# Monthly update

Politics, central banks and weakening economic prospects continued to dominate the world's capital markets in September. Despite a number of concerns, however, stock markets continued to recover, even though individual sector performances varied significantly. Perhaps most noteworthy was the surge in low-valued value stocks. Among other news, banks had their best month for some time while many growth companies considerably underperformed, in contrast to the performance of recent years.

Central banks continued to ease monetary policy, and both the US Federal Reserve and the European Central Bank (ECB) announced interest rate cuts at their September meetings. The ECB also announced that it was resuming its quantitative easing programme, and its outgoing president, Mario Draghi, called for fiscal policy measures. The trade dispute between the United States and China

persisted without any major news, and a new meeting will be held on 10 October. However, the dispute was eclipsed by an unexpected development in US domestic policy: A whistleblower accused President Trump of having exerted pressure on the president of Ukraine in order to get at his political opponent, Joe Biden. The Democrats then announced their intention to initiate impeachment proceedings against the president. However, since the whole affair might also take down Biden, the main contender for the Democratic presidential candidacy, Elizabeth Warren, jumped ahead in opinion polls. Massachusetts Senator Warren is perceived as being hostile to business and her successes likely played a role in the month's weak

performance for some sectors, not least healthcare.
In the UK, Boris Johnson met with increasingly tough resistance to his stance that the UK would leave the EU on 31 October, with or without a deal. Among other events, the UK's Supreme Court annulled the decision to suspend parliament until mid-October. A no-deal Brexit now appears to be highly unlikely, and negotiations with the EU continue. The question of the border between Ireland and Northern Ireland is, as before, one of the critical issues.

The tense situation in the Middle East intensified when Iran-backed Houthi rebels attacked oil sites in Saudi Arabia, sending the price of oil surging. However, production was restored relatively quickly and the price fell back.

Overall, the world index measured in Euro rose 2.7 percent in September. All sectors noted gains, with banks and energy companies in the lead while healthcare and consumer staples lagged behind. All regions performed favourably, with Japan and Europe at the head of the pack while the United States and Hong Kong recorded more modest gains.

#### **FUND PERFORMANCE**

The fund decreased 5.5 percent, measured in its main share class IC1 (EUR), and decreased 6.3 percent measured in RC1

The month's best contributors to the fund were Roche and Seattle Genetics. The worst contributors were Novocure and G1 Therapeutics.

Increased political uncertainties, particularly in the US, created a greater risk aversion among healthcare investors in September. Weak macro numbers added to the risk-off sentiment. This primarily affected our small and mediumsized companies, both in biotechnology and medical technology. The sub-sector that saw the most success was pharmaceuticals. Companies with relatively low valuations did especially well, with some of the European companies taking the lead. The Swiss pharmaceutical company Roche announced highly promising results for Tecentriq, the company's immune-oncology drug for the treatment of several different tumour types, at the major cancer conference ESMO. This news positively impacted the

Continued on the next page -

company's share price. Roche is one of the fund's largest holdings, and was thus the best contributor to the fund

during the month.

Seattle Genetics is a US biotechnology company that specialises in antibody-based cancer therapies. The company has a leading platform within antibody-drug conjugates (ADC), a technology designed to exploit the expression of the antibodies for targeted treatment. This is accomplished by arming the antibody with cancer-fighting properties, which makes it possible to reduce the toxic effect compared to traditional chemotherapy treatment. During ESMO, the company presented highly positive Phase 1 data for enfortumab vedotin (EV-103) in urinary bladder cancer. The response rate clearly exceeds what existing treatments achieve, which may mean a greater market potential than previously anticipated for the product. The stock rose sharply on the positive news.

Novocure is a US medical device company that has developed a new technology for the treatment of cancer. The company's therapy uses electric fields tuned to specific frequencies to disrupt cell division and thus inhibit tumour growth. The company's technology has been approved for the treatment of glioblastoma (two indications) and, most recently, also for the treatment of mesothelioma, an aggressive form of lung cancer. Several studies are underway in other cancer indications, and investors are beginning to seriously set their sights on the company's potential to further broaden the field of application. The stock has displayed strong performance during the year, and is the fund's best contributor so far this year despite the

downturn in September.

G1 Therapeutics is a US biotechnology company specialising in cancer therapies. The company's most advanced development project, trilaciclib, aims to reduce the side effects that patients experience while undergoing chemotherapy. Chemotherapy cannot differentiate between healthy cells and cancer cells, which means that all rapidly dividing cells are affected. Cells formed in the bone marrow, including white blood cells, red blood cells and platelets, are primarily affected. This so-called myelosuppression often leads to complications and, in many cases, to a suboptimal dose for treating the cancer effectively. In clinical trials, the company has demonstrated that trilaciclib preserves the function of the bone marrow. Trilaciclib thus has the potential to improve the efficacy of the chemotherapy treatment as well as to improve survival rates, although this remains to be proven. After the stock's strong rally in August, which continued into the first weeks of September, we saw a major dip at the close of the month that was caused by profit-taking.

#### **OUTLOOK**

A major dip in the share prices of biotechnology and small and medium-sized companies adversely affected the fund after Nancy Pelosi, speaker of the US House of Representatives, announced the initiation of an impeachment inquiry against President Trump. Apart from the general uncertainty created by this news, investors see a risk that the impeachment proceedings will primarily benefit Elizabeth Warren, the Democratic presidential candidate. The impeachment proceedings will not only hit President Trump hard, but will also likely be bad news for Joe Biden, which is the reason for Trump's initial interest in Ukraine. Elizabeth Warren was rising in public opinion polls during the late summer, and this trend gained momentum during the last ten days of September. Warren is considered to be left-leaning within the Democratic Party and has relatively extensive, radical reform proposals on a number of issues including taxes, antitrust legislation, business ethics and consumer protection. During the year she has supported Bernie Sanders' proposal for universal health insurance for all citizens, a single-payer system. She has also supported House Speaker Nancy Pelosi's proposal for central price negotiations for pharmaceuticals. However, her own proposals in health care are relatively few and unspecific. Many (but not all) perceive her as a reformist of the current system rather than a revolutionary despite her rather tough and radical choice of words. She herself has put forward a unique, rather unusual proposal that the federal government should manufacture its own generic drugs if no company is manufacturing the generics or if competition is lacking possibly a sign that she advocates streamlining today's drug supply issues rather than undertaking major reforms.

The temperature of the stock market is rising. The combination of economic uncertainty, the US election and the impeachment inquiry is tempering risk appetite. Our small and medium-sized enterprises in particular are taking a hit. Service companies, such as insurance companies, are also no longer stable and defensive judging from the price of their stocks. They too could be affected by changing business conditions after the 2020 election, and they are not completely insensitive to business cycles either. The major pharmaceutical companies, which comprise about one fifth of the fund, are currently the least affected since they have the greatest risk diversification, both geographically and in terms of products, as well as low sensitivity to the business cycle. The turmoil might last for some time. However, we believe that the risk of major US healthcare and drug reforms seriously impairing the profitability of our companies has hardly increased because of recent developments. Rather, they have served as a reminder that the 2020 election will be a passionate one, full of intrigue and – not least – hard to predict. A future President Elizabeth Warren will have the same complexity, inertia and resistance to change that Bill Clinton and Barack Obama had in their time.

The sector's profitability and good future prospects should

likely remain.

#### **ABOUT RHENMAN & PARTNERS**

Rhenman & Partners Asset Management, founded in 2008, is a Stockholm-based investment manager focusing on two niche funds administered by FundRock Management Company S.A.: Rhenman Healthcare Equity L/S, founded in 2009, and Rhenman Global Opportunities L/S, founded in 2016. Assets under management amount to approximately EUR 600m. Investment Teams of both Funds are in their investment processes supported by renowned Advisory Boards, including professors and experts with many years of market experience and extensive networks around the world.

# Legal Disclaimer

Rhenman Healthcare Equity L/S ("the Fund") is not an investment fund as defined in the European Union directives relating to undertakings for collective investment in transferable securities (UCITS). Legal information regarding Fund is contained in the Prospectus and the KIID. available at Rhenman & Partners Asset Management AB (Rhenman & Partners) webpage: http://rhepa.com/the-fund/prospectus/.

This material has been prepared by Rhenman & Partners for professional and non-professional investors. Rhenman & Partners when preparing this information has not taken into account any one customer's particular investment objectives, financial resources or other relevant circumstances and the opinions and recommendations herein are not intended to represent recommendations of particular investments to particular customers. This material is for informational purposes only and should not be construed as an offer or solicitation to sell or buy units in the Fund. Investors is strongly recommended to get professional advice as to whether investment in the Fund is appropriate having regard to their particular investment needs, objectives and financial circumstances before investing.

All securities' transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk. There can be no assurance that an investment in the Fund will achieve profits or avoid incurring substantial losses. There is a high degree of risk inherent in investments and they may not be suitable for all eligible investors. It is possible that an investor may lose some or all of its investment. The past is not necessarily a guide to the future performance of an investment. The value of investments may fall as well as rise and investors may not get back the amount invested. Changes in rates of foreign exchange may cause the value of investments to go up or down.

Before making an investment decision, an investor and/or its adviser should (i) consider the suitability of investments in the Fund with respect to its investment objectives and personal situation and (ii) consider factors such as its personal net worth, income, age, risk tolerance and liquidity needs. Short-term investors and investors who cannot bear the loss of some or all of their investment or the risks associated with the limited liquidity of an investment should not invest.

Due care and attention has been used in the preparation of this information. However, actual results may vary from their forecasts, and any variation may be materially positive or negative. Forecasts, by their very nature, are subject to uncertainty and contingencies, many of which are outside the control of Rhenman & Partners. Rhenman & Partners cannot guarantee that the information contained herein is without fault or entirely accurate. There may be

delays, omissions or inaccuracies in the information. Any dated information is published as of its date only and no obligation or responsibility is undertaken to update or amend any such information.

The information in this material is based on sources that Rhenman & Partners believes to be reliable. Rhenman & Partners can however not guarantee that all information is correct. Furthermore, information and opinions may change without notice. Rhenman & Partners is under no obligation to make amendments or changes to this publication if errors are found or opinions or information change. Rhenman & Partners accepts no responsibility for the accuracy of its sources.

Rhenman & Partners is the owner of all works of authorship including, but not limited to, all design text, images and trademarks in this material unless otherwise explicitly stated. The use of Rhenman & Partners' material, works or trademarks is forbidden without written consent except where otherwise expressly stated. Furthermore, it is prohibited to publish material made or gathered by Rhenman & Partners without written consent.

By accessing and using the http://rhepa.com/ website and any pages thereof, you acknowledge that you have reviewed the following important legal information and understand and agree to the terms and conditions set therein. If you do not agree to the terms and conditions in this disclaimer, do not access or use the http://rhepa.com/website in any way.

Products and services described herein are not available to all persons in all geographical locations. Rhenman & Partners will not provide any such products or services to any person if the provision of such services could be in violation of law or regulation in such person's home country jurisdiction or any other related jurisdiction. The units of the Fund may not be offered or sold to or within the United States or in any other country where such offer or sale would conflict with applicable laws or regulations.

In no event, including (but not limited to) negligence, will Rhenman & Partners be liable to you or anyone else for any consequential, incidental, special or indirect damages (including but not limited to lost profits, trading losses and damages).

The sole legally binding basis for the purchase of shares of the Fund described in this information is the latest valid sales prospectus with its terms of contract. Subscriptions cannot be received on the basis of financial reports.

An investment in the Fund does not represent deposits or other liabilities of any member of the Rhenman & Partners Group. Neither Rhenman & Partners nor any member of the Rhenman & Partners Group and its affiliates guarantees in any way the performance of the Fund, repayment of capital from the Fund, any particular return from or any increase in the value of the Fund.
