## What is this product?

#### Type

Investment Fund (F.C.P.), Luxembourg

#### Term

This sub-fund has no maturity date. However, the alternative investment fund manager may decide to close the sub-fund under certain circumstances.

#### Objectives

The sub-fund's objective is to create value for its investors, in the form of total return, with a focus on investments in the health sector. The sub-fund aims to perform better than traditional equity funds by both buying and short selling shares. Total return is achieved by investing in a global equity portfolio with a focus on health, equity derivatives, derivatives on equity indices, convertible bonds and exchange traded funds and other equity related derivative instruments, including swaps.

The sub-fund is not a UCITS and is comparable to a Swedish Special Fund (Specialfond). Fundamental analysis of the selected companies is used to select the investments, ie analysis of their business strategy, financial status and future projections. In addition, advice from experts in medical research may be sought as part of the decision making process. The sub-fund's portfolio of stocks is traded frequently as an integral part of the sub-fund's investment strategy.

The sub-fund may invest in money market instruments and other financial instruments for long periods and may invest up to 100% of its value in such instruments. The sub-fund may enter into currency derivative contracts to reduce its exposure to currency fluctuations.

The sub-fund may not invest more than 10% of its assets in other funds. The sub-fund's leverage, i.e. borrowing and derivatives exposure, may not exceed a total of 300% of the NAV.

**Benchmark:** The sub-fund is managed with reference to the EURIBOR 3M (the "Benchmark") for the purpose of performance fee calculation only.

#### Intended retail investor

This product is suitable for institutional investors who would invest in specific portfolio of assets. Each portfolio of assets will be invested for benefit of relevant subfund. Investors must be prepared to accept volatility and potential capital losses and may therefore be inappropriate for investors who plan to withdraw

## Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.
