MONTHLY UPDATE

After some gains right at the outset of the month, April was again marked by the war in Ukraine and rising inflation concerns with global stock markets falling more than in any single month since the first Covid outbreak two years ago. At the same time, longterm bond yields rose sharply, making the greatest impact on highly valued growth companies, and Nasdaq posted its worst month since 2008.

Investors' risk aversion was evident

Although outcomes from the first quarter's earnings season were generally good, investors' increasing risk aversion was evident, especially for companies whose earnings fell short of expectations. For example, Netflix and Amazon, two of the past decade's top stocks, posted sharp declines as reports indicated slower growth.

The war in Ukraine continued albeit in a somewhat different form, as the Russians moved troops and concentrated on the eastern parts of the country. The withdrawal from areas around Kiev laid bare extensive war crimes against the civilian population. This prompted widespread condemnation from around the world and triggered new sanctions and more shipments of weapons from both the EU and the US. The negotiation attempts that took place in March and early April appeared to fizzle out when both Russia and Ukraine announced that they considered them futile.

Europe's energy supply in continued focus

Russia's primary leverage against Western Europe - energy remained in focus. Gas supplies to Poland and Bulgaria were cut off towards the end of the month, with the hint of similar measures being introduced against other countries going forward. At the same time, the EU tried to agree on a complete phase-out of oil imports from Russia before the end of the year. However, since replacing Russian oil and gas in such a short time is hardly realistic, concerns grew over upcoming rationing which could hit economic growth in Europe, particularly in Germany.

Lockdowns in China affected strained supply chains

Another concern in April was the continuation of the harsh lockdowns in China as the country maintained its zero-tolerance policy towards Covid. This put already strained supply chains at further risk of continued disruption. The direct effects of the war in Ukraine also made themselves felt in April, when shipments of goods like grain and vehicle components were seriously impacted.

IC1 (EUR) -10.60%

Despite the somewhat gloomy economic outlook, persistently high inflation figures meant that central banks continued to warn of interest rate hikes, particularly from several members of the US Federal Reserve. In contrast, statements from Europe's central bank, the ECB, were somewhat more cautious.

In March, stock markets fared surprisingly well and, after the initial decline following the outbreak of war, they recovered strongly. On the other hand, the direct and indirect effects of the continuing war and increasing concerns over interest rates had a major impact, sending down world indices more than in a very long time. However, the differences between sectors and regions were substantial: Consumer staples and energy companies rose, while consumer discretionary and information technology fell the most. As for the major stock exchanges, Hong Kong and London were alone in remaining virtually unchanged, while the rest, led by Nasdaq, posted sharp declines.

FUND PERFORMANCE

In April, the fund decreased by 4.5 percent in its main share class IC1 (EUR). In addition to the challenging macro environment and the effects of the war in Ukraine, the period was largely marked by the earnings season for the first quarter. Global pharmaceutical companies, together with US insurance companies and pharmaceutical distributors, were least affected by the greater financial uncertainty, which was also confirmed by strong interim reports. Investors' reduced risk appetite impacted negatively on companies with high valuations and weak balance sheets. Companies affected by component shortages and/or weakened

Continued on the next page \rightarrow

RC1 (SEK)

-10.45%

demand as a result of diminished purchasing power among consumers also underperformed.

The month's best contributors for the fund were Merck & Co. and Eli Lilly. The worst contributors were Align Technology and Alnylam Pharmaceuticals.

Merck & Co. benefited from low valuations and a strong report

Merck is a US pharmaceutical company. The company has been criticized for being a 'one-trick pony' since its cancer drug Keytruda accounts for about a third of sales, and investors are calling for greater transparency into how the company will handle Keytruda's upcoming patent expiration at the end of this decade. However, the stock benefited in April from its low valuation as well as the company's solid balance sheet. A strong quarterly report that beat market expectations, not least through high sales of Lagevrio, an antiviral drug for treating Covid, also helped boost share price performance during the month.

Eli Lilly's successful Phase 3 trial boosted the stock in April

Eli Lilly is a US pharmaceutical company focused on diabetes, cancer and immunological diseases in all major global markets with extensive medical needs. Thanks to several successful product launches, the company has one of the more attractive growth profiles in the sector. During the period, Eli Lilly presented the results of a Phase 3 trial of tirzepatide, a combined GIP/GLP-1 agonist, in obesity. The results were slightly better than expected, and the company now hopes to apply for FDA approval slightly earlier than planned. Sales of tirzepatide in diabetes and obesity will be critical to the company's future growth opportunities along with donanemab, Lilly's antibody that reduces amyloid plaque in Alzheimer's patients.

Align Technology saw lower demand

Align is a US medical technology company focused on orthodontic treatment. The company is a market leader in the clear aligner segment, where Align's Invisalign brand competes with traditional braces. Align has successfully created a profitable growth market for orthodontic treatment, which patients themselves largely finance. However, first-quarter sales were worse than expected due partly to the high transmission of Omicron, partly to a slowdown in the Chinese market and also due to lower overall demand. The company chose to withdraw its full-year outlook for 2022, citing the difficulty of assessing how quickly demand might stabilize. The stock fell sharply to the detriment of fund returns during the period.

Currency effects and Omicron adversely impacted Alnylam Pharmaceuticals

Alnylam is a US biotechnology company specialized in developing drugs based on RNA interference. The phenomenon of RNA interference means that double-stranded RNA can regulate gene expression. Drugs can exploit this principle to silence the expression of genes and thus influence the course of a disease. Alnylam has

successfully developed three drugs, all of which are based on the principle of regulating gene expression: Onpattro for the treatment of hereditary amyloidosis, a disease that leads to heart failure; Givlari for acute hepatic porphyria, a condition in which the lack of an enzyme affects liver function; and Oxlumo for primary hyperoxaluria type 1, a severe form of kidney stones.

The high spread of Omicron at the beginning of the year, together with currency effects, negatively impacted sales during the first quarter which were lower than expected. The company also lowered its full-year outlook having taken into account a delayed approval of its new product Vutrisiran. The stock reacted negatively to the heightened uncertainty.

OUTLOOK

April was a very weak month for growth companies on the Nasdaq in the US. The toxic combination of increased inflation resulting from a myriad of bottlenecks in both industrial production and the service sector, the war in Ukraine, and new lockdowns in China severely suppressed investors' risk appetite. Additionally, rising interest rates and the increasingly hawkish tone of the central banks, caused many investors to reduce their positions.

Continued high uncertainty in the market

We are, on several points, inclined to be slightly more optimistic. We assess that inflation will peak during the year, perhaps as early as the first half of the year. In addition, we believe that the risk of a global recession this year is low. Earnings growth looks to be decent for 2022, which is remarkable given the widespread concerns about stagflation. However, all this is no guarantee of a strong stock market. The market probably wishes to see central banks starting to put an end to their austerity measures, which would probably take at least six months. The US market is taking a positive view of the unlikelihood of the Democrats winning the congressional elections in November but cannot take it for granted.

As far as the war in Ukraine is concerned, many of us are worried that it will spread and become a world war. We have not yet seen the contours of a stalemate, which would balance both sides, or better still, a compromise of any kind. A Russian withdrawal seems to be a distant prospect but this is probably not a prerequisite for a rise in the stock market. The widespread lockdowns in China, which are part of their Covid-19 response, and which have subdued both the domestic and the global economy since the outbreak of Omicron, are expected to ease in the second half of the year. The healthcare sector has the potential to perform well in this uncertain environment. We continue to focus the fund's holdings on large companies whose profits are only moderately affected by lower growth and higher interest rates. We expect that the share prices of small research companies and mid-sized growth companies will bounce back as the clouds over the global economy disperse.

ABOUT RHENMAN & PARTNERS

Rhenman & Partners Asset Management AB ("Rhepa") was founded in 2008 and is a Stockholm-based asset manager with a focus on the healthcare sector. Rhepa is responsible for the portfolio of a sector fund registered in Luxembourg: Rhenman Healthcare Equity L/S. The fund is managed by FundRock Management Company S.A. who has commissioned Rhepa to manage the fund's portfolio. Rhepa's experienced investment team is supported by a scientific advisory board consisting of medical experts with a global network of researchers and specialists.

Legal Disclaimer

Rhenman Healthcare Equity L/S ("the Fund") is not an investment fund as defined in the European Union directives relating to undertakings for collective investment in transferable securities (UCITS). Legal information regarding Fund is contained in the Prospectus and the KIID. available at Rhenman & Partners Asset Management AB (Rhenman & Partners) webpage: http://rhepa.com/the-fund/prospectus/.

This material has been prepared by Rhenman & Partners for professional and non-professional investors. Rhenman & Partners when preparing this information has not taken into account any one customer's particular investment objectives, financial resources or other relevant circumstances and the opinions and recommendations herein are not intended to represent recommendations of particular investments to particular customers. This material is for informational purposes only and should not be construed as an offer or solicitation to sell or buy units in the Fund. Investors are strongly recommended to get professional advice as to whether investment in the Fund is appropriate having considered particular investment needs, objectives and financial circumstances before investing.

All securities' transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk. There can be no assurance that an investment in the Fund will achieve profits or avoid incurring substantial losses. There is a high degree of risk inherent in investments and they may not be suitable for all eligible investors. It is possible that an investor may lose some or all of its investment. The past is not necessarily a guide to the future performance of an investment. The value of investments may fall as well as rise and investors may not get back the amount invested. Changes in rates of foreign exchange may cause the value of investments to go up or down.

Before making an investment decision, an investor and/or its adviser should (i) consider the suitability of investments in the Fund with respect to its investment objectives and personal situation and (ii) consider factors such as its personal net worth, income, age, risk tolerance and liquidity needs. Short-term investors and investors who cannot bear the loss of some or all of their investment or the risks associated with the limited liquidity of an investment should not invest.

Due care and attention has been used in the preparation of this information. However, actual results may vary from their forecasts, and any variation may be materially positive or negative. Forecasts, by their very nature, are subject to uncertainty and contingencies, many of which are outside the control of Rhenman & Partners. Rhenman & Partners cannot guarantee that the information contained herein is without fault or entirely accurate. There

may be delays, omissions or inaccuracies in the information. Any dated information is published as of its date only and no obligation or responsibility is undertaken to update or amend any such information.

The information in this material is based on sources that Rhenman & Partners believes to be reliable. Rhenman & Partners can however not guarantee that all information is correct. Furthermore, information and opinions may change without notice. Rhenman & Partners is under no obligation to make amendments or changes to this publication if errors are found or opinions or information change. Rhenman & Partners accepts no responsibility for the accuracy of its sources.

Rhenman & Partners is the owner of all works of authorship including, but not limited to, all design text, images and trademarks in this material unless otherwise explicitly stated. The use of Rhenman & Partners' material, works or trademarks is forbidden without written consent except where otherwise expressly stated. Furthermore, it is prohibited to publish material made or gathered by Rhenman & Partners without written consent.

By accessing and using the http://rhepa.com/ website and any pages thereof, you acknowledge that you have reviewed the following important legal information and understand and agree to the terms and conditions set therein. If you do not agree to the terms and conditions in this disclaimer, do not access or use the http://rhepa.com/website in any way.

Products and services described herein are not available to all persons in all geographical locations. Rhenman & Partners will not provide any such products or services to any person if the provision of such services could be in violation of law or regulation in such person's home country jurisdiction or any other related jurisdiction. The units of the Fund may not be offered or sold to or within the United States or in any other country where such offer or sale would conflict with applicable laws or regulations.

In no event, including (but not limited to) negligence, will Rhenman & Partners be liable to you or anyone else for any consequential, incidental, special or indirect damages (including but not limited to lost profits, trading losses and damages).

The sole legally binding basis for the purchase of shares of the Fund described in this information is the latest valid sales prospectus with its terms of contract. Subscriptions cannot be received on the basis of financial reports.

An investment in the Fund does not represent deposits or other liabilities of any member of the Rhenman & Partners Group. Neither Rhenman & Partners nor any member of the Rhenman & Partners Group and its affiliates guarantees in any way the performance of the Fund, repayment of capital from the Fund, any particular return from or any increase in the value of the Fund.
