FUNDROCK UCITS PLATFORM I ICAV- GOEHRING & ROZENCWAJG RESOURCES FUND - FOUNDERS SHARE CLASS GBP, a sub-fund of FUNDROCK UCITS PLATFORM I ICAV

Class Founders Accumulation Shares (GBP) (ISIN IE000MC3T0C2)

The Fund is managed by FundRock Management Company S.A. (the "Management Company")

Objective and investment policy

Objective:

The investment objective of the Fund is to maximise total returns.

Policy:

The Fund pursues an actively-managed investment strategy and the Investment Manager will seek to achieve the Fund's investment objective by primarily investing, at least 80% of the Net Asset Value of the Fund, in equity and equity-related securities of natural resources companies and other investments (including derivatives, specifically long and short positions in exchange traded futures and options, and exchange-traded funds ("ETFs") domiciled within the European Union, including ETFs that are exposed to natural resources or commodities) that provide economic exposure to natural resources or natural resources companies as determined by the Investment Manager (together "natural resources investments"). ETFs will not exceed 10% of the Fund.

Natural resources companies are U.S. and foreign global companies that may own, explore, develop, produce, refine, transport, or market natural resources or that provide related equipment, infrastructure, or services. Natural resources include energy commodities resources, such as oil, natural gas, coal and uranium; precious metals, such as gold, silver, platinum, palladium and rhodium; diamond; base metals, such as copper, lead and zinc; ferrous metals; agricultural commodities; and fertiliser commodities, such as potash, phosphate and nitrogen.

The Fund will typically invest primarily in equity and equity-related securities consisting of common stock, preferred stock, convertible securities, rights and warrants and depository receipts. The Fund Investment Manager may purchase invest up to 10% of the Fund's Net Asset Value in securities issued in private placements and initial public offerings (IPOs). Contingent Convertible Securities are not permitted.

In addition, the Fund may invest up to 20% of the Net Asset Value of the Fund in debt securities of natural resources companies. These debt-securities shall be

"investment-grade" corporate bonds (i.e., BBB- or better from S&P Global Ratings, Baa3 or better from Moody's Investors Services, Inc. and BBB- or better from Fitch Investor Services, Inc.) as well as corporate bonds that are rated below "investment-grade" or are not rated by any rating agency.

The Fund may invest in derivatives, specifically long and short positions in exchange traded futures and options in order to gain market exposure to natural resources or natural resources companies, enhance returns or hedge an existing position.

The Fund may hold both U.S. and foreign securities (including in excess of 30% of Fund's Net Asset Value in emerging market securities) and does not limit the proportion of securities held by geography. In addition, the Fund does not seek to limit its investments based upon market capitalisation and may hold securities of companies whose market capitalisation may range from very-small to very large.

Benchmark:

The Fund is actively managed and the investment objectives and strategy does not refer to a benchmark.

Other information:

A typical investor in the Fund may be an investor with a medium to long term time horizon of up to five years or more, seeks to maximise total returns, and who is willing to accept fluctuations (sometimes significant) in the Net Asset Value per Share of the Fund during the short term.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

• The risk category shown is not guaranteed to remain unchanged and may shift over time.

• The lowest category does not mean 'risk free'.

• The "Class" Shares above appear as a '7' on the scale.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

• Currency Risk: The Fund invests in securities traded in other currencies. Changes in exchange rates will therefore affect the value of the investment.

• Liquidity risk: The markets for some securities and instruments may have limited liquidity. This limited liquidity could be a disadvantage to the Fund, both in the realisation of the prices which are quoted and in the execution of orders at desired prices.

• Natural Resources Investment Risk: Investment in companies in the natural resources industries can be significantly affected by (often rapid) changes in supply of, or demand for, various natural resources. Energy prices may decline sharply, and a prolonged slump in energy prices is likely to have a negative effect on companies that extract, process or deliver energy-related commodities.

• Equity Market Risk: Investing in equity shares means you are taking a stake in the performance of that company, participating in the profits it generates by way of dividends and any increase in its value by way of a rise in its share price. If the company fails, however, all your investment may be lost with it.

• Concentration risk: The Fund concentrates its investments in natural resources investments. Concentrating in natural resources investments increases the risk of loss because the stocks of many or all of the companies in the natural resources

industry may decline in value due to a development adversely affecting the industry or one or more particular sub-industries or commodities.

• Market Disruption and Geopolitical Risk: Geopolitical and other events may disrupt securities markets and adversely affect global economies and markets. Those events, as well as other changes in non-U.S. and U.S. economic and political conditions, could adversely affect the value of the Fund's investments.

• Emerging Markets Risks: The Fund may invest in securities of issuers in emerging markets. Such securities may involve a high degree of risk and may be considered speculative. Risks include (i) greater risk of expropriation, confiscation, taxation, nationalisation, and social, political and economic instability; (ii) the smaller markets for securities of emerging markets issuers and lower volumes of trading, resulting in lack of liquidity and in greater price volatility; (iii) certain national policies which may restrict the investment opportunities available in respect of a Fund, (iv) currency instability and hyper-inflation; and (v) the absence of developed legal structures governing private or foreign investment and private property.

• Fixed Income Transferable Securities: Debt securities are subject to both actual and perceived measures of creditworthiness. The "downgrading" of a rated debt security or its issuer or adverse publicity and investor perception, which may not be based on fundamental analysis, could decrease the value and liquidity of the security.

• Derivatives Instruments: Derivatives and other financial techniques used substantially to obtain, increase or reduce exposure to assets may be difficult to value, may generate leverage, and may not yield the anticipated results. All of this could be detrimental to the performance of the Fund.

• Commodity risk: Commodity prices can be extremely volatile, and to the extent that the Fund is exposed to a commodity sub-sector that undergoes a period of weakness, an investor can expect that volatility to impact returns from the Fund.
