

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

SEB PRIME SOLUTIONS - KRAFT HØYRENTE a sub-fund of SEB PRIME SOLUTIONS class B (LU1966282151)

Management Company: FundRock Management Company S.A.

Objectives and investment policy

The sub-fund intends to invest mainly in Norwegian fixed income instruments up to 100% in high-yield. The investments will not be limited to specific industry sectors.

The sub-fund intends to build a portfolio of investments representing a cross section of the Norwegian economy. The selection of investments is primarily based on cash-flow analysis and the debt levels of the issuing companies. In addition the sub-fund can hold NOK denominated instruments that are issued by companies that are not themselves incorporated in Norway.

The sub-fund may also invest directly in sovereign, corporate, and convertible bonds, as well as in other debt securities. The sub-fund can invest in debt securities with a lower than investment grade rating BBB- (by Standard & Poor's scale), as well as in debt securities without any official credit ratings.

There are no restriction on the duration of the sub-fund's holdings in interest bearing instruments, but under normal market conditions, the sub-fund seeks to maintain an average duration of the portfolio of under 2 years.

Although the sub-fund will not actively seek to invest in defaulted or distressed debt instruments, the sub-fund can hold such instruments, including company shares and other equity instruments, if the situation of

the bond results in such situations after investment. The sub-fund can hold a maximum of 6% and an average of 3.5% in defaulted or distressed debt instruments. Shares and equity related instruments will not, under normal market conditions, exceed 10% of the sub-fund's Net Asset Value.

The maximum of unhedged holdings denominated in other currencies than NOK is limited to 20% of the Net Asset Value.

The sub-fund is actively managed and the investment objectives, strategy and marketing do not refer to a benchmark.

The currency of the share class is NOK.

Under normal circumstances, subscription and redemption of shares can be made every banking day in Luxembourg and Norway, except for 24th and 31st of December.

These shares are capitalisation shares. Income and capital gains are reinvested.

Recommendation

This sub-fund may not be appropriate for investors who plan to withdraw their money within 4 years.

Risk and reward profile

What does this synthetic risk and reward indicator mean?

- The shares of class B are classified in category 4 because the value of the share may be subject to medium variations and consequently the risk of loss and the opportunity of gain may be moderate.
- The risk category for this share class was calculated using simulated historical data. The risk category may not be a reliable indicator of the share class's future risk profile. The risk category shown is not guaranteed and may change over time.
- The seven-category scale is complex, for example 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 sub-fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited.

Which materially relevant risks are not adequately captured by the synthetic indicator?

- Market volatility reflects the degree of instability and expected instability of the performance of the Shares, the sub-fund's assets. The level of market volatility is not purely a measurement of the actual volatility, but is largely determined by the prices for instruments which offer investors protection against such market volatility.
- Credit risk: the sub-fund invests directly or indirectly in interest bearing instruments, for example bonds. If an issuer of such an instrument cannot pay interest or the nominal amount at maturity, the investment can lose some or all of its value.

- The sub-fund may use derivatives. Due to their structure, the risk associated with these investment instruments may have a larger impact on the value of the sub-fund, than buying the underlying stock or investment instrument directly.
- Counterparty risk: the risk that a counterpart does not fulfill its obligations to the sub-fund (e.g. not paying an agreed amount or not delivering securities as agreed).
- Liquidity risk: low liquidity might result in that it would be difficult or impossible to buy or sell an investment instrument in a timely manner and that the price could be lower or higher than expected.
- Currency risk: the sub-fund may hold some of its investments in currencies other than the sub-fund's reference currency. Thus the value of the sub-fund may rise and fall due to currency movements.
- Below Investment Grade Securities: the sub-fund may invest in fixed-income instruments which are or are deemed to be the equivalent in terms of quality to securities rated below investment grade by Moody's Investors Service, Inc. and Standard & Poor's Corporation and accordingly involve great risk.
- Distressed Strategies: Investment Managers may invest in securities of issuers in weak financial condition, experiencing poor operating results, having substantial financial needs or negative net worth, facing special competitive or product obsolescence problems, or issuers that are involved in bankruptcy or reorganisation proceedings; these include Distressed Debt Securities and Defaulted Debt Securities. Investments of this type involve substantial financial business risks that can result in substantial or total losses.

How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment is indicated in the corresponding sections of the prospectus of the fund.

Charges

The charges you pay are used to cover the running costs of the sub-fund, including the costs of marketing and distribution of shares. These charges reduce the potential increase in value of an investment in this sub-fund.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.78%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown correspond to a maximum percentage which might be deducted from your capital invested into the sub-fund. In some cases you might pay less. You may contact your financial advisor or

intermediary to be informed on the actual entry and exit charges.

The conversion of some or all of the shares into shares of another sub-fund or another share class is free of charge.

The ongoing charges figure shown here is an estimate of the charges as this share class has not existed for an entire year; consequently, there is insufficient data available. The fund's annual report for each financial year will include detail on the exact charges incurred.

The figure of the ongoing charges excludes:

- Securities transaction charges, except for the charges related to the purchase and the sale of target funds.

For further information concerning charges, please consult the heading "Fees, Compensation and Expenses borne by the Company" of the fund's prospectus.

Past performance

(1) The relevant performance was made in a context and circumstances that no longer apply.

All charges and fees, except for the entry and exit charges, were taken into account.

The past performance is calculated in NOK.

Past performance is not a reliable indicator of future results.

The fund was launched in 2019 following the merger by absorption of SEF - Kraft Høyrente Class B (Accumulation) (NOK) which had an equivalent and comparable investment policy and risk profile.

Performance returns prior to the merger date reflects the past performance of SEF - Kraft Høyrente Class B (Accumulation) (NOK) which was merged into the sub-fund on 30.09.2022.
