WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

Lower risk

Higher risk

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Investors shall note that besides the risks included in the risk indicator, other risks such as liquidity, counterparty, currency, credit and Fixed Interest securities, Equity, Risk linked to use of derivative instruments and Hedging Risk may affect the fund performance.

This product does not include any protection from future market performance so you could lose some or all of your investment. If not able to pay you what is owed, you could lose your entire investment.

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Segregation: Investors should note that there is no segregation of liabilities between the individual Classes within a Sub-Fund. An up-to-date list of the Classes with a contagion risk is available upon request at the registered office of the Company/the Management Company.

Any past performance data presented will be for up to 10 calendar years from the date of the launch of a share class.
