WHAT IS TI	HIS PRODUCT?				
Type :	CABA Hedge KL W is a Unit Class that is an open-ended, ongoing issue and redemption Sub-Fund of Kapitalforeningen Investin.				
Term :	The Unit Class has no fixed term. The annual general meeting may decide to wind up or liquidate the Unit Class if this is deemed necessary in order to bes protect the interests of investors.				
Objectives :	The strategy is aimed at generating returns by taking advantage of the difference in yields between mortgage and government bonds. The return is generated independently of general fluctuations in both interest rates and exchange rates. There is no guarantee that the target return will be achieved.				
	The Sub-Fund predominantly invests in mortgage bonds in Denmark and Sweden and hedges its risk in the sale of, among other things, government bonds and swaps. Minimal interest rate and exchange rate risk will be sought.				
	The Sub-Fund makes use of leveraging, and the invested capital is used, among other things, for collateral. The risk and leverage in the Sub-Fund will vary over time as a result of the portfolio manager's assessments of the investment opportunities at any given time.				
	Information on whether the Unit Class may use different types of derivative financial instruments to adjust risk or to achieve a better return for you as ar investor can be found in the Prospectus for the fund.				
	Investments are made without reference to benchmarks.				
	The Unit Class is actively managed. The investment manager has complete freedom to determine the composition of the Unit Class portfolio.				
	The Sub-Fund launched on 07 July 2017. The Unit Class launched on 23 November 2021.				
	The currency of the Sub-Fund is DKK. The currency of this Unit Class is DKK.				
	The Sub-Fund is accumulating, which means that the net profit from the Sub-Fund is reinvested.				
Intended retail investor :					
Depositary:	The Bank of New York Mellon SA/NV, Copenhagen Branch				
WHAT ARE	THE RISKS AND WHAT COULD I GET IN RETURN?				
Risk indicat	or				
1	2 3 4 5 6 7 The summary risk indicator is a guide to the level of risk of this product compared to				

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Investors shall note that besides the risks included in the risk indicator, other risks, such as financing risk may affect the sub-fund's performance. Please refer to the Prospectus for more details.

This product does not include any protection from future market performance so you could lose some or all of your investment. If not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product/proxy over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Favourable scenario: This type of scenario occurred for an investment/benchmark or proxy between December 2017 and December 2021

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

WHAT HAPPENS IF FUNDROCK MANAGEMENT COMPANY S.A. (MANAGEMENT COMPANY) IS UNABLE TO PAY OUT ?

The Management Company is responsible for the administration and management of the Sub-Fund, and does not typically hold assets of the Sub-Fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Management Company, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Sub-Fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any, of this loss.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables below show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts are illustrations based on an example investment amount and different possible investment periods. We have assumed:

In the first year you would get back the amount that you invested (0% annual return).

• For the other holding periods we have assumed the product performs as shown in the moderate scenario.

• 100,000 DKK is invested.

Example Investment: 100,000 DKK	lf you exit after 1 year	If you exit after 4 years (RHP)
Total costs	5,210 DKK	15,508 DKK
Annual cost impact(*)	5.21%	3.72%

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.21% before costs and -0.51% after costs.

OTHER RELEVANT INFORMATION

Additional Information: Copies of the latest Prospectus, annual report, semi-annual report (all available in English), and the latest Net Asset Value per Share, are available free of charge at the registered office of the Management Company, FundRock Management Company S.A. in its offices at 33 Rue de Gasperich, L-5826 Hesperange, Luxembourg.

Past Performance and Previous Performance Scenarios: The cost, performance and risk calculations included in this key information document follow the methodology prescribed by EU rules. Note that the performance scenarios calculated above are derived exclusively from the past performance of the Sub-Fund's net asset value per share/proxy and that past performance is not indicative of future returns. Therefore, your investment may be at risk and you may not get back the returns illustrated. Investors should not base their investment decisions solely upon the scenarios shown.

Any past performance data presented will be for up to 10 calendar years from the date of the launch of a share class. No performance data will be presented for a share class that does not yet have performance data for one complete calendar year as there would be insufficient data to provide a useful indication of past performance to retail investors.
