What is this product?

Type:

This product is a UCITS Fund.

Term:

This product is open-ended which means it has no fixed term or maturity. The fund may be terminated if:

- the Shareholders of the Fund pass a special resolution to approve the redemption of all the Shares in the Fund; or
- after the first anniversary of the Closing Date for the relevant Fund or Class (as appropriate) if the Net Asset Value of the relevant Fund or Class (as appropriate) falls below the figure specified in the Relevant Supplement;
- if the Management Company in consultation with the Company deems it appropriate because of adverse, political, economic, fiscal or regulatory changes affecting the Fund or Class; and
- the Depositary has served notice of its intention to retire under the terms of the Depositary Agreement (and has not revoked such notice) and no new depositary has been appointed by the Management Company with the approval of Central Bank within 90 days of the date of service of such notice.

Objectives:

The Fund's objective is to outperform the ICE BofA Euro Corporate & Total Return EUR Index by 0.50% per annum over rolling three year periods (gross of fees) by investing in bonds that are deemed to make a positive contribution to society. The Fund will seek to achieve its objective on an active basis. The Investment Manager may use instruments which are not included in the Benchmark.

The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social and governance ("ESG") management alongside financial analysis. A bespoke positive screen is conducted which proactively assesses global companies against the Investment Manager's sustainability criteria and process. In addition to the positive screen, a negative screen is also conducted. The Fund will avoid investing in tobacco and armament manufacturers, nuclear-power generators and companies that conduct

animal testing.

The Fund will invest at least 80% of its Net Asset Value in Euro denominated fixed and/or floating rate investment grade corporate debt securities, including bonds and floating rate notes which are listed or dealt on Recognised Markets. The Investment Manager may invest the remainder, up to a maximum of 20% of its NAV in fixed and/or floating rate sub-investment grade and non-rated, corporate debt securities, investment grade government and government agency bonds, cash and index linked bonds.

The fixed and floating rate debt securities in which the Fund will invest will include all types of debt obligations including bonds (corporate and sovereign), structured bonds and other products such as hybrid or preferred securities as detailed in the Prospectus. The Fund will also invest in notes of varying maturities, treasury bills, index-linked notes, floating rate notes issued by corporate and financial issuers, asset backed securities and mortgage backed securities and up to 5% of its NAV in private placements which are consistent with its objective.

No more than 10% of the NAV of the Fund will be invested in emerging markets. The Fund may also invest up to 10% in other investment funds, known as collective investment schemes, including funds managed by the Investment Manager or another Royal London group company as well as eligible exchange traded funds.

The Fund may use financial derivative instruments for efficient portfolio management and hedging purposes only. Investors should refer to the investment techniques and instruments described under "Fund Investment Techniques" and "Investment Risks" in the Prospectus. In particular, the Fund may use spot and currency forward contracts to hedge the non-Base Currency positions in the Fund back to the Base Currency in order to reduce currency risk. Index futures and bond futures contracts may also be used for the purpose of efficient portfolio management.

Intended retail investor:

This Fund is suitable for retail investors with basic knowledge of financial markets. The Fund is suitable for investors with both income and growth objectives, and a long investment time horizon. The Fund is not suitable for investors who cannot bear any level of loss or are looking for a level of guaranteed preservation of capital. The maximum loss possible is the value of the investment made by the investor.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance and poor market conditions could impact the value of your investment. There are no assurances that the objective of the product will be achieved and the value of your investment may fall and you may get back less than you invested.

In addition to market risk, this product is also exposed to risks associated with credit, liquidity, exchange rate and interest rate movements, and the responsible investment strategy.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund or benchmark over the last 10 years. The stress scenario shows what you might get back in extreme market circumstances.

What happens if FundRock Management Company S.A. is unable to pay out?

Client money invested in the fund is held in a segregated account and should the Fund be terminated, the value of assets available in the fund will be distributed after all other liabilities have been paid.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is GBP 10,000.

Investment: GBP 10,000	If you exit after 1 year	If you exit after 5 years
Total costs	45 GBP	308 GBP
Annual cost impact (*)	0.4%	0.5%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.9% before costs and 7.4% after costs.
