WHAT IS THIS PRODUCT?

Type : This product is a unit of a mutual fund qualifying as an undertaking for collective investment in transferable securities (UCITS).

Term : This sub-fund has no maturity date. However, the board of directors may decide to close the sub-fund under certain circumstances.

Objectives : The sub-fund aims to generate stable returns by primarily investing in Investment Grade bonds and fixed income related securities with focus on the Nordic market but can include if relevant other markets.

The sub-fund will invest at least 80% in Investment Grade fixed income securities or fixed income related securities issued by corporate and other issuers, including but not limited to agencies, governments or municipalities, in the Nordic markets, but issuers are not limited to the Nordics. Investment Grade corresponds to rating AAA to BBB-. The sub-fund investment should either have a rating from Standard and Poor or equivalent or in the event of a non-rated security, the Investment Manager's internal rating will apply. Up to 20% of the sub-fund holdings can be invested in sub-Investment Grade fixed income securities issued by corporate and other issuers, including but not limited to agencies, governments or municipalities.

The sub-fund may invest in Contingent Convertible Bonds ("CoCos") up to an aggregate maximum of 20% of its assets. For the avoidance of doubt CoCos will not be issued by distressed issuers.

Derivative financial instruments may be used for investment and hedging purposes. The instruments to be used are mainly - but not limited to - options, credit default swaps, currency swaps, credit indices interest rate swaps and forward rate agreements.

The sub-fund's portfolio will be managed in accordance with an active investment strategy with an emphasis on fundamental analysis (Earning prospects, Debt-servicing ability, cost position, competitive position, Developments in supply and demand in the market in which the companies operate, Development in credit metrics, Business model) at company and macro level of the companies issuing the instruments in which the sub-fund intends to invest.

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark. However, the sub-fund is managed in reference to a benchmark to calculate the performance fee as further detailed in the composition of costs section.

Dividend income: This class is a capitalisation class meaning that income is reinvested.

This sub-fund was launched in 2024 and this unit class in 2024.

The reference currency of the sub-fund is expressed in NOK. The currency of the unit class is expressed in NOK.

Intended retail investor : This product is intended for all investors who are seeking medium to long term capital appreciation. Investors must be prepared to accept volatility and potential capital losses and may therefore be inappropriate for investors who plan to withdraw their money within three years.

Depository: Skandinaviska Enskilda Banken. AB (publ) – Luxembourg Branch

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator:

Below investment grade risk, Liquidity and market characteristics, derivatives risk, hedging risk, counterparty Risk, credit Risk, liquidity risk, contingent convertible Bonds Risk.

This product does not include any protection from future market performance so you could lose some or all of your investment. If not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period (RHP): 3 years Example Investment: 100,000 NOK			
Scenarios		If you exit after 1 year	If you exit after 3 years (RHP)
Minimum	There is no minimum guaranteed return . You could lose some or all of your investment.		
Stress	What you might get back after costs	99,210 NOK	99,260 NOK
	Average return each year	-0.79%	-0.25%
Unfavourable	What you might get back after costs	99,970 NOK	101,250 NOK
	Average return each year	-0.03%	0.41%
Moderate	What you might get back after costs	100,660 NOK	102,490 NOK
	Average return each year	0.66%	0.82%
Favourable	What you might get back after costs	103,100 NOK	104,320 NOK
	Average return each year	3.10%	1.42%

Unfavourable scenario: This type of scenario occurred for an investment/benchmark or proxy between March 2016 and March 2019

Moderate scenario: This type of scenario occurred for an investment/benchmark or proxy between January 2019 and January 2022

Favourable scenario: This type of scenario occurred for an investment/benchmark or proxy between December 2020 and December 2023

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

WHAT HAPPENS IF FUNDROCK MANAGEMENT COMPANY S.A. IS UNABLE TO PAY OUT ?

The Management Company is responsible for administration and management of the sub-fund, and does not typically hold assets of the sub-fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Management Company, as the PRIIPs manufacturer has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the sub-fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any, of this loss.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return).
- For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 100,000 NOK is invested.

Investment of 100,000 NOK	If you exit after 1 year	If you exit after 3 years (RHP)
Total costs	806 NOK	2,500 NOK
Annual cost impact(*)	0.81%	0.81%

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.63% before costs and 0.82% after costs.

OTHER RELEVANT INFORMATION

Conversion right: The investor has the right to convert his investment in units in one sub-fund for units in the same sub-fund. The investor can obtain information about how to convert in the prospectus of the fund.

Segregation: The assets and liabilities of a sub-fund are segregated pursuant to the law so that the commitments and liabilities of one sub-fund do not affect the other sub-funds.

Additional information: Additional information about the fund, copies of its prospectus, Key Information Document, the latest annual and semi-annual report and the latest prices of units may be obtained free of charge from the management company or on <https://www.fundrock.com/funds/>. The prospectus and the periodic reports are prepared for the entire fund and are available in English. The management company may inform you about other languages in which these documents are available.

Past performance and previous performance scenarios: The cost, performance and risk calculations included in this key information document follow the methodology prescribed by EU rules. Note that the performance scenarios calculated above are derived exclusively from the past performance of the Fund's share price and that past performance is not a guide to future returns. Therefore, your investment may be at risk and you may not get back the returns illustrated. Investors should not base their investment decisions solely upon the scenarios shown.

Any past performance data presented will be for up to 10 calendar years from the date of the launch of a share class. No performance data will be presented for a share class that does not yet have performance data for one complete calendar year as there would be insufficient data to provide a useful indication of past performance to retail investors.
