What is this product?

Type:

The Product is a sub-fund of a collective investment scheme set up in Luxembourg as a company with variable capital, a Société d'Investissement à Capital Variable [SICAV]

Term:

This Product is not subject to any fixed term.

Objectives:

The aim of the Product is to provide capital growth by investing primarily in a diversified portfolio of equity securities issued by small and medium sized U.S. companies that are expected to experience quality growth characteristics. The Investment Manager will primarily choose companies no larger than the largest company in the Russell Midcap® Index at the time of investment. The Product's performance is measured against the Russell 2500™ Growth Index. The Product is actively managed within its objective and is not constrained by a benchmark.

This Fund has been classified under Article 8 for purposes of the SFDR.

Any income generated by the Product is reinvested to grow the value of your investment.

Recommendation: this Product may not be appropriate for investors who plan to withdraw their money within 5 years.

You can buy and sell shares in the Product on a daily basis on any full working day in Luxembourg when the New York Stock Exchange is open for trading. Further information on the Product's investment objectives and policy are detailed in the prospectus.

Intended Retail Investor:

The Product is not suitable for investors who plan to withdraw their money within 5 years. Investors should consider the Product only for the more aggressive portion of their portfolio. The Product is suitable for investors who: Seek a return over the long term; Seek income whether in the form of capital appreciation or distributions, as outlined in the "Dividend Policy" section of the prospectus; Accept the risks associated with this type of investment, as set out in the "Risk Factors" section of the prospectus

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 Years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of the fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances you may be required to make further payments to pay for losses.

Due to effects of unusual market conditions, other risks could be triggered, such as: counterparty risk and liquidity risk. Please refer to the KIID for more detail.

This Product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What return you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 Years Investment: 10 000 USD			
Scenarios		1 Year	5 Years (recommended holding period)
Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs	NaN USD	NaN USD
	Average return each year	NaN %	NaN %
Unfavourable scenario	What you might get back after costs	6 870 USD	7 510 USD
	Average return each year	- 31.32%	- 5.57%
Moderate scenario	What you might get back after costs	11 520 USD	18 430 USD
	Average return each year	15.2%	13.01%
Favourable scenario	What you might get back after costs	18 130 USD	26 570 USD
	Average return each year	81.28%	21.58%

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between July 2021 and July 2022.

Moderate: This type of scenario occurred for an investment between February 2017 and January 2022.

Favourable: This type of scenario occurred for an investment between March 2016 and February 2021.

What happens if the Product is unable to pay out?

You are exposed to the risk that **William Blair** might be unable to repay the investment made in the Product. This may materially adversely affect the value of the Product and could lead to you losing some or all your investment in the Product. A potential loss is not covered by an investor compensation or protection scheme.

What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.

- USD 10 000 is invested.

Investment: 10 000 USD	If you exit after 1 Year	If you exit after 5 Years
Total Costs	289 USD	2824 USD
Annual Cost Impact (*)	2.89 %	3.27 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 16.28% before costs and 13.01% after costs.

How long should I hold it and can I take money out early?

Recommended holding period: 5 Years

This product is designed for long term investments; you should be prepared to stay invested for at least 5 years. However, you can redeem your investment without penalty incurred for disinvestment prior to the end of the recommended holding period, or hold the investment longer. Redemptions must be received by the registrar and transfer agent no later than 4pm GMT to be dealt with on the basis of the net asset value per share applicable on that valuation date. Redemptions received by the registrar and transfer agent after that cut-off time will be dealt with on the next valuation date. Redemptions may be made in a number of shares. Redemption payments will be affected three (3) Bank business days, which are also days when the relevant foreign exchange market is open, after the redemption of the shares. Any cashing-in before the end of the recommended holding period may have a negative consequence on your investment.
