## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes that you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the PRIIPs manufacturer to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

**If the product currency differs from your investment currency, the following applies: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Further information on risks is detailed in the prospectus available at [www.doublelineucits.com](http://www.doublelineucits.com) or on request from the management company.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If DoubleLine Funds (Luxembourg) is not able to pay you what is owed, you could lose your entire investment.

## Performance Scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the benchmark between February 2020 and September 2022.

The moderate scenario occurred for an investment in the benchmark between March 2015 and March 2018.

The favourable scenario occurred for an investment in the benchmark between February 2017 and February 2020.

**Recommended holding period: 3 years.**

## What happens if FundRock Management Company S.A. is unable to pay out?

The Management Company is responsible for administration and management of the Fund, and does not typically hold assets of the Fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Management Company, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any, of this loss.

## What are the costs?

**The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.**

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10,000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	148 USD	454 USD
Annual cost impact (*)	1.5%	1.5% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.6% before costs and 0.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you.

### Composition of costs
