

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

NORRON SICAV - Sustainable Equity - a sub-fund of NORRON SICAV class HRCCH EUR (LU2436693597)

Management Company: FundRock Management Company S.A.

Objectives and investment policy

The sub-fund investment objective is to provide long-term capital growth by investing principally in Nordic (Norwegian, Swedish, Finnish and Danish) Sustainable Companies. Sustainable Companies are those that the Investment Manager believes focus on climate and environment, healthy and prosperous societies, innovative and sustainable solutions, and sustainable cities and infrastructure.

The sub-fund will invest a minimum of 90% of its total net assets in equities and equity related instruments (including but not limited to equity funds, equity options and futures, and contracts for difference).

The sub-fund may invest up to 10% of its total net assets in Nordic fixed income securities, money market instruments, cash and cash equivalents.

The sub-fund will hold long positions directly, or through the use of derivatives. The sub-fund may use exchange traded derivatives (including but not restricted to futures, options and forwards) on equities as well as on financial indices and exchange traded funds for investment purposes. The sub-fund will also be able to write options on assets it holds. In addition, the sub-fund may use derivatives to hedge its cash exposure to Swedish Kronor.

The sub-fund may hold long positions of up to 125% of its net assets.

The sub-fund may not invest in aggregate more than 10% of its net assets in units of UCITS or UCIs (undertakings for collective investment).

The sub-fund qualifies as an Article 9 product under SFDR (Sustainable Finance Disclosure Regulation) since its investment strategy contains ESG (Environmental,

social and corporate governance) objectives. The sub-fund's four thematic sustainable investment objectives when selecting Sustainable Companies are linked to the United Nations 17 Sustainable Development Goals (UN SDGs), which contain a wide range of environmental, social and governance goals such as climate action, decent work and economic growth, responsible consumption and production, good health and well-being, peace and justice, sustainable cities and commodities etc. and the Ten Principles of the UN Global Compact in its investment process, which includes criteria on human and labour rights, environment and anti-corruption. The Investment Manager uses negative screening of assets for exclusion from the investment universe. More information about the Investment Manager's application of the exclusion criteria can be found on <https://www.norron.com/en/organisation/hallbarhet/norrns-exkluderingskriterier/>.

The sub-fund is actively managed without reference to a benchmark.

The reference currency of the sub-fund is SEK.

The currency of the share class is EUR.

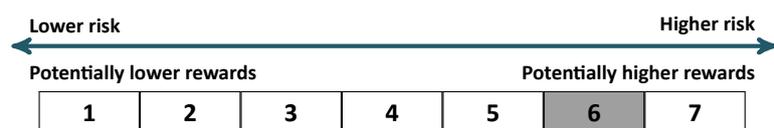

Under normal circumstances, you may sell your shares any day on which banks are open for business in Luxembourg, except 24 December.

These shares are capitalisation shares. Income and capital gains are reinvested.

Recommendation

This sub-fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Risk and reward profile

What does this synthetic risk and reward indicator mean?

- The shares of class HRCCH EUR are classified in category 6 because the value of the share may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high.
- The risk category for this share class was calculated using simulated historical data. The risk category may not be a reliable indicator of the share class's future risk profile. The risk category shown is not guaranteed and may change over time.
- The seven-category scale is complex, for example 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 sub-fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited.

Which materially relevant risks are not adequately captured by the synthetic risk and reward indicator?

- Liquidity risk: low liquidity might result in that it would be difficult or impossible to buy or sell an investment instrument in a timely manner and that the price could be lower or higher than expected.
- The sub-fund may use derivatives. Due to their structure, the risk

associated with these investment instruments may have a larger impact on the value of the sub-fund, than buying the underlying stock or investment instrument directly.

- Counterparty risk: the risk that a counterpart does not fulfill its obligations to the sub-fund (e.g. not paying an agreed amount or not delivering securities as agreed).
- Currency risk: the sub-fund may hold some of its investments in currencies other than the sub-fund's reference currency. Thus the value of the sub-fund may rise and fall due to currency movements.
- The country focus strategy employed by this sub-fund may lead to higher risk and volatility than a more diversified approach.
- Operational risk: the risk of loss resulting from e.g. system breakdowns, human errors or from external events.
- Sustainability risk: The broad ESG Goals of this sub-fund may lead the Investment Manager to invest in or exclude securities for non-financial reasons, irrespective of market opportunities in order to achieve the stated ESG Goals. The financial returns of this sub-fund may not be equivalent or surpass those of non-ESG financial products. Data constraint is a big challenge and there are limitations on the types of sustainability and ESG-related data currently provided to the market.

How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment is indicated in the corresponding sections of the prospectus of the fund.

Charges

The charges you pay are used to cover the running costs of the sub-fund, including the costs of marketing and distribution of shares. These charges reduce the potential increase in value of an investment in this sub-fund.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	2.26%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown correspond to a maximum percentage which might be deducted from your capital invested into the sub-fund. In some cases you might pay less. You may contact your financial advisor or intermediary to be

informed on the actual entry and exit charges.

The conversion of some or all of the shares into shares of another sub-fund or another share class is free of charge.

The ongoing charges figure shown here is an estimate of the charges as this share class has not existed for an entire year or has not yet been launched; consequently, there is insufficient data available.

The figure of the ongoing charges excludes:

- Securities transaction charges, except for the charges related to the purchase and the sale of target funds.

For further information concerning charges, please consult the heading "Fees and expenses" of the fund's prospectus.

Past performance

There is insufficient data to produce a useful indication of past performance for the share class.

This sub-fund was launched in 2020.
