The Fund is registered under Part I of the amended Law of 17th December 2010 relating to Undertakings for Collective Investment. General information (continued)

The financial year of the Fund starts on 1st January and ends on 31st December in each year. The audited annual report, including audited financial statements and the unaudited semi-annual reports comprise consolidated financial statements of the Fund expressed in EUR, being the reference currency of the Fund and financial information on each Sub-Fund expressed in the reference currency of each Sub-Fund.

Copies of the Articles of Incorporation, of the current Prospectus, of the Key Investor Information Document (KIID) and of the latest reports of the Fund may be obtained free of charge at the registered office of the Fund, and at the Management Company.

The market for high-yield bonds may well be characterised as oil driven. The year started with an oil price of USD 57 a barrel, and peaked at USD 68, only to fall to USD 36 and end the year at USD 38. Similarly, the high yield market had a relatively good development in the spring, but fell back sharply after the summer holidays. Autumn was characterised by sharply falling bond prices as the fall in oil prices led to large outflows from high-yield funds in general, both in the US and in the Nordic region. In order to provide liquidity to meet these large withdrawals, funds had to accept massive price reductions when selling the underlying securities.

The effect was to some extent self-perpetuating, since the drop in bond prices gave rise to further fear which in turn resulted in redemptions based on the fear of being the last in line. Banks have increasingly less capacity to hold large volumes of bonds on their books as a result of more stringent capital requirements. This contributed to very poor liquidity levels in the market, and the flight to liquidity peaked at both the end of the third quarter and, to some extent, at year end. Nothing but dramatic price drops attracted new buyers.

With 2015 behind us, we can conclude that the oil service sector was definitely a sector one should have avoided, especially early-cyclical sub-segments such as seismic and drilling. Companies such as Polarcus, Songa and Seadrill have experienced large price drops. Relatively, the subsea segment has fared better and Solstad, Farstad and DOF group companies have managed to maintain a higher activity level due to exposure to such sub-segments. OSV companies have consistently experienced massive price reductions with corresponding increases in demands for yield in its bond issues, and many are priced in the range of 50-70 per cent of par. Current yield to maturity is correspondingly 20-50 per cent.

The backdrop is that investments from oil companies fell further during the year and more negative adjustments are expected. The challenge for most high-yield funds is that the oil and oil service sector represents approximately 70 per cent of outstanding high-yield bonds in Norway, making it difficult to avoid some form of exposure.

As we expected, the year was characterised by cancellations and postponements, rather than new activity. Nevertheless, we do believe it is worth pointing out that many companies are good at negotiating renewed contracts and new agreements. The intention must be for the companies to continue reducing operating costs to a minimum and to ensure cash flows cover the expenses, so as to maintain the core business and retain valuable crew.

Lay-ups help balancing the market, but there is a general perception that ships need to be scrapped in order to bring down underlying overcapacity. Although standardisation and efficiency measures contribute significantly, we do not see a real recovery until demand picks up. Several analysts point out that one can see signs of efficiency measures having a positive effect and that reset agreements will have an effect for oil companies this year and eventually also for the oil service companies that survive. The challenge remains that many companies in the sector are struggling with significant debt burdens, making equity issues in many cases inevitable.

Although oil analysts have lowered their oil price estimates for the year, most are still estimating higher than current prices, with a rise beyond 2016. It may be worth noting that even though Norges Bank expects lower exploration investments, they still maintain that the expected profitability of investment projects on the Norwegian continental shelf have not changed significantly as a result of this fall's drop in oil prices. There will still be exploration and production of oil on the Norwegian continental shelf.

Report from the Investment Manager (continued)

Other bonds have contributed positively to returns for the year, although it should be noted that we have observed some spread widening for Norwegian bonds, generally due to a somewhat worsened outlook for the Norwegian economy and a weak Norwegian krone. Our best contributors for the year have been our investment in Swedish bonds. Companies such as Nobina, eTRAVELi and West Atlantic have called their bonds, in part far above par, typically as the companies have succeeded in securing (much) cheaper funding through their banks as a result of a positive underlying trend.

For investors, the good news is that the corporate bond market now has significantly higher current yields. We assume that corporate bonds outside the oil sector will represent a good return source. As for bonds in the oil sector, they have challenging times ahead - but this is similarly reflected in the pricing of these bonds. Bonds for many companies in the sector now have a yield to maturity of 20-50 per cent. This reflects the market's lack of confidence that these companies will be able to meet their debt obligations at maturity.

We will use our experience to assist in the various restructurings that will come. In our experience, both companies and various creditor groups have a constructive approach to these challenges, and we should not forget the truth in the old cliché that the Chinese symbol for crisis is also opportunity. We believe that this market could be such an opportunity.

PARETO SICAV - PARETO GLOBAL CORPORATE BOND

PARETO SICAV - PARETO GLOBAL CORPORATE BOND (Sub-Fund in the Pareto SICAV) was launched on March 23rd 2015. The strategy of the Sub-Fund is to invest in global corporate bonds, investment grade and high yield. The Sub-Fund focuses on having a well-diversified portfolio, which will endure business cycles and bouts of market volatility. The Sub-Fund aims to generate a better risk adjusted return compared with global reference index. 2015 was a challenging year for anyone investing in the corporate bond market. US high yield had its first negative return year outside of recession years. The interest rate and credit market digested the actual rate decision well, with rather subdued movements compared to several hiccups of the last few years. The predominant story of 2015 will be oil, minerals and the consistent decline in oil prices and effects on oil exporting nations. Half of the US high yield spread widening was due to the decline in the oil, gas, metals and mining and telecom sectors. Another constant reminder of 2015 was how sudden fortunes turn on national champions and iconic global brands. Fraud, corruption and deceit proved to be destructive to Petrobras, Volkswagen and Valeant. Credit investors were punished severely and often swiftly as opinion turned and legal actions were launched.

Sub-Fund performance

The Sub-Fund Class A declined -1.0 percent from launch to end of 2015. During the same time period the reference index declined -4.3 percent. Net flows into the Sub-Fund were positive SEK 604 million. The outperformance of the Sub-Fund was mainly due to a much lesser exposure to investments in energy and other commodity related corporate entities. The Sub-Fund purchases bonds denominated in several different currencies. In order to protect against currency movements the Sub-Fund uses currency hedging instruments like forwards and swaps. There are no other derivatives apart from foreign exchange outstanding in the Sub-Fund

Outlook

Despite the headwinds and idiosyncratic events, corporate bonds do offer attractive yield alternatives in this ZIRP (Zero Interest Rate Policy) environment. Banks are better capitalized than before the financial crisis and central bank support remains firm in case growth falters. A return to a normalized interest rate environment will be a challenge for the corporate bond market, but less so compared with almost zero coupon government bonds.

Report from the Investment Manager (continued)

Global high yield issuance slowed considerably during the month of December, due to both year-end close and the Federal Reserve rate rise anticipation. As we look back at 2015, and despite the volatility, there was record global issuance and a continued growth story in corporate bond issuance outside the mature US markets. Global credit markets are more intertwined than ever before. Volatility and liquidity will most likely be a challenge for 2016 as well. The Sub-Fund will look to explore the opportunities in the global bond market. The structure and depth of the international bond markets continue to evolve, creating exciting avenues to find diversification and improved liquidity.

As we look forward there will most likely be more of the same, volatility and low short-term interest rates, for the time being. The Sub-Fund will continue to focus on achieving competitive risk adjusted returns compared with index and peers.

Responsibility of the réviseur d'entreprises agréé

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier*. The financial statements of the Fund are established in accordance with the Luxembourg legal and regulatory requirements concerning Undertakings for Collective Investment.

b) Valuation

- i. Securities and/ or financial derivative instruments listed on Regulated Markets, which operate regularly and are recognised and open to the public, are valued at the last available price; in the event that there should be several such markets, on the basis of the last available price of the main market for the relevant security. Should the last available price for a given security not truly reflect its fair market value, then that security shall be valued on the basis of the probable sales prices which the Board of Directors of the Fund deems is prudent to assume. Securities in PARETO SICAV PARETO NORDIC CORPORATE BOND (formerly PARETO SICAV PARETO HIGH YIELD NORDIC) and PARETO SICAV PARETO GLOBAL CORPORATE BOND are valued based on the Mid Price;
- ii. Securities and/or financial derivative instruments not listed on Regulated Markets, which operate regularly and are recognised and open to the public, are valued on the basis of their last available price. Short-term investments that have a remaining maturity of one year or less are valued (i) at market value, or (ii) where market value is not available or not representative, at amortised cost;
- v. The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid, and not yet received is deemed to be the full amount thereof, unless, however, the same is unlikely to be paid or received in full, in which case the value thereof is determined after making such discount as the Board of Directors of the Fund may consider appropriate in such case to reflect the true value thereof.

Notes to the financial statements (continued)

Note 5 - Performance fees

For the Sub-Fund PARETO SICAV - PARETO EQUITY NORWAY (liquidated on 21st December 2015):

With respect to Class A, B and D Shares, the Investment Manager is entitled to receive a performance fee calculated as follows:

With respect to Class A and D Shares, the Investment Manager is entitled to a performance fee equal to 10% of the appreciation of the Net Asset Value per Share (before deduction of any performance fee) over an absolute benchmark of 3 months Euribor plus 3% p.a. (the "Absolute Benchmark") during the Reference Period.

As of each Valuation Day of any given calendar year (the "Reference Period"), the performance against the Absolute Benchmark is assessed and the corresponding amount (if any) is accrued in the Net Asset Value.

The performance fee is only due if the Net Asset Value per Class A or D Shares calculated as of the last Valuation Day of the Reference Period (the "Reference NAV") is higher than the Reference NAV calculated with respect to the previous Reference Period. The Reference NAV will be reset on each 31st December and the first Reference NAV will be the Initial Offer Price of Class A or D Shares.

With respect to Class B Shares, the Investment Manager is entitled to a performance fee equal to 10% of the appreciation of the Net Asset Value per Share over an absolute benchmark of 3 months Euribor plus 3% p.a. (the "Absolute Benchmark").

As of each Valuation Day the Net Asset Value is compared to the last all time highest Net Asset Value (the "High Watermark"). If there is a new High Watermark at a Valuation Day, exceeding the corresponding increase in the Absolute Benchmark, an incremental performance fee will be accumulated and due according to the above formula.

In case the Net Asset Value falls below the High Watermark, there will be no new incremental accumulation of performance fee until a new High Watermark, exceeding the corresponding increase in the Absolute Benchmark, is reached. As the incremental increase in performance fee is calculated and due at each Valuation Day, the accumulated performance fee will not decrease if the Net Asset Value falls below the High Watermark.

At the date of the report, a performance fee was recorded for the Sub-Fund PARETO SICAV - PARETO EQUITY NORWAY (liquidated on 21st December 2015) and amounted to EUR 5,579.22.

No performance fee is foreseen for PARETO SICAV - PARETO NORDIC CORPORATE BOND (formerly PARETO SICAV - PARETO HIGH YIELD NORDIC) and PARETO SICAV - PARETO GLOBAL CORPORATE BOND.

Note 12 - Changes in the investment portfolio

The statement of changes in the investment portfolio for the period covered by the report is available free of charge upon request from the registered office of the Fund.

Note 13 - Master - Feeder structure

The Sub-Fund PARETO SICAV - PARETO NORDIC CORPORATE BOND (formerly PARETO SICAV - PARETO HIGH YIELD NORDIC) acted as a Feeder Fund to the Norwegian domiciled Fund, Pareto Kreditt (the "Master Fund") and invested exclusively in class B units of the Master Fund until 26th October 2015. The Board of Directors of the Fund decided to restructure the Sub-Fund into a direct investing product and as a consequence the Sub-Fund pursues now directly the investment policy of Pareto Kreditt. As a result of this change, the Sub-Fund changed its name from PARETO SICAV - PARETO HIGH YIELD NORDIC into PARETO SICAV - PARETO NORDIC CORPORATE BOND.

The Master Fund invests in high yield bonds, i.e. corporate bonds with consistently higher risk than ordinary bonds. It invests primarily in debt instruments issued by Norwegian companies, but also in Norwegian Government and Norwegian institutions.

Information of the Master Fund may be obtained at the registered office of the Fund free of charge as well as on the website www.paretoforvaltning.no.

Until 26th October 2015, the fees charged by the Master Fund are as follows:

	in %	in NOK
Total Expense Ratio	0.50%	8,265,266
