2022. Of these, 27.8% were not aligned with the EU Taxonomy.

#### What was the share of socially sustainable investments?

The share of "sustainable investments with a social objective" corresponds to the share of sustainable investments with turnover that contributes to a social SDG Target according to the previous categorisation. The share of sustainable investments with a social objective was 27.2% per 31 December 2022.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The fund retained a certain portion of total fund assets as cash reserves in order to meet flows to and from fund unitholders on an ongoing basis. These assets were kept in a bank account with the fund's custodian bank, whose activities comply with the legal requirements imposed on such institutions. The fund company has therefore determined that this is in compliance with minimum environmental and social safeguards. Any use of derivatives is intended solely for the purposes of increasing liquidity and minimising risk. The fund company determines that the counterparties is in compliance with minimum environmental and social safeguards. The fund also invested in funds that are not managed by Carnegie Fonder, but which satisfy

Carnegie Fonder's minimum environmental and social safeguards.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund has promoted the environmental and social characteristics via investments in funds managed by Carnegie Fonder. The investee funds have excluded companies that, for example, operate in problematic sectors or violate human rights. To ensure that the fund invests in "good companies", all holdings were also analysed from a sustainability perspective prior to investment, according to established procedure. To further attain environmental and social characteristics, the fund has, via the investee funds, practised shareholder engagement in the form of advocacy dialogues, for example. Shareholder engagement at Carnegie Fonder focused on the following aspects in 2022:

- **Board composition**. Unequal gender distribution on the boards of several companies is a matter of concern. As we believe that the companies will benefit from improved balance in the future, we intend to encourage the nomination of a higher number of qualified women as directors.
- **Share ownership**. So that the interests of directors and the CEO align with those of shareholders, directors and the CEO should have significant share ownership.
- **Climate-related targets.** We encourage investee companies to set climate-related targets that have been scientifically verified, i.e., Science Based Targets (SBT).
- Variable remuneration should be linked to both financial key figures and to relevant, transparent and quantifiable sustainability targets. Companies are increasingly implementing sustainability criteria for variable remuneration. We intend to try and hasten this process and promote transparency with regard to both the targets themselves and target attainment.

#### ANNEX IV

**Product name:** Carnegie High Yield Select

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Environmental and/or social characteristics** 

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow

good governance

practices.

The **EU** Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Legal entity identifier: 529900NR775DW68RFE72

#### Did this financial product have a sustainable investment objective? Yes No It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that 52.3% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: \_\_\_%

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted the characteristics below, which were measured using sustainability indicators.

- The fund's investments promoted attainment of global commitments and targets such as the Paris Agreement and the UN Agenda 2030 through the investee company's enabling activities and/or transitional activities.
- The fund also promoted higher standards and good practices of general performance in E and S by investee companies through:
  - o careful analysis of every holding from an ESG perspective prior to investing
  - o Excluding companies that do not meet the standards
  - o Influencing holdings in the right direction as regards E and S.

• The fund also promoted high standards of governance through Carnegie Fonder's policies and procedures related to governance.

#### How did the sustainability indicators perform?

The performance of the target fund's sustainability indicators was as follows.

# Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

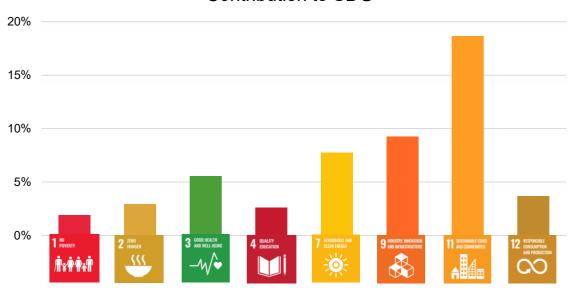

| Sustainability indicators   | Outcome 31 December 2022   |
|---|--|
| 1. Share of fund assets invested in credits issued by economic activities for which at least 25% of turnover contributes to at least one SDG.   | The share of fund assets invested in credits issued by these economic activities was 35.5%.  |
| 2. Share of fund assets invested in green, social, sustainable and sustainability-linked bonds.   | 14.9% of fund assets were invested in green bonds and 1.9% in social bonds.  |
| 3. Share of fund assets invested in credits issued by companies whose turnover is aligned with the environmental objectives "climate change mitigation" and "climate change adaptation" in the EU Taxonomy. | The fund's total reported Taxonomy-alignment was 0%. At present, Carnegie Fonder has chosen only to use the figures reported by issuers regarding the share of Taxonomy alignment. In many cases, the issuers in whose credits the fund invests have not yet begun to report this figure and the information is thus considered as giving a misleading assessment of the fund's total alignment with the EU Taxonomy. As reporting by investee companies increases, this figure will become less misleading. |
| 4. Share of fund assets invested in credits issued by companies with Adequate, Strong or Very Strong ratings in the fund company's internally developed tool for ESG analysis.                              | 0% Very Strong, 12.5% Strong and 80.5% Adequate. The remainder consists of cash and cash equivalents.  |
| 5. Excluding companies in accordance with the Investment Manager's exclusion policy, calculated as the number of companies, which is possible when a benchmark index is used.                               | The fund has complied with Carnegie Fonder's exclusion policy.   |
| 6. Number of advocacy dialogues held with investee companies.   | Carnegie Fonder held 4 advocacy dialogues with the fund's holdings.  |
| 7. Share of fund assets invested in credits issued by companies that have committed to having or have already had their climate targets approved by Science Based Target initiative.                        | At the end of the year, 1.3% of fund assets was invested in credits issued by companies that had set an SBT and 11.5% will have their targets verified within 2 years.   |

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the fund's sustainable investments is to contribute to sustainable environmental and social development. The fund does this by raising capital and creating financing for companies whose activities offer a solution to the SDG in the UN Agenda 2030.

Sustainable investments made up 52.3% of the fund's AUM at 31 December 2022. Of these, 19.1% contributed to environmental objectives and 33.2% to social objectives. The contribution to sustainable development distributed by SDG is shown on the table below.

#### Contribution to SDG

The UN agenda is part of a political framework, and although all the goals are relevant to the companies we invest in, not all of them are applicable in a financial analysis. We therefore divide the goals into two groups. Universal operational goals that all companies should work towards. These include Goals 5, 8, 10, 16 and 17. We consider other goals as investable in the sense that the companies' products and services have direct impact on attaining the goal and that demand for the company's products and services is affected in both the positive and negative sense depending on the company's business. These goals include Goals 1, 2, 3, 4, 6, 7, 9, 11, 12, 13, 14 and 15. Examples of this might include companies that design, build, operate and/or own renewable energy production, climate proof infrastructure, or the like. Further examples are investments in economic activities related to novel sustainable materials or materials produced in a more sustainable manner. Examples of contributions to social objectives include investments in R&D-intensive companies focused on global endemic diseases. Investments are made in economic activities whose products or services enable solutions (enabling activities) and in economic activities that are transitioning existing products to become more sustainable (transitional activities).

Through these sustainable investments, the fund also contributes to the environmental objectives as they are worded in the EU Taxonomy. This is accomplished as follows. The turnover of all investee companies is further connected to one or more specific SDG Targets - while avoiding duplicates. At Carnegie Fonder, we currently use 27 SDG Targets against our investable goals. This list of targets may be expanded in pace with our investments. According to our categorisation, 16 of these are environmental targets and 11 are social targets. We then map the environmental targets against the goals as expressed in the EU Taxonomy according to <a href="this classification">this classification</a>.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Carnegie Fonder investigates and ascertains that the investments do not cause significant harm to any of the environmental or social objectives from three angles, as is done for all fund investments.

- 1. Positive screening All investments are analysed in the fund company's internally developed analysis tool. The tool analyses more than 100 key indicators and data points in the areas of environmental, social and corporate governance factors in order to ascertain that the investments do not cause significant harm to any environmental or social sustainable investment objective. The analysis and its indicators include consideration of 16 indicators for Principal Adverse Impacts (14 mandatory and 2 voluntary).
- 2. Negative screening The fund ensures that the investment complies with minimum social safeguards by excluding investments in economic activities that are deemed according to the Carnegie Fonder Policy for Responsible Investment to cause significant harm to environmental and/or social factors. Third-party screenings are carried out at least twice a year to ensure compliance with the exclusion policy.
- 3. Engagement The fund company influences investee companies to continuously improve their work to promote good development within environmental and social factors and to rectify any incidents that could or have caused harm to these factors.

How were the indicators for adverse impacts on sustainability factors taken into account?

Each individual investment is assessed with consideration of that deemed to constitute the possible adverse impact of the investment from the ESG perspective. Carnegie Fonder works with three general methods for managing and limiting ESG risks and principal adverse impacts on sustainable development. These are screening in, screening out and shareholder engagement/advocacy. If the assessment shows that a company's activities and thus the fund's investment in its credits would cause significant harm in relation to the fund's environmental or social objectives, the investment in question is excluded.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Per 31 December 2022, the fund had no holdings in breach of the OECD Guidelines. Holdings in all funds managed by Carnegie Fonder are assessed against the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights to ensure that an investee company's activities are not in breach of the same.

The fund's holdings are continuously reviewed, both daily in our internal compliance tool and twice yearly based on third-party data. The process is monitored and updated by the fund company's compliance department, sustainability council and the board of directors.

Principal adverse **impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti- bribery matters.

Carnegie Fonder works with three general methods for managing and limiting ESG risks and principal adverse impacts on sustainable development. These are screening in, screening out and shareholder engagement/advocacy. Specific objectives, tools and strategies are used in the assessment of each indicator. The analysis of the mandatory indicators is dependent upon access to data for the underlying investments. Carnegie Fonder has processes and procedures for identifying, prioritising and managing these. Carnegie Fonder has processes and procedures for identifying, prioritising and managing these. Depending on the outcome, strategies are applied for company selection and advocacy dialogues in accordance with the Carnegie Fonder Sustainability Policy. Read more about how we manage principle adverse impacts here. By 30 June 2023, Carnegie Fonder will begin reporting according to the EU template for principal adverse sustainability impacts for the reference period from 1 January 2022 to 31 December 2022 for all funds.

#### What was the proportion of sustainability-related investments?

All investments excluding cash in the fund promoted environmental or social characteristics.

#### What was the asset allocation?

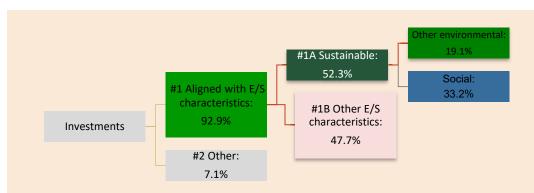

#1. All investments excluding cash in the target fund promoted environmental or social characteristics, total 92.9%.

#1A. 52.3% of these investments were sustainable.

19.1% of the fund's investments were environmentally sustainable (including Taxonomy-aligned) and 33.2% were socially sustainable.

# 1B. The remaining share of 47.7% covers investments that promoted environmental or social characteristics but which did not qualify as sustainable investments.

**Asset** allocation describes the share of investments in specific assets. #2. The fund retained a certain portion of total fund assets as cash reserves in order to meet flows to and from fund unitholders on an ongoing basis. This share was not used to attain environmental or social characteristics, total 7.1%.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

# aligned activities are expressed as a share of:

Taxonomy-

#### In which economic sectors were the investments made?

Carnegie Fonder uses the Global Industry Classification Standard (GICS) and the Bloomberg Industry Classification Standard (BICS) to categorise the funds' investments by sector. To make this report comparable to all of the fund company's funds, it has been decided to report according to BICS, which also includes credits.

The fund invested in the following economic sectors during the year: Consumer Discretionary, Consumer Staples, Energy, Financials, Real Estate, Industrials, Materials, Technology, Utilities.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Of the fund's holdings, 0 issuers have reported alignment with the EU Taxonomy per 31 December 2022. This means that the fund's total reported Taxonomy-alignment was 0%.

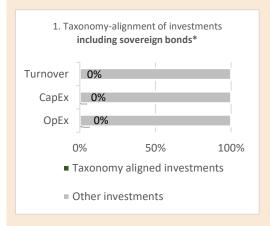

At present, Carnegie Fonder has chosen only to use the figures reported by issuers regarding the share of Taxonomy alignment. In many cases, the companies in whose credits the fund invests have not yet begun to report this figure and the information is thus considered as giving a misleading assessment of the fund's total alignment with the EU Taxonomy. As reporting by investee companies increases, this figure will become less misleading.

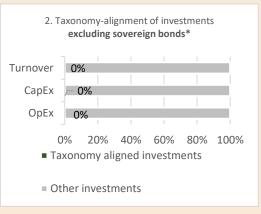

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### What was the share of investments made in transitional and enabling activities?

In many cases, the companies in whose credits the fund invests have not yet begun to report in accordance with the EU Taxonomy, including any categorisation of activities as transitional or enabling. Consequently, the fund company has determined that it is not currently possible to provide reliable information about the share of the fund's investments that are transitional or enabling.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of "sustainable investments with an environmental objective" corresponds to the share of sustainable investments with turnover that contributes to an environmental SDG Target according to the previous categorisation. The share of sustainable investments with an environmental objective was 19.1% per 31 December 2022.

#### What was the share of socially sustainable investments?

The share of "sustainable investments with a social objective" corresponds to the share of sustainable investments with turnover that contributes to a social SDG Target according to the previous categorisation. The share of sustainable investments with a social objective was 33.2% per 31 December 2022.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The fund retained a certain portion of total fund assets as cash reserves in order to meet flows to and from fund unitholders on an ongoing basis. These assets were kept in a bank account with the fund's custodian bank, whose activities comply with the legal requirements imposed on such institutions. The fund company has therefore determined that this is in compliance with minimum environmental and social safeguards. Any use of derivatives is intended solely for the purposes of increasing liquidity and minimising risk. The fund company determines that the counterparties is in compliance with minimum environmental and social safeguards.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund has excluded companies that, for example, operate in problematic sectors or violate human rights. To ensure that the fund invests in "good companies", all holdings were also analysed from a sustainability perspective prior to investment, according to established procedure. To further attain environmental and social characteristics, the fund has practised shareholder engagement in the form of advocacy dialogues, for example. Shareholder engagement at Carnegie Fonder focused on the following aspects in 2022:

- Board composition. Unequal gender distribution on the boards of several companies is a
  matter of concern. As we believe that the companies will benefit from improved balance in
  the future, we intend to encourage the nomination of a higher number of qualified women as
  directors.
- **Share ownership**. So that the interests of directors and the CEO align with those of shareholders, directors and the CEO should have significant share ownership.
- **Climate-related targets.** We encourage investee companies to set climate-related targets that have been scientifically verified, i.e., Science Based Targets (SBT).
- Variable remuneration should be linked to both financial key figures and to relevant, transparent and quantifiable sustainability targets. Companies are increasingly implementing sustainability criteria for variable remuneration. We intend to try and hasten this process and promote transparency with regard to both the targets themselves and target attainment.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### **Environmental and/or social characteristics**

#### Did this financial product have a sustainable investment objective? Yes No It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that 55.4% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: \_\_\_%

The fund promoted environmental and social characteristics by investing in funds that raise capital and create financing for companies that meet or exceed Carnegie Fonder's sustainabilityrelated standards and thus contribute to an environmentally (E) and socially (S) sustainable future. The fund promoted the characteristics below, which were measured using sustainability indicators.

- The fund's investments promoted attainment of global commitments and targets such as the Paris Agreement and the UN Agenda 2030 through the investee company's enabling activities and/or transitional activities.
- The fund also promoted higher standards and good practices of general performance in E and S by investee companies through:
  - Careful analysis of every holding from an ESG perspective prior to investing

1 Full year report

- Excluding companies that do not meet the standards
- o Influencing holdings in the right direction as regards E and S.
- The fund also promoted high standards of governance through Carnegie Fonder's policies and procedures related to governance.

#### How did the sustainability indicators perform?

The performance of the target fund's sustainability indicators was as follows. The figures include underlying investments via funds managed by Carnegie Fonder.

| underlying investments via funds managed by Carnegie Fonder.   |   |  |
|--|---|--|
| Sustainability indicators  | Outcome 31 December 2022  |  |
| 1. Share of fund assets invested in funds that contribute to UN SDGs through their investments.  | 49.9% of fund assets were invested in companies that contribute to UN SDGs.   |  |
| #2. Share of fund assets invested in green, social, sustainable and sustainability-linked bonds (indirectly via investments in funds).   | 5% of fund assets were invested in green bonds and 0.5% in social bonds.  |  |
| 3. Share of fund assets invested in companies (indirectly via investment in a fund) whose turnover is aligned with   | The fund's total reported Taxonomy-alignment was 0.5%.  |  |
| the environmental objectives "climate change mitigation" and "climate change adaptation" in the EU Taxonomy.   | At present, Carnegie Fonder has chosen only to use the figures reported by companies regarding the share of Taxonomy alignment. In many cases, the companies in which the funds invest have not yet begun to report this figure and the information is thus considered as giving a misleading assessment of the fund's total alignment with the EU Taxonomy. As reporting by the underlying companies increases, this figure will become less misleading. |  |
| 4. Share of fund assets invested in companies (indirectly via investments in funds) with Adequate, Strong or Very Strong ratings in the fund company's internally developed tool for ESG analysis.       | 1.1% Very Strong, 37.4% Strong and 52% Adequate. The remainder consists of cash and fund assets invested in funds that are not managed by Carnegie Fonder.  |  |
| 5. Excluded companies in accordance with the fund company's exclusion policy, calculated as a number, where this is made possible by an available index.   | The investee funds managed by Carnegie Fonder have complied with the fund company's exclusion policy and these have thereby excluded a total of 353 companies.  |  |
| 6. Number of general meetings at which votes are cast in accordance with the fund company's voting policy.   | Carnegie Fonder voted a total of 257 times for the fund's underlying holdings. As most of the investee funds are invested in the same company, most of these votes were cast at the same general meeting.   |  |
| 7. Number of advocacy dialogues held with investee companies.  | Carnegie Fonder held 96 advocacy dialogues with the fund's underlying holdings.   |  |
| 8. Share of fund assets invested in companies (indirectly via investments in funds) that have committed to having or have already had their climate targets approved by Science Based Target initiative. | At the end of the year, 30.2% of fund assets was invested, via the investee funds, in companies or credits issued by companies that had set an SBT and 12.6% will have their targets verified within 2 years.   |  |

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the fund's sustainable investments is to contribute to sustainable environmental and social development. The fund does this by investing in funds which raise capital and create financing for economic activities that offer a solution to the SDG in the UN Agenda 2030.

Sustainable investments via the fund's underlying investments made up 55.4% of the fund's AUM at 31 December 2022. Of these, 26.7% contributed to environmental objectives and 28.7% to social objectives.

The UN agenda is part of a political framework, and although all the goals are relevant to the companies we invest in, not all of them are applicable in a financial analysis. We therefore divide the goals into two groups. Universal operational goals that all companies should work towards. These include Goals 5, 8, 10, 16 and 17. We consider other goals as investable in the sense that the companies' products and services have direct impact on attaining the goal and that demand for the company's products and services is affected in both the positive and negative sense depending on the company's business. These goals include Goals 1, 2, 3, 4, 6, 7, 9, 11, 12, 13, 14 and 15. Examples of this might include companies that design, build, operate and/or own renewable energy production, climate proof infrastructure, or the like. Further examples are investments in economic activities related to novel sustainable materials or materials produced in a more sustainable manner. Examples of contributions to social objectives include investments in R&D-intensive companies focused on global endemic diseases. Investments are made in economic activities whose products or services enable solutions (enabling activities) and in economic activities that are transitioning existing products to become more sustainable (transitional activities).

Through these sustainable investments, the fund also contributes to the environmental objectives as they are worded in the EU Taxonomy. This is accomplished as follows. The turnover of all investee companies is further connected to one or more specific SDG Targets - while avoiding duplicates. At Carnegie Fonder, we currently use 27 SDG Targets against our investable goals. This list of targets may be expanded in pace with our investments. According to our categorisation, 16 of these are environmental targets and 11 are social targets. We then map the environmental targets against the goals as expressed in the EU Taxonomy according to this classification.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Carnegie Fonder investigates and ascertains that the investments do not cause significant harm to any of the environmental or social objectives from three angles, as is done for all fund investments.

- 1. Positive screening All investments are analysed in the fund company's internally developed analysis tool. The tool analyses more than 100 key indicators and data points in the areas of environmental, social and corporate governance factors in order to ascertain that the investments do not cause significant harm to any environmental or social sustainable investment objective. The analysis and its indicators include consideration of 16 indicators for Principal Adverse Impacts (14 mandatory and 2 voluntary).
- 2. Negative screening The fund ensures that the investment complies with minimum social safeguards by excluding investments in economic activities that are deemed according to the Carnegie Fonder Policy for Responsible Investment to cause significant harm to

environmental and/or social factors. Third-party screenings are carried out at least twice a year to ensure compliance with the exclusion policy.

3. Engagement – The fund company influences investee companies to continuously improve their work to promote good development within environmental and social factors and to rectify any incidents that could or have caused harm to these factors.

How were the indicators for adverse impacts on sustainability factors taken into account?

Each individual investment was assessed with consideration of that deemed to constitute the possible adverse impact of the investment from a sustainability perspective. Carnegie Fonder works with three general methods for managing and limiting ESG risks and principal adverse impacts on sustainable development. These are screening in, screening out and shareholder engagement/advocacy. If the assessment shows that a company's activities and thus the fund's investment in the company or its credits would cause significant harm in relation to the fund's environmental or social objectives, the investment in question is excluded.

For investments in funds, it is ascertained that the fund manager considers the individual investment's principal adverse impacts on sustainability factors and that the fund manager's exclusion policy is aligned with Carnegie Fonder's policy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Per 31 December 2022, the fund had no holdings in breach of the OECD Guidelines. Holdings in all funds managed by Carnegie Fonder are assessed against the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights to ensure that an investee company's activities are not in breach of the same.

The fund's holdings are continuously reviewed, both daily in our internal compliance tool and twice yearly based on third-party data. The process is monitored and updated by the fund company's compliance department, sustainability council and the board of directors.

For other funds that are not managed by Carnegie Fonder, it is ascertained that the fund manager's exclusion policy is aligned with Carnegie Fonder's policy regarding companies in breach of norms according to the UN Guiding Principles on Business and Human Rights.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did this financial product consider principal adverse impacts on sustainability factors?

Carnegie Fonder works with three general methods for managing and limiting ESG risks and principal adverse impacts on sustainable development. These are screening in, screening out and shareholder engagement/advocacy. Specific objectives, tools and strategies are used in the assessment of each indicator. The analysis of the mandatory indicators is dependent upon access to data for the underlying investments. Carnegie Fonder has processes and procedures for identifying, prioritising and managing these. Depending on the outcome of the analysis, strategies are applied for company selection, advocacy dialogues, exclusion and voting at general meetings in accordance with the Carnegie Fonder Sustainability Policy. Read more about how we manage principle adverse impacts here. By 30 June 2023, Carnegie Fonder will begin reporting according to the EU template for principal adverse sustainability impacts for the reference period from 1 January 2022 to 31 December 2022 for all funds.

#### What were the top investments of this financial product?

The following 14 investments were the fund's holdings per 31 December 2022.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31-12-2022

| Largest investments                                   | Sector          | % Assets | Country |
|---|-----------------|----------|---------|
| Carnegie Sverigefond A Cap                            | Investment fund | 19.0%    | SE      |
| Carnegie Gl Quality Co A Cap                          | Investment fund | 16.7%    | SE      |
| Carnegie Smabolagsfond A Cap                          | Investment fund | 10.3%    | SE      |
| Carnegie Listed Infrastructure A Cap                  | Investment fund | 8.8%     | SE      |
| Carnegie Listed PE A Cap                              | Investment fund | 7.6%     | SE      |
| Carnegie Fonder Portfolio High Yield 3 Cap            | Investment fund | 6.9%     | LU      |
| Carnegie Fonder Portfolio High Yield Select 3 SEK Cap | Investment fund | 6.0%     | LU      |
| Carnegie Spin Off B Cap                               | Investment fund | 5.3%     | SE      |
| C WorldWide Global Equities Ethical A1 Cap            | Investment fund | 4.4%     | LU      |
| Carnergie Global Quality Small Cap A Cap              | Investment fund | 3.4%     | SE      |
| Carnegie Fonder Portfolio Corporate Bond 3 SEK Cap    | Investment fund | 3.3%     | LU      |

| Carnegie Indienfond A Cap                             | Investment fund | 2.2%     | SE      |
| Carnegie Asia A Cap                                   | Investment fund | 2.0%     | SE      |
|   |                 |          |         |

#### What was the proportion of sustainability-related investments?

All investments in funds managed by Carnegie Fonder promoted environmental or social characteristics.

#### What was the asset allocation?

#1. All investments in funds managed by Carnegie Fonder promoted environmental or social characteristics, total 93.6%.

#1A. 55.4% of the fund's investments were sustainable:

26.7% of the fund's investments were environmentally sustainable and 28.7% were socially sustainable.

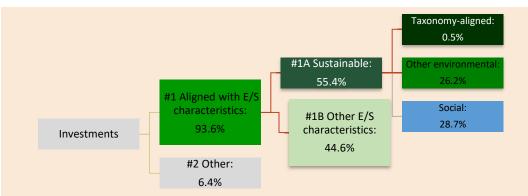

# 1B. The remaining share of 44.6% covers investments that promoted environmental or social characteristics but which did not qualify as sustainable investments.

#2. The fund retained a certain portion of total fund assets as cash reserves in order to meet flows to and from fund unitholders on an ongoing basis. This share was not used to attain

#### Asset allocation

describes the share of investments in specific assets.

environmental or social characteristics, total 2%. The fund also invested in funds that are not managed by Carnegie Fonder, total 4.4%. These investments satisfy Carnegie Fonder's minimum environmental and social safeguards.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.
- In which economic sectors were the investments made?

The fund has only invested in UCITS funds.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Few of the underlying holdings have reported alignment with the EU Taxonomy per 31 December 2022. This means that the fund's total reported Taxonomy-alignment was 0.5%.

At present, Carnegie Fonder has chosen only to use the figures reported by companies regarding the share of Taxonomy alignment. In many cases, the companies in which the investee funds invest have not yet begun to report this figure and the information is thus considered as giving a misleading assessment of the fund's total alignment with the EU Taxonomy. As reporting by investee companies increases, this figure will become less misleading.

Taxonomy-aligned activities are expressed as a share of:

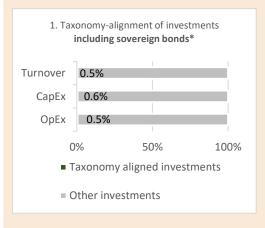

- turnover reflects the "greenness" of investee companies today.
- expenditure
  (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

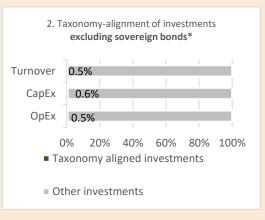

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### What was the share of investments made in transitional and enabling activities?

In many cases, the companies in whose shares or credits the fund invests have not yet begun to report in accordance with the EU Taxonomy, including any categorisation of activities as transitional or enabling. Consequently, the fund company has determined that it is not currently possible to provide reliable information about the share of the fund's investments that are transitional or enabling.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of "sustainable investments with an environmental objective" corresponds to the share of sustainable investments with turnover that contributes to an environmental SDG Target according to the previous categorisation.

The share of sustainable investments with an environmental objective was 26.7% per 31 December 2022. Of these, 26.2% were not aligned with the EU Taxonomy.

#### What was the share of socially sustainable investments?

The share of "sustainable investments with a social objective" corresponds to the share of sustainable investments with turnover that contributes to a social SDG Target according to the previous categorisation. The share of sustainable investments with a social objective was 28.7% per 31 December 2022.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The fund retained a certain portion of total fund assets as cash reserves in order to meet flows to and from fund unitholders on an ongoing basis. These assets were kept in a bank account with the fund's custodian bank, whose activities comply with the legal requirements imposed on such institutions. The fund company has therefore determined that this is in compliance with minimum environmental and social safeguards. Any use of derivatives is intended solely for the purposes of increasing liquidity and minimising risk. The fund company determines that the counterparties is in compliance with minimum environmental and social safeguards. The fund also invested in funds that are not managed by Carnegie Fonder, but which satisfy

Carnegie Fonder's minimum environmental and social safeguards.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund has promoted the environmental and social characteristics via investments in funds managed by Carnegie Fonder. The investee funds have excluded companies that, for example, operate in problematic sectors or violate human rights. To ensure that the fund invests in "good companies", all holdings were also analysed from a sustainability perspective prior to investment, according to established procedure. To further attain environmental and social characteristics, the fund has, via the investee funds, practised shareholder engagement in the form of advocacy dialogues, for example. Shareholder engagement at Carnegie Fonder focused on the following aspects in 2022:

- **Board composition**. Unequal gender distribution on the boards of several companies is a matter of concern. As we believe that the companies will benefit from improved balance in the future, we intend to encourage the nomination of a higher number of qualified women as directors.
- **Share ownership**. So that the interests of directors and the CEO align with those of shareholders, directors and the CEO should have significant share ownership.
- **Climate-related targets.** We encourage investee companies to set climate-related targets that have been scientifically verified, i.e., Science Based Targets (SBT).
- Variable remuneration should be linked to both financial key figures and to relevant, transparent and quantifiable sustainability targets. Companies are increasingly implementing sustainability criteria for variable remuneration. We intend to try and hasten this process and promote transparency with regard to both the targets themselves and target attainment.

#### ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Carnegie High Yield

Legal entity identifier: 5299004SZ8UFPR965C75

### Sustainable investment objective

| Did this financial product have a sustainable investment objective?   |  |  |
|---|--|--|
| • • X Yes   | • No   |  |
| in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective |  |
| It made sustainable investments with a social objective: 33.7%  | It promoted E/S characteristics, but did not make any sustainable investments  |  |

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

practices.

**investment** means an investment in an

economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

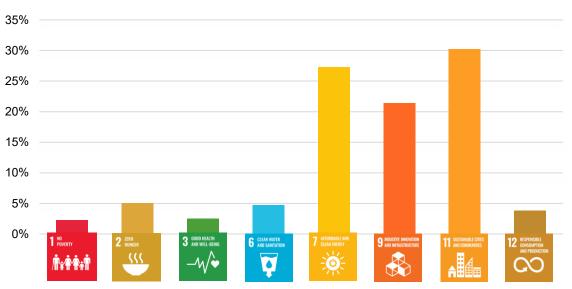

To what extent was the sustainable investment objective of this financial product met?

The fund's sustainable development goals were attained and measured using sustainability indicators. The objective of the fund's sustainable investments is to contribute to sustainable environmental and social development. The fund does this by raising capital and creating financing for companies whose activities offer a solution to the SDG in the UN Agenda 2030.

Sustainable investments made up 94.9% of the fund's AUM at 31 Dec 2022. Of these, 61.2% contributed to environmental objectives and 33.7% to social objectives. The contribution to sustainable development distributed by SDG is shown on the table below.

#### Contribution to SDG

The UN agenda is part of a political framework, and although all the goals are relevant to the companies we invest in, not all of them are applicable in a financial analysis. We therefore divide the goals into two groups. Universal operational goals that all companies should work towards. These include Goals 5, 8, 10, 16 and 17. We consider other goals as investable in the sense that the companies' products and services have direct impact on attaining the goal and that demand for the company's products and services is affected in both the positive and negative sense depending on the company's business. These goals include Goals 1, 2, 3, 4, 6, 7, 9, 11, 12, 13, 14 and 15. Examples of this might include companies that design, build, operate and/or own renewable energy production, climate proof infrastructure, or the like. Further examples are investments in economic activities related to novel sustainable materials or materials produced in a more sustainable manner. Examples of contributions to social objectives include investments in R&D-intensive companies focused on global endemic diseases.

Through these sustainable investments, the fund also contributes to the environmental objectives as they are worded in the EU Taxonomy. This is accomplished as follows. The turnover of all investee companies is mapped to one or more specific SDG Targets - while avoiding duplicates. At Carnegie Fonder, we currently use 27 SDG Targets against our investable goals. This list of targets may be expanded in pace with our investments. According to our categorisation, 16 of these are environmental targets and 11 are social targets. We also map the environmental targets against the goals as expressed in the EU Taxonomy according to the following classification.

Investments are made in economic activities whose products or services enable solutions (enabling activities) and in economic activities that are transitioning existing products to become more sustainable (transitional activities). No index is used as a reference benchmark. Instead, the following ESG indicators are used to ensure that the sustainability target is attained.

# Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

#### How did the sustainability indicators perform?

| Sustainability indicators   | Outcome 31 Dec 2022   |
|---|---|
| 1. Share of fund assets invested in credits issued by economic activities for which at least 25% of turnover contributes to at least one SDG.   | The share of fund assets invested in credits issued by these economic activities was 47%.   |
| 2. Share of fund assets invested in green, social, sustainable and sustainability-linked bonds.   | 43.2% of fund assets were invested in green bonds and 4.7% in social bonds.   |
| 3. Share of fund assets invested in credits issued by companies whose turnover is aligned with the environmental objectives "climate change mitigation" and "climate change adaptation" in the EU Taxonomy. | The fund's total reported Taxonomy-alignment was 2.6%.  At present, Carnegie Fonder has chosen only to use the figures reported by issuers regarding the share of Taxonomy alignment. In many cases, the issuers in whose credits the fund invests have not yet begun to report this figure and the information is thus considered as giving a misleading assessment of the fund's total alignment with the EU Taxonomy. As reporting by investee companies increases, this figure will become less misleading. |
| 4. Share of fund assets invested in credits issued by<br>companies with Adequate, Strong or Very Strong ratings in<br>the fund company's internally developed tool for ESG<br>analysis.                     | 0% Very Strong, 32.8% Strong and 64.4% Adequate. The remainder consists of cash and cash equivalents.   |
| 5. Excluding companies in accordance with the Investment Manager's exclusion policy, calculated as the number of companies, which is possible when a benchmark index is used.                               | The fund has complied with Carnegie Fonder's exclusion policy.  |
| 6. Number of advocacy dialogues held with investee companies.   | Carnegie Fonder held 2 advocacy dialogues with the fund's holdings.   |
| 7. Share of fund assets invested in credits issued by companies that have committed to having or have already had their climate targets approved by Science Based Target initiative.                        | At the end of the year, 16.4% of fund assets was invested in credits issued by companies that had set an SBT and 13.7% will have their targets verified within 2 years.   |

# How did the sustainable investments not cause significant harm to any sustainable investment objective

Carnegie Fonder investigates and ascertains that the investments do not cause significant harm to any of the environmental or social objectives from three angles, as is done for all fund investments.

- 1. Positive screening All investments are analysed in the fund company's internally developed analysis tool. The tool analyses more than 100 key indicators and data points in the areas of environmental, social and corporate governance factors in order to ascertain that the investments do not cause significant harm to any environmental or social sustainable investment objective. The analysis and its indicators include consideration of 16 indicators for Principal Adverse Impacts (14 mandatory and 2 voluntary).
- 2. Negative screening The fund ensures that the investment complies with

minimum social safeguards by excluding investments in economic activities that are deemed according to the Carnegie Fonder Policy for Responsible Investment to cause significant harm to environmental and/or social factors. Third-party screenings are carried out at least twice a year to ensure compliance with the exclusion policy.

3. Engagement – The fund company influences investee companies to continuously improve their work to promote good development within environmental and social factors and to rectify any incidents that could or have caused harm to these factors.

\_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

Each individual investment was assessed with consideration of that deemed to constitute the possible adverse impact of the investment from a sustainability perspective. Carnegie Fonder works with three general methods for managing and limiting ESG risks and principal adverse impacts on sustainable development. These are screening in, screening out and shareholder engagement/advocacy. If the assessment shows that a company's activities and thus the fund's investment in its credits would cause significant harm in relation to the fund's environmental or social objectives, the investment in question is excluded.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. As at 31 Dec 2022, the fund had no holdings in breach of the OECD Guidelines. Holdings in all funds managed by Carnegie Fonder are assessed against the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights to ensure that an investee company's activities are not in breach of the same.

The fund's holdings are continuously reviewed, both daily in our internal compliance tool and twice yearly based on third-party data. The process is monitored and updated by the fund company's compliance department, sustainability council and the board of directors.

Carnegie Fonder works with three general methods for managing and limiting ESG risks and principal adverse impacts on sustainable development. These are screening in, screening out and shareholder engagement/advocacy. Specific objectives, tools and strategies are used in the assessment of each indicator. The analysis of the mandatory indicators is dependent upon access to data for the underlying investments. Carnegie Fonder has processes and procedures for identifying, prioritising and managing these. Depending on the outcome of the analysis, strategies are applied for company selection, advocacy dialogues, exclusion and voting at general meetings in accordance with the Carnegie Fonder Sustainability Policy. Read more about how we manage principle adverse impacts here. By 30 June 2023, Carnegie Fonder will begin reporting according to the EU template for principal adverse sustainability impacts for the reference period from 1 January 2022 to 31 December 2022 for all funds.

Principal adverse **impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti- bribery matters.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31-12-2022

#### What were the top investments of this financial product?

# Asset allocation describes the share of investments in specific assets.

#### What was the proportion of sustainability-related investments?

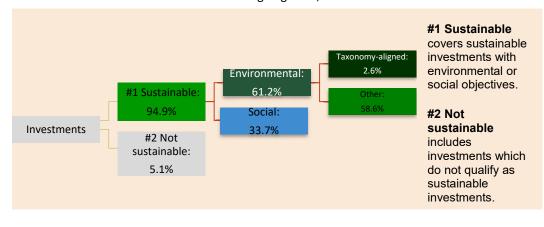

All investments excluding cash in the fund are sustainable investments with environmental or social objectives.

#### What was the asset allocation?

#1. All investments excluding cash in the fund are sustainable investments with environmental or social objectives, total 94.9%.

61.2% of the fund's investments were environmentally sustainable and 33.7% were socially sustainable.

#2. The fund retained a certain portion of total fund assets as cash reserves in order to meet flows to and from fund unitholders on an ongoing basis, total 5.1%. This share does not have

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies
- capital
  expenditure
  (CapEx) showing
  the green
  investments
  made by
  investee
  companies, e.g.
  for a transition to
  a green
  economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

environmental or social objectives.

#### In which economic sectors were the investments made?

Carnegie Fonder uses the Global Industry Classification Standard (GICS) and the Bloomberg Industry Classification Standard (BICS) to categorise the funds' investments by sector. To make this report comparable to all of the fund company's funds, it has been decided to report according to BICS, which also includes credits.

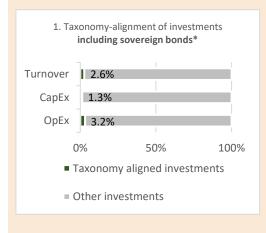

The fund invested in the following economic sectors during the year: Communications, Consumer Discretionary, Consumer Staples, Energy, Financials, Real Estate, Industrials, Materials, Technology, Utilities.

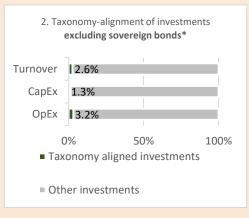

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Of the fund's holdings, 1 issuer has reported alignment with the EU Taxonomy per 31 December 2022. This means that the fund's total reported Taxonomy-alignment was 2.6%.

At present, Carnegie Fonder has chosen only to use the figures reported by issuers regarding the share of Taxonomy alignment. In many cases, the companies in whose credits the fund invests have not yet begun to report this figure and the information is thus considered as giving a misleading assessment of the fund's total alignment with the EU Taxonomy. As reporting by investee companies increases, this figure will become less misleading.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

<sup>\*</sup>For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### What was the share of investments made in transitional and enabling activities?

In many cases, the companies in whose credits the fund invests have not yet begun to report in accordance with the EU Taxonomy, including any categorisation of activities as transitional or enabling. Consequently, the fund company has determined that it is not currently possible to provide reliable information about the share of the fund's investments that are transitional or enabling.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

# What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of "sustainable investments with an environmental objective" corresponds to the share of sustainable investments with turnover that contributes to a social SDG Target according to the previous categorisation.

The share of sustainable investments with an environmental objective was 61.2% per 31 December 2022. Of these, 58.6% were not aligned with the EU Taxonomy.

#### What was the share of socially sustainable investments?

The share of "sustainable investments with a social objective" corresponds to the share of sustainable investments with turnover that contributes to a social SDG Target according to the previous categorisation. The share of sustainable investments with a social objective was 33.7% per 31 December 2022.

# What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The fund retained a certain portion of total fund assets as cash reserves in order to meet flows to and from fund unitholders on an ongoing basis. These assets were kept in a bank account with the fund's custodian bank, whose activities comply with the legal requirements imposed on such institutions. The fund company has therefore determined that this is in compliance with minimum environmental and social safeguards. Any use of derivatives is intended solely for the purposes of increasing liquidity and minimising risk. The fund company determines that the counterparties is in compliance with minimum environmental and social safeguards.

# What actions have been taken to attain the sustainable investment objective during the reference period?

The fund has excluded companies that, for example, operate in problematic sectors or violate human rights. To ensure that the fund invests in "good companies", all holdings were also analysed from a sustainability perspective prior to investment, according to established procedure. To further attain the sustainable investment objective, the fund has practised shareholder engagement in the form of voting at general meetings and advocacy dialogues, for example. Shareholder engagement at Carnegie Fonder focused on the following aspects in 2022:

- Board composition. Unequal gender distribution on the boards of several companies is a
  matter of concern. As we believe that the companies will benefit from improved balance in
  the future, we intend to encourage the nomination of a higher number of qualified women
  as directors.
- **Share ownership**. So that the interests of directors and the CEO align with those of shareholders, directors and the CEO should have significant share ownership.
- **Climate-related targets.** We encourage investee companies to set climate-related targets that have been scientifically verified, i.e., Science Based Targets (SBT).
- Variable remuneration should be linked to both financial key figures and to relevant, transparent and quantifiable sustainability targets. Companies are increasingly implementing sustainability criteria for variable remuneration. We intend to try and hasten this process and promote transparency with regard to both the targets themselves and target attainment
