Report from the Investment Manager

To the Unitholders,

The Fund's main unit class "IC1 (EUR)" rose by 42.83% in 2014. The stated strategy of the Fund is to hold roughly a third of small, medium and large cap healthcare companies respectively, over time. This strategy renders the portfolio diversified and more balanced than otherwise. Another way in which the portfolio benefits from diversification is through its exposure to several different subsectors of healthcare, namely pharmaceuticals, biotechnology, medical technology and services.

In 2014, large cap healthcare companies outperformed small cap for the year overall, and did so particularly clearly in the period of contraction in biotech in March and April. The sharp fall was primarily caused by three events. Firstly, Gilead was called upon by the US House of Representatives to explain the 84,000 USD price per treatment of their new Hepatitis C drug Sovaldi. This caused concern that high priced medicines overall would be subject to scrutiny. Secondly, in the preceding 6 month period, the market had been flooded with IPOs and capital raisings to such an extent that it caused fatigue and severely affected share prices in both new listings and their more established peers. Lastly, Janet Yellen, the head of the Federal Reserve, stated that she expected the first interest rate hike "approximately 6 months after the completion of QE". This statement reminded the market that the low interest rate environment would not last forever, which triggered profit taking, particularly in growth stocks with high P/Es, many of which were biotech companies. The smaller cap companies were hit the hardest, and they also recovered more slowly, given that many of them were more immature and often more risky than their large cap peers. During this period of contraction, the Fund faired fairly well thanks to its distribution across large, medium and small cap companies.

All four subsectors within healthcare outperformed the general equity index in 2014. The best performer was again biotech, which contributed to just under half of the Fund's performance. Despite the setback described above, biotech outperformed thanks to maturing pipelines, strong sales and earnings growth, clinical success and in some cases more globalized sales exposure. The weakest subsector was pharma, but it still outdid the general market. Fundamentally, pharma had a good year with clinical achievements such as Bristol Myers' success with cancer immunotherapy PD-1 agent Opdivo in lung cancer, proving that this class of drugs is here to stay. However, share price-wise, this large pharma company probably reflects the fact that the new, most exciting pipeline agent is only expected to contribute to a small fraction of their sales 2015, given the size of their overall portfolio. The Services segment had a good year, mostly due to additional demand coming from Obamacare. Medtech performed in line with healthcare overall. Across all subsectors, M&A has been a noticeable trend, which has benefited the Fund both directly and indirectly.

A particularly exciting event during 2014 was the unprecedented launch of a new generation of Hepatitis C drugs, spearheaded by Gilead's Sovaldi. As mentioned above, the drug's hefty price tag triggered a series of discussions. However, when compared to the previous generation of HCV drugs available, and if weighted by its expected cure rate, Sovaldi is actually cheaper. Additionally, the side effect profile is much more benign for some genotypes. In the beginning of 2014, the most bullish market observers had estimated that the first full year sales figure for Sovaldi would reach 4 billion USD worldwide, which is a mega block buster. However, it seems that the actual number will be more than 11.6 billion USD, which is the biggest drug launch ever.

In the second half of 2014, the USD appreciated nearly 12% versus the Euro, creating a tailwind for the Fund's main unit class which is Euro denominated, while around 70% of the assets are US companies. Continued USD strength will benefit large European companies and create corresponding headwinds for internationally active US corporates. The headwind effect will be less noticeable for most US biotech companies given that the majority of their revenues originate in the US, but they also grow at such a hefty pace that the currency headwind will not be as much of a burden.

Report from the Investment Manager (continued)

On the macro front, the year kicked off with geopolitical uncertainty originated from the Ukraine/Russia conflict, which luckily remained fairly isolated. Another event that caused meaningful volatility especially in October was the Ebola outbreak in western Africa, and its potential to become a global epidemic. However, this also now appears to have been contained. The US economy continued to deliver strong economic data, while Europe lagged behind.

After another year of very strong performance in the Fund we still see good possibilities for a successful year for the healthcare sector. At the same time it is likely that the global economy surprises on the upside for the first time in many years, which in turn may suggest that cyclical stocks could outperform healthcare, which can be considered more defensive. During the second half of 2015 it is probable that interest rates will start rising in the US, which could be a catalyst for a sector rotation into cyclicals. Valuations are still not overly demanding, if compared to a longer historical perspective. Meanwhile, the drivers for the sector overall are solid; innovation is very strong, pipelines are maturing, the most meaningful patent cliff is behind us, Obamacare continues to add demand in the US. Emerging markets have become a significant part of most pharma and large biotech companies' revenues. Low penetration rates, rising purchasing power, improving life expectancy and increasing prevalence of chronic disease such as diabetes, Chronic Obstructive Pulmonary Disease and cancer all support Emerging Markets future demand growth for healthcare.

Notes to the financial statements

as at 31st December 2014

Note 1 - Significant accounting policies

a) Presentation of the financial statements

The financial statements of Fund are established in accordance with the Luxembourg legal and regulatory requirements concerning Undertakings for Collective Investment.

b) Valuation

- 1) The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received is deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof.
- 2) The value of assets, which are listed or dealt in on any stock exchange, is based on the last available price of the preceding business day on the stock exchange, which is normally the principal market for such assets.
- 3) The value of assets dealt in on any other regulated market which is recognised, operating regularly and open to the public (a "Regulated Market") is based on the last available price.
- 4) In the event that any assets are not listed or dealt in on any stock exchange or on any other Regulated Market, or if, with respect to assets listed or dealt in on any stock exchange, or other Regulated Market as aforesaid, the price as determined pursuant to sub-paragraph (2) or (3) is not representative of the fair market value of the relevant assets, the value of such assets will be based on the reasonably foreseeable sales price determined prudently and in good faith.
- 5) The liquidating value of options contracts not traded on exchanges or on other Regulated Markets is their net liquidating value determined, pursuant to the policies established by the Board of Directors, on a basis consistently applied for each different variety of contracts. The liquidating value of futures, forward or options contracts traded on exchanges or on other Regulated Markets are based upon the settlement or closing prices of these contracts on the preceding business day on exchanges and Regulated Markets on which the particular futures, forward or options contracts are traded by the Fund; provided that if a futures, forward or options contract could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract shall be such value as the Board of Directors of the Management Company may deem fair and reasonable.
- 6) Units or shares of open-ended underlying funds are valued at their last determined and available Net Asset Value or, if such price is not representative of the fair market value of such assets, then the price shall be determined by the Board of Directors of the AIFM on a fair and equitable basis and in good faith.
- 7) All other securities and other assets are valued at fair market value as determined in good faith pursuant to the procedures established by the AIFM.

c) Net realised gain/ (loss) on sales of securities

The net realised gain/ (loss) on sales of securities is determined on the basis of the average cost of securities sold.

Note 2 - Subscription, Redemption and Conversion fees

The Offer price per unit as well as the Redemption price per unit is equivalent to the Net Asset Value per unit of the relevant class (or Gross Net Asset Value with respect to the subscription of Class IC2 Units) increased by the subscription fee of the respective unit class for subscriptions and decreased by the redemption fee of the respective unit class for redemptions as indicated hereafter:

	Subscription fee	Redemption fee	Conversion fee
Unit class R	max 3%	max 3%	max 3%
Unit class I	max 3%	max 3%	max 3%

The subscription, redemption and conversion fee will revert to the Placement and Distribution Agent, i.e. Rhenman & Partners Asset Management AB (until 22nd July 2014), SEB Fund Services S.A. (since 22nd July 2014).

Note 3 - Management fees

The Management Company is entitled to receive out of the Sub-Fund's assets a management fee payable monthly in arrears based on the Sub-Fund's net assets calculated monthly, of:

- maximum 2.075% p.a. for the classes RC1 (SEK) and RC1 (EUR),
- maximum 1.575% p.a. for the classes RC2 (SEK), IC1 (EUR), ID1 (SEK) and IC3 (EUR),
- maximum 1.075% p.a. for the classes IC2 (EUR), IC2 (SEK) and IC2 (USD),
- maximum 0.825% p.a. for the class IC4 (EUR).

These rates include the fees payable to the Portfolio Manager for its services whose applicable rates at the date of the report are the following:

- 2.00% p.a. for the classes RC1 (SEK) and RC1 (EUR),
- 1.50% p.a. for the classes RC2 (SEK), IC1 (EUR), ID1 (SEK) and IC3 (EUR),
- 1.00% p.a. for the classes IC2 (EUR) IC2 (SEK) and IC2 (USD),
- 0.75% p.a. for the class IC4 (EUR).

Notes to the financial statements (continued)

as at 31st December 2014

Note 4 - Performance fee

The Portfolio Manager is also entitled to receive a performance fee, payable out of the Sub-Fund's assets.

Calculation of the performance fee for all classes except for Class IC4 (EUR)

The performance fee is calculated and accrued monthly in the respective unit classes as described below and is paid out quarterly in arrears. The first period ended on 30th June 2009 and being followed by each successive quarter thereafter (the "Calculation Period").

For each Calculation Period, the performance fee in respect of each unit is equal to 20% (10% for the Class IC3 (EUR) Unit) of the appreciation in the Gross Asset Value per each unit of that class during the Calculation Period above the Base Net Asset Value per each unit of that class. For Class D Units the Gross Net Asset Value (GNAV) used for the calculation of the Performance Fee will be adjusted by any dividend distributions made during the relevant Calculation Period.

The Gross Net Asset Value is calculated after the accrual of all fees but prior to the accrual of any Performance Fee on the relevant Valuation Day.

The Base Net Asset Value per each unit is the greater of the Net Asset Value of that unit at the time of issue of that Unit multiplied by the 3 months EURO Interbank Offered Rate on the last bank business day of the previous calculation period adjusted for monthly return and the highest NAV of that Unit achieved as of the end of any previous Calculation Period (if any) during which such unit was in issue multiplied by the 3 months EURO Interbank Offered Rate for the relevant calculation period adjusted for monthly return.

For the Class IC2 units, certain adjustments will be made to reduce inequities that would occur for investors subscribing for Units at a time when the Net Asset Value per Unit is other than the Base Net Asset Value per Unit (Equalisation).

For Class IC4 (EUR)

For Class IC4 (EUR) Unit, the performance fee is calculated and accrued monthly and is paid out annually in arrears. The Calculation Period will start on 1st January and end on 31st December each year. For each Calculation Period, the performance fee in respect of each unit is equal to 10%.

The Portfolio Manager shall be entitled to a Performance Fee if the Sub-Fund produces an excess performance, defined as any positive difference between the performance of the current Gross Net Asset Value (GNAV) per Unit and the Base Net Asset Value per Unit for the same calculation period. If the difference is negative, excess performance is defined to be zero, and in such case the Portfolio Manager is not entitled to a Performance Fee and the negative performance at the end of any Calculation Period will not be carried forward to the next Calculation Periods. A Performance Fee will only be paid if the excess performance is above a 5% annual hurdle rate and if that is the case the Performance Fee will be calculated on the entire difference between the GNAV and the Base Net Asset Value.

The GNAV is calculated after the accrual of all fees but prior to the accrual of any Performance Fee on the relevant Valuation Day.

The Base Net Asset Value per each Unit is equal to the Net Asset Value of that Unit at the end of the previous Calculation Period.

Notes to the financial statements (continued)

as at 31st December 2014

In the case of Units redeemed during a Calculation Period, the accrued Performance Fee in respect of those Units shall be crystallized and subsequently paid to the Portfolio Manager at the end of the Calculation Period.

At the date of the report, a performance fee of EUR 23,454,277.49 was recorded for the Sub-Fund.

Note 5 - Central administration costs

Out of the Sub-Fund's assets an administration fee of maximum 0.135% p.a. is payable to the Management Company monthly in arrears based on the Sub-Fund's average net assets calculated monthly. This fee includes the fee due to the Depositary. However the Management Company is entitled to a minimum monthly administration fee of EUR 3,333 payable monthly in arrears to the Management Company.

Note 6 - Subscription duty ("taxe d'abonnement")

The Fund Company is governed by Luxembourg law.

Pursuant to the legislation and regulations in force, the Fund is subject to an annual subscription duty ("taxe d'abonnement") of 0.05% which is payable quarterly and calculated on the basis of the net assets of each sub-fund on the last day of each quarter.

Pursuant to Article 175 (a) of the amended law of 17th December 2010 the net assets invested in Undertakings for Collective Investment already subject to the "taxe d'abonnement" are exempt from this tax.

The rate of this tax may be reduced to 0.01% of the value of the net assets for Sub-Funds or classes of units reserved to institutional investors.

Note 7 - Pledged assets
