What is this product?

Type:

This product is a UCITS Fund.

Term:

This product is open-ended which means it has no fixed term or maturity. The fund may be terminated if:

- the Shareholders of the Fund pass a special resolution to approve the redemption of all the Shares in the Fund; or
- after the first anniversary of the Closing Date for the relevant Fund or Class (as appropriate) if the Net Asset Value of the relevant Fund or Class (as appropriate) falls below the figure specified in the Relevant Supplement;
- if the Management Company in consultation with the Company deems it appropriate because of adverse, political, economic, fiscal or regulatory changes affecting the Fund or Class; and
- the Depositary has served notice of its intention to retire under the terms of the Depositary Agreement (and has not revoked such notice) and no new depositary has been appointed by the Management Company with the approval of Central Bank within 90 days of the date of service of such notice.

Objectives:

The investment objective of the Fund is to achieve a high level of income on an active basis. The Fund seeks to achieve a gross redemption yield of 1.25 times the gross redemption yield of the FTSE Actuaries British Government 15 years index (the "Benchmark") i.e. to achieve a yield 25% higher than the index. The gross redemption yield is the yield a portfolio would have if the portfolio was held until the maturity date of each stock in that portfolio and factors in potential capital gains and losses at maturity. The Benchmark is a rules-based index which is representative of Sterling

British government securities with 15 years to maturity and is being used by the Fund for performance comparison purposes only and the Fund does not intend to track or be constrained by reference to the Benchmark.

The Fund seeks to achieve its investment objective by investing at least 75% of its assets in Sterling denominated securities traded principally on the London Stock Exchange or over the counter markets. The Fund may also invest up to 25% of its assets in non Sterling denominated securities traded principally on European, U.S., Canadian and Australian exchanges or over the counter markets. The Fund seeks to achieve its investment objective by investing its assets in a diversified portfolio of fixed-income debt securities or floating rate debt securities, preference shares and interest bearing shares. It may also invest up to 25% of its assets in convertible securities.

The Fund will invest in investment, sub-investment grade and non rated debt securities. The Fund may invest up to 100% of its assets in investment grade bonds, up to 75% of its assets in sub-investment grade bonds and up to 75% of its assets in non-rated bonds. The Fund may also invest up to 10% of its assets in common equity stocks when consistent with its objective.

The Fund may employ for the purpose of efficient portfolio management, the investment techniques and instruments described under "Fund Investment Techniques" and "Investment Risks" in the Prospectus.

The Fund will not invest in any collective investment schemes.

Intended retail investor:

This Fund is suitable for retail investors with basic knowledge of financial markets. The Fund is suitable for investors with both income and growth objectives, and a long investment time horizon. The Fund is not suitable for investors who cannot bear any level of loss or are looking for a level of guaranteed preservation of capital. The maximum loss possible is the value of the investment made by the investor.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance and poor market conditions could impact the value of your investment. There are no assurances that the objective of the product will be achieved and the value of your investment may fall and you may get back less than you invested.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In addition to market risk, this product is also exposed to risks associated with credit, derivatives, liquidity, counterparty exposure, interest rate and exchange rate movements.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund or benchmark over the last 10 years. The stress scenario shows what you might get back in extreme market circumstances.

What happens if FundRock Management Company S.A. is unable to pay out?

Client money invested in the fund is held in a segregated account and should the Fund be terminated, the value of assets available in the fund will be distributed after all other liabilities have been paid.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is GBP 10,000.

Investment: GBP 10,000	If you exit after 1 year	If you exit after 5 years
Total costs	9 GBP	62 GBP
Annual cost impact (*)	0.1%	0.1%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.3% before costs and 7.2% after costs.
