What is this product?

Type

This product is a unit of a mutual fund qualifying as an undertaking for collective investment in transferable securities (UCITS).

Term

This sub-fund has no maturity date. However, the board of directors may decide to close the sub-fund under certain circumstances.

Objectives

The sub-fund seeks to achieve long term capital growth through active global stock selection.

The sub-fund intends to invest in listed equities and equity related securities. The sub-fund's investments will not be limited to specific geographical areas or industry sectors. However, due to the fact that the Investment Manager and the prospective investors largely are domiciled in the Nordic region, the sub-fund's portfolio will on average have an overweight towards the Nordic region, compared to traditional global indices.

The stock selection process will primarily be based on a value approach whereby the Investment Manager seeks to identify and invest in undervalued stocks through the use of traditional valuation parameters such as price/earnings, cash flow analysis, price-to-book, debt levels and other similar valuation parameters where there also exist growth opportunities.

The sub-fund can also invest up to 10% in corporate, government or convertible bonds, including debt securities with a lower credit rating than BBB- (investment grade) by Standard & Poor's scale, as well as in securities without official credit ratings. There are no restrictions on the duration of the sub-fund's bond holdings.

The sub-fund will not invest in financial derivative instruments other than for currency hedging purposes.

The sub-fund may invest a maximum of 10% of the portfolio in other eligible investment funds.

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark. However, the sub-fund is managed in reference to a benchmark to calculate the performance fee as further

detailed in the Charges section.

Intended retail investor

The Sub-Fund is intended for retail investors who are seeking medium to long term capital appreciation. Investors must be prepared to accept volatility and potential capital losses and may therefore be inappropriate for investors who plan to withdraw their money within five years.

Other information

Depositary: Skandinaviska Enskilda Banken. AB (publ) – Luxembourg Branch

Dividend income: This class is a capitalisation class meaning that income is reinvested.

Conversion right: The investor has the right to convert his investment in units in one sub-fund for units in the same sub-fund or in another sub-fund. The investor can obtain information about how to convert in the prospectus of the fund.

Segregation: The assets and liabilities of a sub-fund are segregated pursuant to the law so that the commitments and liabilities of one sub-fund do not affect the other sub-funds.

Additional information: Additional information about the fund, copies of its prospectus, the latest annual and semi-annual report and the latest prices of units may be obtained free of charge from the management company or on fundinfo.fundrock.com/SEBPrimeSolutions/. The prospectus and the periodic reports are prepared for the entire fund and are available in English. The management company may inform you about other languages in which these documents are available.

This sub-fund was launched in 2018 and this unit class in 2022.

The reference currency of the sub-fund is expressed in NOK. The currency of the unit class is expressed in NOK.

What are the risks and what could I get in return?

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 10 years. Markets

risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Counterparty risk, derivatives risk, liquidity risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

could develop very differently in the future.

This type of scenario occurred for an investment between 2012 and 2022, by referring to a benchmark between 2012 and 2022.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if FundRock Management Company S.A. is unable to pay out?

The Management Company is responsible for administration and management of the sub-fund, and does not typically hold assets of the sub-fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Management Company, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the sub-fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any, of this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 100,000 NOK is invested

| | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| Total costs | 2,200 NOK | 16,285 NOK |
| Annual cost impact (*) | 2.2 % | 2.2 % each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.4% before costs and 9.2% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
