## What is this product?

#### Type

Investment Company (SICAV), Luxembourg

#### Term

This sub-fund has no maturity date. However, the manufacturer may decide to close the sub-fund under certain circumstances.

#### Objectives

The sub-fund aims to achieve the best possible return, relative to the risk taken by the sub-fund.

The sub-fund invests in fixed income and fixed income related securities issued by financial institutions, corporations, agencies, governments and municipalities while incorporating ESG criteria into the Fund's security analysis and selection criteria. These debt securities may include subordinated, hybrids, perpetual, convertible bonds and contingent convertible bonds. The sub-fund may invest up to 20% of its Net Asset Value in CoCos. Some investments of the sub-fund are expected to give it a higher risk and return than traditional securities due to a higher credit risk. The debt securities may be rated or unrated and have credit risk corresponding to investment Grade or High Yield.

The sub-fund may hold distressed debt securities or shares as a result of a restructuring. The sub-fund primarily invests in securities issued by companies domiciled or with a presence in the Nordic region.

The average interest rate duration of the sub-fund's portfolio shall be between 0 and 4 years.

The sub-fund may not invest more than 10% of its assets in other investment funds.

The sub-fund invests in derivatives to achieve its investment objective or to reduce risks.

The sub-fund qualifies as an Article 8 financial product under SFDR since its investment policy contains broad environmental, social, and governance consideration. More information on how the Investment Manager implements ESG issues in its investment analysis and decision-making process can be found at its website <http://www.paretoam.com>.

## What are the risks and what could I get in return?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

**Be aware of currency risk.** You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Liquidity risk, Currency risk, Derivatives risk, Counterparty risk, Operational risk

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.
