What is this product?

Type

This product is a unit of a mutual fund qualifying as an undertaking for collective investment in transferable securities (UCITS).

Term

This sub-fund has no maturity date. However, the board of directors may decide to close the sub-fund under certain circumstances.

Objectives

The sub-fund aims to generate a maximum capital appreciation by combining long and short positions on company shares (equities) that are listed on regulated markets.

In order to achieve its objective, the sub-fund invests predominantly but not exclusively in European Companies (particularly in the Nordic region, i.e. Sweden, Finland, Norway, Denmark and Iceland).

The Investment Manager seeks long exposure on the companies that are believed to be undervalued or mispriced and conversely short positions for companies that are believed to be overvalued. sub-fund may invest in derivatives to achieve its investment objectives or to mitigate risks. Derivative instruments includes over-the-counter transactions such as warrants, total return swaps and contracts-for-difference (CFD's) and/or exchange traded transactions such as options and futures.

The Investment Manager uses fundamental analysis for selecting the investment opportunities.

The sub-fund may also invest a substantial portion of its assets in interest bearing instruments.

From time to time, up to 20% of the sub-fund's net assets may be invested in liquid assets, such as cash deposits or money market instruments.

The sub-fund may create short positions through derivatives. The sub-fund's long positions will at all times be sufficiently liquid to cover any obligations arising from its short positions.

The sub-fund's leverage, i.e. borrowing and derivatives exposure may not exceed a total of 200% of its assets.

The sub-fund qualifies as an Article 8 product under SFDR (Sustainable Finance Disclosure Regulation) since its investment strategy promotes broad environmental, social, and governance criteria ("ESG Goals") The Investment Manager considers ESG factors as having implications for drivers of risk and return at the company and market level and, in the management of the Sub-fund, seeks to allocate capital to companies that are both profitable and sustainable. The Investment Manager views the UN Sustainable Development Goals (SDGs) as the most recognized and coherent global framework for evaluating sustainability with regards to environmental, social, and economic development. The broad ESG goal of the Sub-fund is to

allocate capital to companies whose business models are positively aligned with the achievement of the SDGs and exclude or avoid those that are not. This goal is supported by analyses of SDG alignment of company business models and the analysis of ESG practices in company operations. These analyses are incorporated in the investment processes and ownership activities of the Sub-fund. For further information on the Investment Manager's ESG policy please consult <https://www.carncapital.com/invest-to-exist/>.

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.

Intended retail investor

The assets held by the Sub-Fund will predominantly consist of shares. The Sub-Fund is suited for experienced, sophisticated and retail investors who can afford to set aside capital for at least three to five years.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 10 years. Markets

risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Counterparty risk, derivatives risk, liquidity risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

could develop very differently in the future.

This type of scenario occurred for an investment between 2012 and 2022, by referring to a benchmark between 2012 and 2020.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if FundRock Management Company S.A. is unable to pay out?

The Management Company is responsible for administration and management of the sub-fund, and does not typically hold assets of the sub-fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Management Company, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the sub-fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any, of this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 100,000 NOK is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	1,800 NOK	13,615 NOK
Annual cost impact (*)	1.8 %	1.8 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.8% before costs and 10.0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
