## Notes to the financial statements

as at 30th June 2018

## Note 1 - Significant Accounting policies

## a) Presentation of the financial statements

The financial statements of the Fund are established in accordance with the Luxembourg legal and regulatory requirements concerning Undertakings for Collective Investment and with generally accepted accounting principles in Luxembourg.

## b) Valuation

- i. Securities listed on Regulated Markets, which operate regularly and are recognised and open to the public, are valued at the last available price; in the event that there should be several such markets, on the basis of the last available price of the main market for the relevant security. Should the last available price for a given security not truly reflect its fair market value, then that security is valued on the basis of the probable sales price which the Boards of Directors deem it is prudent to assume;
- ii. Securities not listed on Regulated Markets, which operate regularly and are recognised and open to the public, are valued on the basis of their last available price. Should the last available price for a given security not truly reflect its fair market value, then that security is valued by the Boards of Directors on the basis of the probable sales price which the Boards of Directors deems it is prudent to assume;
- iii. Swaps are valued at their fair value based on the underlying securities (at close of business or Intraday) as well as on the characteristics of the underlying commitments;
- iv. The liquidating value of futures, forward and options contracts (or any other derivative instruments) not traded on Regulated Markets or stock exchanges means their net liquidating value determined, pursuant to the policies established in good faith by the Board of Directors, on a basis consistently applied for each different variety of contracts. The liquidating value of futures, forward and options contracts (or any other derivative instruments) traded on Regulated Markets or stock exchanges are based upon the last available settlement prices of these contracts on Regulated Markets or stock exchanges on which the particular futures, forward or options contracts (or any other derivative instruments) are traded by the Fund; provided that if a futures, forward or options contract (or any other derivative instruments) could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract is such value as the Board of Directors may deem fair and reasonable;
- v. Shares or units in underlying open-ended investment funds are valued at their last available price;
- vi. Liquid assets and money market instruments are valued at nominal value plus any accrued interest or on an amortised cost basis. All other assets, where practice allows, are valued in the same manner. Short-term investments that have a remaining maturity of one year or less are valued (i) at market value, or (ii) where market value is not available or not representative, at amortised cost. These instruments are presented at cost and the difference between the acquisition cost and the redemption cost at maturity is recorded in interest.

## Notes to the financial statements (continued)

as at 30th June 2018

# c) Net realised gain (loss) on securities portfolio

The net realised gain/ (Loss) on securities portfolio is determined on the basis of the average cost of securities sold.

## d) Cost of securities

## e) Exchange translation

Bank balances, other assets and liabilities and the value of securities held that are denominated in other currencies than the Sub-Fund's currency are converted at the prevailing exchange rate of the closing day. Income and expenses incurred in currencies other than the Sub-Fund's currency are converted at the prevailing exchange rate of the day of each transaction. Exchange gains and losses are disclosed in the statement of operations and other changes in net assets.

At the date of the financial statements, the prevailing exchange rates on the closing day were as follows:

1	SEK	=	0.1512949	AUD	Australian Dollar
			0.7134217	DKK	Danish Krona
			0.0957531	EUR	Euro
			0.0846779	GBP	Pound Sterling
			0.9112150	NOK	Norwegian Krona
			0.1117918	USD	US Dollar

## f) Combined financial statements

## g) Formation expenses

## Note 5 - Performance fee

The Investment Manager is entitled to receive, from the net assets of certain Classes of Shares, a performance based incentive fee (the "Performance Fee").

The first Calculation Period commences on the Valuation Day immediately following the close of the Initial Offer Period. The Performance Fee is calculated, accrued and crystallised on each Valuation Day as an expense of the relevant Class of Shares, meaning that each time a Performance Fee is accrued, it becomes a payable to the Investment Manager. The Performance Fee is paid to the Investment Manager monthly in arrears.

- For the Sub-Fund NORRON SICAV - Preserve:

If on any Valuation Day, the Gross Asset Value ("GAV") per Share, which is the Net Asset Value per Share after accrual of all fees but before the accrual of Performance Fee, is greater than the High Watermark ("the HWM"), a Performance Fee is calculated by multiplying the difference between the GAV per Share and the HWM by the last outstanding number of Shares of the relevant Class of Shares and the Performance Fee rate as outlined in the table below.

The HWM is the higher of the Net Asset Value of the relevant Class of Shares of the previous Valuation Day and the HWM of the previous Valuation Day multiplied by the daily performance of the Index, except on the first Valuation Day where the HWM was replaced with the Index Value.

The Index Value is the Index converted into the base value of the relevant Class of Shares at the date of the launch of the Class of Shares. If the launch price is 100, Index Value is the index to the base of 100.

## Notes to the financial statements (continued)

as at 30th June 2018

- For the Sub-Funds NORRON SICAV - Target and NORRON SICAV - Select:

If on any Valuation Day, the GAV per Share, which is the Net Asset Value per Share after accrual of all fees but before the accrual of Performance Fee, is greater than the HWM, a Performance Fee is calculated by multiplying the difference between the GAV per Share and the HWM by the last outstanding number of Shares of the relevant Class of Shares and the Performance fee rate as outlined in the table below.

The HWM is the higher of the Net Asset Value of the previous Valuation Day of the relevant Class of Shares or the Net Asset Value of the previous Valuation Day for which a Performance Fee was crystallised.

- For the Sub-Fund NORRON SICAV - Active:

No Performance Fee is charged to the Sub-Fund.

- For the Sub-Fund NORRON SICAV - Premium:

If on any Valuation Day, the Gross Asset Value GAV per Share, which is the Net Asset Value per Share after accrual of all fees but before the accrual of Performance Fee, is greater than the HWM, a Performance Fee is calculated by multiplying the difference between the GAV per Share and the HWM by the last outstanding number of Shares of the relevant Class of Shares.

The HWM is the higher of the Net Asset Value of the relevant Class of Shares of the previous Valuation Day and the HWM of the previous Valuation Day multiplied by the daily performance of the Index Value, except on the first Valuation Day where the HWM was replaced with the Index Value.

The Index Value is the Index converted into the base value of the relevant Class of Shares at the date of the launch of the Class of Shares + 200 bps annualized (e.g. if the launch price is 100, the Index Value will be based on the Index to the base of 100).

The rate of performance fee and index are set out in the table below:

- For the Sub-Fund NORRON SICAV - Alpha:

If on any Valuation Day, the Gross Asset Value GAV per Share, which is the Net Asset Value per Share after accrual of all fees but before the accrual of Performance Fee, is greater than the HWM, a Performance Fee is calculated by multiplying the difference between the GAV per Share and the HWM by the last outstanding number of Shares of the relevant Class of Shares and the performance fee rate as outlined in the table below.

The HWM is the higher of the Net Asset Value of the previous Valuation Day of the relevant Class of Shares or the Net Asset Value of the previous Valuation Day for which a Performance Fee was crystallised.

## Note 13 - Swing pricing

Under certain circumstances investment and/ or disinvestment costs may have an adverse effect on the shareholders' interests in a Sub-Fund.

In order to prevent this effect, called "dilution", the Directors have the authority to allow for the Net Asset Value per Share to be adjusted by effective dealing and other costs and fiscal charges which would be payable on the effective acquisition or disposal of assets in the relevant Sub-Fund if the net capital activity exceeds, as a consequence of the sum of all subscriptions, redemptions or conversions in such a Sub-Fund, such threshold percentage (the "Threshold") as may be determined from time to time by the Directors, of the Sub-Fund's total net assets on a given Valuation Day.

If the net capital activity for a given Valuation Day leads to a net inflow of assets in excess of the Threshold in the relevant Sub-Fund, the Net Asset Value used to process all subscriptions, redemptions or conversions in such a Sub-Fund is adjusted upwards by the swing factor that shall be determined from time to time by the Directors but will not exceed 2% of the relevant Net Asset Value.

If the net capital activity for a given Valuation Day leads to a net outflow of assets in excess of the Threshold in the relevant Sub-Fund, the Net Asset Value used to process all subscriptions, redemptions or conversions in such a Sub-Fund is adjusted downwards by the swing factor that shall be determined from time to time by the Directors but will not exceed 2% of the relevant Net Asset Value.

There was no "Swing Pricing" applied for the Net Asset Value as at 30th June 2018 for the Sub-Funds.

## Note 14 - Pooling of assets

The Investment Manager may invest and manage all or any part of the portfolios of assets established for two or more Sub-Funds (hereafter the "Participating Sub-Funds") on a pooled basis. Any such enlarged asset pool (an "Enlarged Asset Pool") is formed by transferring to it cash or other assets (subject that such other assets being appropriate with respect to the investment policy of the Enlarged Asset Pool concerned) from each Participating Sub-Fund. Thereafter, the Investment Manager may, from time to time, make further transfers to the Enlarged Asset Pool. The Investment Manager may also transfer assets back from the Enlarged Asset Pool to a Participating Sub-Fund up to the amount of the participation of the relevant Participating Sub-Fund concerned.

There was no "Pooling of assets" applied for the Net Asset Value as at 30th June 2018 for the Sub-Funds.
